

In order to carry out their work, it would be essential for the observers to have their own technical facilities at the site. A well-equipped workshop would be needed for calibration, maintenance and repair of monitoring equipment. On-site chemical and toxicological laboratories with sophisticated equipment would also be necessary for conducting agreed upon measurements.

SUMMARY

In summary, we believe that the provisions we have described for on-site monitoring would provide assurance that the nature and quantity of material destroyed were as represented. In our view, such monitoring must cover the entire disposal process and include observers and instruments. We believe this can be accomplished in a manner which is not unreasonably intrusive.
