J. McQueston, Export Manager

Established in 1927, Chromalox Inc. employs 1 000 people to manufacture a diversified line of electrical heating products which includes swimming pool and spa heaters and sauna stoves.

The residential electric heater line, series PHD-B, ranges in size from a 5 KW unit to a 30 KW unit in 240 Volt, and features 100 percent heating efficiency, stainless steel wall tanks, built-in overheat protection and a compact space saving design.

The commercial heater line, Series CWP-B ranges in size from 6 KW to 60 KW with voltages of 208, 240, 277, 480 and 600. All heaters are available in either one or three phase. Features include 100 percent heating efficiency heavy steel wall galvanized tanks, built in overheat protection and heavy duty elements.

Chromalox sauna stoves come in four models ranging from 4.5 KW to 9 KW in size, operating in 208 or 250 Volt, single or three phase. The exterior finish is either red enamel or stainless steel. These are compact designed units to use the least possible space in a sauna corner.

All products are CSA certified and able to meet world standards.

Cornelius Industries Inc.

Cornelius Industries Inc. a family owned light manufacturing company, is based in St. Catharines, Ontario. The company manufactures inground and on-ground swimming pools, above ground swimming pools, and vinyl pool liners.

Cornelius' primary markets are Canada and the United States. The United States business is handled through Cornelius offices in North Tonawanda, New York.

The company manufactures 12 models of above ground pools in 10 sizes and shapes in both galvanized steel and aluminum. An aluminum deck/fence package is available to complete these pools. Inground pools are manufactured in kits from

galvanized steel and heavy gauge liners that make some 70 sizes and shapes of pools. Vinyl liners in plain and patterned styles and in both 20 and 30 gauge are made for the pool. Primarily kits, they can also be supplied on a custom basis.

Cornelius emphasizes good design, ease of assembly, and competitive prices.

Bob Liberatore, Sales Manager

For 25 years Dauphin Pools Ltd. has provided swimming pool product to the North American market. Today, it is a strong manufacturer of both all-steel and all-aluminum above ground pools.

The "Martinique" series is the steel model that is manufactured from a corrugated zinc plated steel and laminated with a vinyl finish. The coping and vertical posts are made with multiple linked slots and the zinc plated steel is plastic coated for an attractive finish. Print liners are provided to enhance the pool. Martinique above-ground pools are available in 15 foot (4.6 meter) to 27 foot (8.2 meter) diameter sizes.

"Flipper" and "Royale" pools are the all-aluminum models. All aluminum parts to the pool wall, vertical posts and cross sections are coated with a

baked enamel finish to further protect them from corrosion. This baked finish also allows the attractive colour to resist fading.

All liners are made from a sanitized, 100 percent virgin vinyl that will not fade or discolour. Other features include grooved extrusions, non-skid grooved surfaces, a 6 inch top rail on the "Flipper" that will support 500 lbs. (225 kgs) or an 8 inch top rail on the "Royale" that will support 800 lbs. (360 kgs), and a PVC decorative edge band.

The "Flipper" models come in 15 foot (4.6 m) to 27 foot (8.2 m) diameter round models and 12 foot (3.7 m) by 24 foot (7.4 m) to 15 foot (4.6 m) to 33 foot (10.0 m) oval models. The "Royale" line has round models that range from 18 feet (5.5 m) to 27 feet (8.2 m) in size.
