missioners state that the general situation is as described in the message of General Otis of June 26, except that a number of ports in the southern part of Luzon, in Leyte and other islands to the south, have since been opened to trade.

Despatches from Dr. Schurman on his return from his trip through the southern part of the archipelago were of the same purport. A disposition to accept American sovereignty and to welcome our troops was everywhere manifested.

What Otis' Report Said.

The report of General Otis of June 26, referred to by Commissioner Denby in the above despatch, stated that as a consequence of the rainy season little Island campaigning was now possible in Luzon. We occupy, said Gen. Otis, a large portion of the Tagalog country. The lines stretch from Imus, on the south, to San Fernando on the north, nearly 60 miles, and eastwards into the Laguna Province. The insurgent armies have suffered great losses and are scattered. The only large force which holds together is about 4000 in Tarlac Province and Northern Pampanga. There are scattered forces in bands of 50 and 500 in other portions of Luzon. In Cavite and Batangas Provinces, they could possibly assemble as many as 2000. They are developed from the control of the fire was dry and ignited like tinder. Next to the building in the control of the fire was dry and ignited like tinder. Affairs in the other islands.

Affairs in the other islands are comparatively, quiet, awaiting results in Luzon. Al! were anxious for trade and repeated calls for American troops were received. He is giving his attention to the Jolo Archipelago and the Palawan Islands.

Gen. Otis speaks of the general desire of the volunteers to re-enlist. He has provided for the enlistment of the two regiments which have been authorized and has asked permission to organize a third regiment.

nad 500 in other portions of Luzon. In Cavite and Batangas Provinces, they could possibly assemble as many as 2000. They are demoralized from recent defeat. The most of the people are terrorized by the insurgent soldiers, but desire peace and American protection. They no longer fiee from our troops, unless lorced by insurgents, but gladly welcome them. There has been no recent burning of towns.

Congestion of Population.

The population within our lines has become dense, taking up land cultivation extensively. They are kept out of Manila as much as possible, as the city population was becoming too great to be cared for. The only hope of the insurgent leaders in aid from the United States. This is the influence which enables them to hold out. Much contention prevails among them and no civil government remains. The trade with ports not in our possession, the former source of insurgent revenues, is now liverdicted. General Oits doubted the wisdom of this policy, as people in those ports are without supplies or food, and the merchants are suffering losses. He meditated at that time the restoration of trade privileges, abihough the insurgents might reap some nemetic from it, a plan which has since been partially carrid into effect.

In the Other Islands.

Affairs in the other islands are comparatively, quiet, awaiting results in Luzon. All were anxious for trade and repeated calls for American troops were received.

TAKES ONE'S BREATH AWAY. Laurier-Tarte Regime Won't Have Hard Times in Canada if They Know It.

The main estimates, which are now being voted, amount to \$46,286,551, and today supplementary estimates were brought down amounting to \$5,497 344, so that the amount asked so far !s \$5; 783,895, of which \$43,420,558 is chargeable to consolidated fund and \$8,357,039 to capital account. Last year the main estimates amounted to \$47,900,487, and the supplementaries brought down this year and assented to by His Excellency a rew days ago amounted to \$2,647,629, so that the total amount asked for the last fiscal year was \$50,548, 116. So far the estimates for the current year are \$1,235,799 ahead of last year, but it is understood that there are to be "Turther supplementary" estimates, and a big lot of railing a supplementary estimates, and a big lot of railing a supplementary estimates, and a big lot of railing a supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates, and a big lot of railing the supplementary estimates and the suppl north, and probably \$500,000 for Mackenzie and Mann for the expense they incurred in preparing to build what Mr. Morin called their "Snow-Shore" road into the Yukon, and the supplementary estimates to be brought down next year. So, taking it all thought down next year. So, taking it all together, it is not unreasonable to assume that the total amount to be asked for the current year will be \$55,000,000 or more, equal to \$10 per head for every man, woman and child born or unborn in the Dominion of Canada.

Mr. Tarte's Hand Seen.

In the supplementaries brought down tolay the master hand of Mr. Tarte is very
learly seen. He is prepared to spend and

This is the celebrated "Bremner fur case," which aroused so much interest 14 years ago, when the Grit press charged General Middleton, who commanded the forces during the Nonthwest rebellion of 1885, with stealing Bremner's furs. Bremner was a rebel and his furs were confiscated and, although the matter was thoroughly examined, both departmentally and in Parliament, the late Government would never admit that the furs were not lawfully and properly confiscated.
