

7. The Parties agree that, beginning in 1999, provisions for overage and underage shall be developed by the CTC as follows:

(a) in AABM fisheries:

- (i) the first post-season CTC model calibration will be used to compute the abundance index;
- (ii) a cumulative (across years) management range of 7.5 percent (subject to review by the CTC) shall be permitted;
- (iii) underages in excess of the management range in sub-paragraph (ii) above cannot be accumulated; and
- (iv) total mortality will be incorporated pursuant to paragraph 3.

(b) in ISBM fisheries:

- (i) consistency with the index applicable to ISBM fisheries pursuant to paragraph 4 will be assessed when the exploitation rate analysis for that year's fishery is completed;
- (ii) a cumulative (across years) overage of 7.5 percent (subject to review by the CTC) of the ISBM index shall be permitted;
- (iii) underages in excess of the management range in sub-paragraph (ii) above cannot be accumulated; and
- (iv) overages in ISBM fisheries for a stock group are to be assessed in aggregate over all of the Party's ISBM fisheries and any overages shall be adjusted within the jurisdiction's fisheries with the obligation that:
 - (1) achievement of agreed escapement objectives for other stocks or stock groups is not adversely affected; and
 - (2) harvest impacts are not transferred among fisheries in a manner that results in additional restrictions pursuant to paragraph 9 in the ISBM or AABM fisheries in another jurisdiction.

8. The Parties agree:

- (a) to continue the procedures previously established by the Commission to allow for the exclusion of chinook salmon catches in selected terminal areas from counting against Treaty catch limitations; and
- (b) to continue the procedures previously established by the Commission to allow for hatchery add-ons harvested in AABM fisheries.

9. The Parties agree that:
