1869—GOLDEN JUBILEE—1919

The Leading Value in Men's Suits is Priced at \$15.00

Suits in Good Serviceable Tweeds, Well Cut and Splendidly Tailored Throughout
As an example of the splendid values that are available we feature this one particular line as a "leader"—a combination of rare, low pricing, good style and good material. Suits of such quality are quite a novelty these days at such a low price. If you come and see them you'll realize this fact at a glance. The materials were bought in big quantities many months ago, when prices were much lower, but our workrooms were engaged on other work, and could not make them up. Now they are coming through at the old prices, and represent one of the most remarkable values the EATON'S Men's Clothing Department can offer. They are materials of wool and cotton mixed tweeds, commonly known as union tweeds, also cotton and wool tweeds. They are divided into two lots. For men there's a big variety of check and stripe patterns, in medium and dark greys, greenish greys, browns and olive shades. Also included are a few homespuns in light and dark greys. They're in the three-button, single-breasted, semi-form-fitting style, with notch lapels and close-fitting collars. Five-button vests and neat-fitting trousers. Sizes 36 to 44. \$15.00.

Men's Multiplex Hosiery, 35c Pr.

Men's "Multiplex" Mercerized Lisle Thread Hosiery. Seamless and elastic knit, with fine ribbed cuffs. In black, white, tan, navy, champagne, gunmetal. Sizes 9 1/2 to 11 1/2. 3 pairs for \$1.00, or, per pair, 35c. —Main Floor, Yonge St.

Boys' Velocipedes, Today, Special, Each, \$1.95

Spring is just about here, and every boy will be ready to use a velocipede. This one at such a low price is suitable for boys between 6 and 8 years. The frames are finished with black enamel, have 24-inch front wheels, and 16-inch back ones, with iron tires. Adjustable fibre seat. Today, special, each, \$1.95. —Fifth Floor, Centre.

Spring Hats

Fashionably Shaped Soft Hats at \$3.00 and \$6.00 Will Be the Features

THE shapes and colors to be worn by men this spring are represented in the recent arrivals of soft and stiff hats displayed on the Main Floor.

The soft hats still have a tendency toward flaring, flatter brims and medium crowns. The shades are rich light and dark greens, light and dark greys, and browns. They're all made of splendid quality felt and are representative of the usual EATON values. Price, \$3.00.

We also show a great variety of staple blocks, with rolling brims and welted edges, in much the same shades. Made of better quality felt are fedora hats in beautiful shades of light green, grey and steel. Crowns are medium and full, and brims include flat set and rolling. These are all well-blocked hats, and will appeal to both the fashionable and conservative dressers. Price, \$6.00.

With puggaree bands, \$6.50. —Main Floor, James St.

Boys' Sturdy Boots, Today, \$2.95

A special purchase accounts for this low price. In dark brown or black—some in Blucher style—with broad or recede toes and Neolin and fibre-rubber soles. Sizes 1 to 5 1/2. Special, today, per pair, \$2.95.

Men's Boots, Today, \$4.95

Men's Lace Boots, in the popular dark brown shade, with smart recede toe and perforated toe cap, Goodyear welt leather sole and low heel. Sizes 5 1/2 to 11. Today, \$4.95. —Second Floor, Queen St.

A Great Showing of Suits for Boys

Featuring, as Usual, a Huge Variety of New Styles, Patterns and Colors at Extremely Moderate Prices

THE Boys' Clothing Department is ready for spring with an immense assortment of brand new styles. It's unnecessary to look at the new trencher-belted and Norfolk models, the splendid patterns in good, serviceable materials and the price tickets on each garment to realize that the EATON selection of boys' suits is up to the criterion of fashion and the standard of good values.

One of the best values in the selection is priced at \$8.25. They are made of cotton and wool mixed tweeds in medium and dark shades of grey and brown. Have yoke in front and box pleats at back running to waist, also stitched-on belt with flap and slash pockets. Bloomers have Governor fasteners at knee. Sizes 26 to 35. Price, \$8.25.

Another collection includes some very smart models made of wool and cotton mixed tweeds, in medium shades of grey and brown, in trench model, with all-round belt. These are single-breasted, with plain front, slash pockets and plain box back. Bloomers have side, watch, hip pockets and Governor fastener at knee. Sizes 26 to 35. Price, \$9.65.

Some new arrivals include suits made of wool and cotton mixed tweeds and soft finished serges, in trencher and fancy Norfolk styles. The trencher is single-breasted, with all-round belt, slash pockets and box back; the Norfolk is single-breasted also, but have fancy pleats running down back and front to waist. Also have all-round stitched-on belt and slash pockets. Bloomers have the new Governor fastener at knee. Sizes 27 to 35. Price, \$11.00.

Extremely smart are boys' suits made of wool and cotton mixture. These suits are cut from sample ends of cloth, there being only enough cloth for one or two suits in each pattern. They're in plain blues and greys; also browns with herringbone and diagonal stripes and checks. In single-breasted style, with plain front, slash pockets, pleated back, with inverted pleat running down center of back, and all-round belt with combination buckle and button fastener. Sizes 29 to 34. Price, \$13.50. —Main Floor, Queen St.

A Great Assortment of New Shirts for Spring Wear

Featuring Particularly a Huge Variety of New Colored Designs

THE Men's Wear Annex is ready for spring with an immense and fresh assortment of new shirts for men. Every man should pay a visit to this interesting section and see the new display of furnishings. The shirts are unusually smart in fancy-colored designs for spring, and many of the patterns are quite novel.

They are all reliable brands that are made to fit properly, launder continuously and hold their colors.

Perhaps one of the best values in the assortment are the EATON-made shirts at \$2.00. They are made of fine printed shirting materials in coat style with soft cuffs. Patterns include cluster stripe effects in blue, black, mauve and green. Also single and double stripe effects in same shades. Sizes 14 to 17 1/2. Price, \$2.00.

Some excellent patterns are included in the showing at \$2.50, one in particular being a cluster stripe effect in black, blue and helio. These are made of fine shirting materials in coat style with soft cuffs and assorted sleeve lengths. Sizes 14 to 17. Price, \$2.50.

Some Emery shirts are made of fine, soft crepe in a selection of fancy colored stripe effects on light grounds. All are coat style and have soft double cuffs. Sizes 14 to 17. Price, \$4.00.

At \$3.00 there's a particularly good assortment of shirts made of cambrics and mercerized corded materials, in a big range of colored designs. Sizes 14 to 17. Price, \$3.00.

Some beautiful silk shirts include smart patterns in fancy allover designs or Roman stripe effects, as well as single, double and cluster stripes. All coat style, with soft double cuffs and assorted sleeve lengths. Sizes 14 to 17. Price, \$7.50. —Men's Wear Annex, Main Floor, Yonge St.

PEACE BRIDGE ACROSS THE NIAGARA RIVER

Proposal Revived to Mark Hundred Years of Friendship Between U. S. and Canada.

The proposal to erect an international bridge across the Niagara River at a point near the falls, to commemorate the 100 years of peace between Canada and the United States, which has been allowed to remain in abeyance because of the war, has been revived. Mayor H. P. Stephens, the "Tommy" Church of Niagara Falls, Ont., was in the city yesterday, and as a result of his visit the project has received an impetus. He hopes soon to see a meeting held between representative citizens of the two countries and his trip to Toronto was to make preliminary arrangements. The New York state legislature is now in session, and will give consideration to a bill granting financial aid to the project. The Canadian authorities are expected to do the same.

Mayor Stephens explained that the suggestion of a peace bridge was warmly approved at the time of the big international celebration held in July, 1914, to mark the 100 years of unbroken friendship between Canada and the United States, and but for the war would now be an accomplished fact.

LEAGUE OF NATIONS A FRENCH TRADITION

Yesterday afternoon in the Physics Building of the university, Captain Fernand Baldensperger was the speaker in a series of lectures being delivered weekly. The subject of the address was the "League of Nations." It was distressing, said the French officer, to have it thought by some that the Gallic cock was now so much awake and of such a spirit that no one can hold him. This does not agree with the traditions of France where for three centuries thinkers have been more or less trying to bring about a league of nations. France has been controlled by two traditions as represented by Victor Hugo: the religious point and the progressive and realistic. In France even apparently new ideas have a background of precedents and the present idea of the league of nations has been worked out in various ways by writers and sovereigns, according to the statement of the speaker, who showed how Henry IV. had a vision of a general council in Europe.

Coming to the present the lecturer said that while there is a common stream of good will towards the league he did not see how a people who are wholly unrepentant, who would not even say they had been mistaken or that they did not know the truth, could sit down on the same footing as others at the conference. The French believe in a league of nations but not in a league of all nations, was the summary of the address. In concluding the speaker said that there are two languages which are destined to come into universal use, English and French. In the evening Captain Baldensperger gave an address in French on the personality of Clemenceau.

HOUSING PROVES TANGLED PROBLEM

(Continued From Page 1).

lodge with the family. This condition, in a measure, may have been the result of war, but it could not be forgotten that in older countries the general tendency is to overcrowding, and the same may be occurring in the large centres of Canada. The aim must be to make this a country of homes. Slum conditions are not in the public interest, and slum conditions are apt to develop when such tendencies are left wholly to private enterprise. In the United States, the state and municipal authorities took no part in schemes of industrial housing, which are now in a state of considerable chaos. The Ontario municipalities did not come to any agreement with their province and it was a happy solution of the difficulty when the Dominion government came forward with the loan scheme upon which the bill now before the house is based. The danger of competition with private enterprise in the building trade can only be judged upon the working of the present proposals which are in the way of experiment. The measure would be a much an incentive as a condition of competition. The bill is adapted to conditions as they exist.

Taxes Extra. Sam Carter asked whether the calculated rent of \$20 per month for a \$3,000 house includes the taxes. Premier Hearst: The taxes will of course be extra. But the plan would be cheaper, he believed, than building

or renting could be undertaken in any other way. He went on to repeat that farmers who desire to build will be supplied out of the funds of the province which are available up to the amount first proposed to the municipalities. Circulars had been sent out through the counties with regard to the need of housing for agriculture help and many interesting replies had been received. The tenor of these replies was that the construction of houses for farm help would help to solve the trouble of the farmer in securing labor. But it is uncertain to what extent advantage will be taken of the government's offer by farmers. At all events it was there if the farmers wish to take it. The government do not pretend the bill is perfect and looked for the assistance of the house to making it better. Labor organizations are co-operating in this way also and he hoped to get the bill through the house without much delay.

Sam Carter doubted that the average workman could pay the rent. If the purchasers of these houses chuck up their bargain the loss must fall on the municipalities. The million dollars or aid to the university is a free gift for a special class, but the farmer or the workman gets nothing but a loan or building at extravagant cost the entitled to commensurate aid. The land problem he regarded as the fundamental difficulty. He believed the province and the Dominion should arrange the financial scheme in such a way that the houses would be sold to the occupants at the cost of building alone. He feared gambling in land as one of the results of the present scheme. It was possible that the purchasers of these houses might be ruined. The province should at least be prepared to share with the municipalities the present ab-

normal cost of building, because it might mean that the buyers would sweat blood in the end.

A Good Bill. Mr. Proudfoot considered the bill a good one, but in committee it may be improved.

S. Clarke appealed to the government for God's sake to keep their politics out of this housing scheme. He urged that the locations be chosen as far as possible where little plots of land would go with the house. So far as the farmers are concerned, he thanked God that 90 per cent. of them are in a position to build themselves. These would be called government houses, although the municipalities would pay for them. The government must be careful not to do anything that would draw men from the farms to the cities.

J. C. Elliott also warned against the possibility of the bill increasing the movement of labor away from the farms to the cities. Hon. W. D. McPherson spoke at length. Allair Studholme looked at the bill from his own standpoint. The he had worked for 50 years, he did not yet own his house, in a burst of confidence he added: "I'm praying that if I stay here I will be able to pay for it." Sam Clarke: I think we are good for another year. Mr. Studholme was doubtful how the scheme would work with taxes, insurance, water rates added to the \$20. With periodical unemployment the workman might fail in his obligations. Mr. Mageau said the bill was to help the poor man. The house should be cheaper and the rent brought down to \$10 per month. The house adjourned till Monday.

MME. TREVILLE SINGS AT ST. JOSEPH'S MUSICALS

Moved to tears at the mention of her former home, Belgium, Mme. Yvonne de Treville was unable to respond to the address which was read to her by Miss Wanda Collins at the conclusion of a musical given at St. Joseph's College, St. Albans street, a bouquet was presented by Miss Margaret Heney.

A feature was the singing of one of Toronto's coming prima donnas, Miss Dorothy McGann, whose voice received much praise, and a brilliant career was prophesied for the Toronto girl by Mme. de Treville. The program included "Patre," "The Blue Bell," laughing song from "Manon," "Chanson de Provence," and groups of songs by Mrs. Beach, Eva del-Aqua and Macdowell. Mrs. James W. Mallon was an unusually sympathetic and efficient accompanist. The cantatrice appeared at the kind invitation of Mrs. Ambrose Small, honorary president of St. Joseph's College alumnae, who introduced the singer in her usual happy style. Others on the platform were: Col. Fraser, A.D.C. to his honor the lieutenant-governor of Ontario; Lieut. H. M. Morden, R.A.F., and Leo Sullivan, a Toronto friend of the prima donna. Luncheon was served after a tour of inspection. Later the party attended the Rotary Club lunch at the King Edward.

Lieut. P. W. Stairs, son of Mr. and Mrs. F. W. Stairs, 193 Madison avenue, arrived home yesterday after serving 20 months with the American army. Lieut. Stairs was in command of the 37 Service Co., Signal Corps.

ASSESSMENT PROCEEDS IN FIVE-MILE RADIUS

Town planning work in the district five miles around the city, except the south, has had the attention of the assessment department for some time. The sum of \$2,150 has been asked from the board of control for the continuation of the work. Authority to control the subdivisions of this area was granted to the city under the city and suburban act (and the planning and development act). An area of 100,000 acres is included. Roads will be constructed running north-east, west, northeast and northwest, all running into a road, Yonge street, which will lead to the heart of the city. The act requires that all owners of land within the area shall, before subdividing their property, submit plans to the railway board to see that they conform to the general plan for the whole district. Twenty-two thousand acres have already been mapped out, and 4,000 acres have been filed with the railway board. Plans covering 5,000 acres showing the slope and lay of the land have been prepared. The estimated roadway mileage is 65, and it is intended that the existing roads shall be widened ten feet.

Nursing Sister H. B. MacCallum Is Married in London, England

Ottawa, Feb. 28.—The marriage took place in London, England, of Captain H. H. Ellis, M. D., of Ottawa, son of the late Dr. R. W. Ellis, director of the geological survey, and nursing sister H. B. MacCallum, of Toronto. Captain Ellis and his bride are expected back in Canada shortly.
