C.N.R. CROP REPORT FAIRLY FAVORABLE

eficial-Fine Conditions in Manitoba.

From Beulah, in western Manitoba, the agent states that the grain is filling well, and that prospects are excellent, and that some new breaking is being done.

The report from the agents in the western operating district is not generally so favorable, but there are many indications that the rains which have fallen thruout the far west have had a decidedly beneficial effect upon the growing grain, and that a fair yield will be halvested.

Lloydminster reports: "An eight-hour

cidedly beneficial effect upon the growing grain, and that a fair yield will be halvested.

Lioydminster reports: "An eight-hour rain, which will have a good effect upon the crop; outlook promising."

Between Lioydminster and North Battleford a need of moisture is indicated from nearly all agents.

Heavy Rain Helps.

Fort Saskatchewan, on the main line between Lioydminster and Edmonton, reports that a heavy rain has helped the crops considerably, and that grains are coming along nicely, and that it looks brighter for a fair crop.

At Chipman, east of that point, on the main line, the agent says that the heavy rain of the past week practically ensures a moderate crop.

From Onoway, west of Edmonton, comes word that the wheat is up 18 to 30 inches and heading out, and that with rain there will be an excellent crop.

The agent at Clyde, between Edmonton and Athabasca, to the north, says that the heavy rain of the listh and 17th saves the crop situation in that district; that the grains have headed out well, and that farmers have commenced haying.

In central Alberta, between Camrose and Munson, the agent from Big Valley reports rain on the 17th, and that the prospects are good for an average crop. Stettler reports plenty of moisture, and that there is ideal growing weather, with bright prospects. The agent from Meeting Creek, on the same line, says:

"Grain in this district standing the dry weather; light-rain July 13; raining today (July 17); prospects for sufficient moisture hours' rain since last report, which

to the acre.

The agent at Wayne says the rains of the past week have improved the crops, and a fair yield is now expected. The agent from Drumheller says the crops are in bad shape owing to hot winds, and that more rainfall is necessary; but Munson says the crop conditions are very good and the grain is headed out Craig-myle reports a four-hour rain on the 12th.

good and the grain is headed out. Craignyle reports a four-hour rain on the 12th, covering about 25 miles, and that the farmers expect about a 20-bushel crop. Hanna reports five-hour rain and the crops to be looking better.

Between Hanna and Alsask, agents report serious damage from the heat; but from that point west, in Saskatchewan, towards Saskatoon, the agents are more optimistic. Pinkham reports that a five-hour rain on the 12th improved crops to be looking better.

Napanee, July 25.—At the cheese board meeting here today, 625 white were boarded and 1280 colored; 500 sold at 25c, less freight to Montreal.

STANDARD OIL DOUBLES CAPITAL.

New York, July 25.—The Standard Oil Company of New Jersey today announced a proposed increase in its capital stock by \$100,000,000, which virtually doubles the present capitalization. The new stock will be at seven per cent. preferred, but non-votting, and will be offered to present shareholders at par.

ON OUTOBER I WELF IM

Paris, July 25.—Elections for a new French parliament will probably be elected on the 12th. In the municipal elections the first balloting will be held on Oct. 19 and the second balloting a proposed increase in its capital stock by \$100,000,000, which virtually doubles the present capitalization. The new stock will be at seven per cent. preferred, but non-votting, and will be offered to present shareholders at par.

CORN PROSPECTS HIGHLY UNCERTAIN

Recent Rains Have Been Ben- Drought and Heat Continue, Adverse Crop Conditions and C. B. Watts Says Big Rise in Silver Stocks Rally Well, But But There is Promise of Rain.

The Canadian National Railways report for last week on the growing grain the west, between Port Arthur and the mountains, reached the head office here yesterday.

The information from the men located in the central operating district of Caradian at close and the continued for the property of the prope

Calgary reports to Bradstreet's that rains have helped the crops in Alberta considerably, but there is still a great danger of almost famine in some parts. It is understood that the Maniparts. It is understood that the Manitoba government has placed or is about to place a million dollars aside to buy cattle in Saskatchewan and Alberta. This is a small amount when it is remembered that thousands upon thousands of cattle will be shipped to market unless there is a great change in the crop situation. Retail business is fairly satisfactory. Merchants do not look for big business this fail owing to crop conditions.

Prices Has Little Significance.

IS SET BY McINTYRE

Hamilton B. Wills, in his weekly market letter, says: With the steady progress the earnings of McIntyre are climbing upward, and this year will undoubtedly establish high record figures. Another tactor of vital importance and one which should please each and every stareholder, is that the average grade of McIntyre ore is richer as increased depth is reached, as well as the ore bodies becoming larger. This to a gold mine ensures success, and incidentally the shareholders receive the benefit.

At the present time the McIntyre mill is handling slightly over 600 tons daily, but the opening up of new levels below a depth of 1000 feet has increased the ore reserves to such a degree that another unit will soon be required in the mill, thus bringing the daily capacity up to 1000 tons. As a matter of fact, at the rate the McIntyre Mine is 6x-panding, it is my opinion, as well as that of my engineer, before the end of 1920 a mill with a capacity of at least that of my engineer, before the end of 1920 a mill with a capacity of at least 2000 tons daily will be in operation.

Hundreds of Strikers Leave

Camp—Men Hope for

Strike Pay.

Special to The Toronto World.

Cobalt, July 25.—The outlook is for a prolonged deadlock between the mine owners and miners. Between 400 and 500 of the strikers, mostly single men. and eleft act camp, many of them going into the bush, and practically only the married men are left. There is a rumor among the strikers that they will get strike pay from the Western Federation of Miners amounting to \$11 a week for married men and \$11 a day for single men, and this is encouraging them in their stand.

Practically all the mines have pulled their pumps, and even if the strike ended at once about a week and a half would be required to dewater the properties. If the strike goes on for two months, it will require two months more to effect the dewatering, and the
