TORONTO JUNCTION, Oct. 23.—If the frosts that seem to be threatening—if the present temperature in the evening signify anything—would only keep away for a short time, there is every indication that the work of paving Dundas-street will suffer no further delay. The concrete substructure has now been laid as far as Western-avenue and the railway tracks are in position and ready to be laid. ONTARIO VEGETABLE CROPS WILL BRING GOOD PRICES

That is the Expectation of the Growers—Fine Weather for Harvest.

In spite of the lateness of spring and dry weather during summer, the vegetable growers of the province have had a satisfactory season, report the crop correspondents of the Ontario Vegetable Growers' Association.

On the whole, prices have been good. Rains in early fall caused rapid growth, although most crops matured later than usual. To offset the unfavorable weather conditions early in the season, the gardeners have been favored with excellent weather for harvesting. The outlook for prices during the late fall and winter is good. With potatoes bringing fairly high prices, and high prices for some localities, all kinds of vegetables should sell well. In many localities potatoes are turning out better than was expected, but the yield is only average. They are more uniform in size than usual, and such as beets, carrots, parsnips and turnips, have yielded well, but generally speaking, they will be scarce on the market. The onion crop has not been much except in the Ottawa district; many growers complain of a large proportion of "thick-necked" or "scallions." It is probable that the marketable onions will not be hurried on to the market; a large percentage of them will be kept over winter. Celery has yielded a good crop, but the quality is not quite up to the standard. Lettuce and radish is fairly plentiful. Late cabbage and cauliflower have yielded well and are of fair quality.

CANAL TRAFFIC EXPANDING. Relatively Larger Than Increase Shown by Railways.

OTTAWA, Oct. 23.—The annual blue book containing the canal statistics of the Dominion for the season of 1906 was issued to-day. The figures show a large increase in the business between Canadian ports during the past twenty years, particularly with regard to westward traffic. The growth has been considerable from Canadian to United States ports. The up-bound traffic has been in larger volume than that moving eastward. Since 1887 the trade between United States by Canadian canals has grown largely. In this instance, however, the movement downward has been greater than upward. There has been an actual shrinkage in the up traffic between United States and Canadian ports, but practically doubled, however, has practically doubled. The expansion of business with canals is relatively larger than that shown by the railways. The traffic moving up and down has increased 27 per cent. during the past twenty years. The westward business shows a gain of 365 per cent, while the eastward grew to the extent of 27 per cent. While 87,966 1/2 tons of freight were carried by Canadian railways in 1906, as compared with 16,266,387 in 1887, the amount was 254 per cent, as against 287 per cent on the canals.

ABOLISH PLAY CENSOR. English Theatrical People Are Getting Up a Petition.

LONDON, Oct. 23.—English playwrights and managers are again much exercised over the functions of the play censor here. A petition is being prepared to present to the prime minister, asking that the office of play censor be abolished, not as reflecting on G. A. Redford, who occupies the post, but because no other form of censorship is subjected to such a supervision. The censor is occasioned by the fact that the censor has recently held up a play which was scheduled to be given in the Savoy Theatre Nov. 13. Mrs. Sara Bernhard opened her London season this week to crowded houses.
