

in June 1992 will be a landmark event. It will mark the climax of many international environmental negotiations. We commit ourselves to work for a successful Conference and to give the necessary political impetus to its preparation.

51. We aim to achieve the following by the time of UNCED:-

a) an effective framework convention on climate change, containing appropriate commitments and addressing all sources and sinks for greenhouse gases. We will seek to expedite work on implementing protocols to reinforce the convention. All participants should be committed to design and implement concrete strategies to limit net emissions of greenhouse gases, with measures to facilitate adaptation. Significant actions by industrial countries will encourage the participation of developing and East European countries, which is essential to the negotiations.

b) agreement on principles for the management, conservation and sustainable development of all types of forest, leading to a framework convention. This should be in a form both acceptable to the developing countries where tropical forests grow and consistent with the objective of a global forest convention or agreement which we set at Houston.

52. We will seek to promote, in the context of UNCED:

a) mobilisation of financial resources to help developing countries tackle environmental problems. We support the use of existing mechanisms for this purpose, in particular the Global Environment Facility (GEF). The GEF could become the comprehensive funding mechanism to help developing countries meet their obligations under the new environmental conventions.

b) encouragement of an improved flow of beneficial technology to developing countries, making use of commercial mechanisms.

c) a comprehensive approach to the oceans, including regional seas. The environmental and economic importance of oceans and seas means that they must be protected and sustainably managed.

d) further development of international law of the environment, drawing inter alia on the results of the Siena Forum.

e) the reinforcement of international institutions concerned with the environment, including the United Nations Environment Programme (UNEP), for the decade ahead.
