### LET'S GO

(Editorial from Chicago Herald and Examiner, August 22, 1919.)

Put one hundred men on an island where fish is a staple article of sustenance. Twenty-five of the men catch fish. Twenty-five others catch fish. Twenty-five cook the fish. Twenty-five hunt for and gather the fish. The entire company eats what this is gathered and prepared.

So long as everybody works there is plenty. All hands are happy.

Ten of the allotted fish catchers stop catching fish.

Ten more dry and hide part of the fish they catch.

Five continue to catch fish, but work only part of the day at it.

Fewer fish go into the community kitchen.

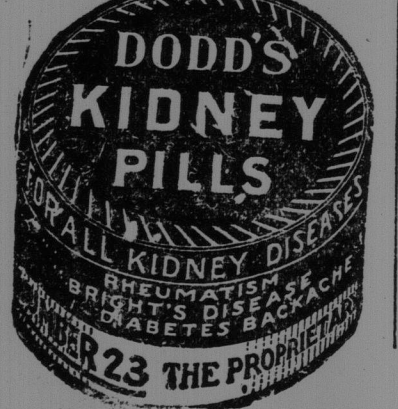

But the same number of men insist upon having the same amount of fish to eat as they had before.

The fifty men who formerly cleaned and cooked the fish have less to do owing to the undersupply of fish. But they continue to demand food.

Gradually greater burdens are laid upon the fruit and vegetable hunters. These insist upon a larger share of fish in return for their efforts in gathering fruit and vegetables. It is denied them and soon twenty of the twenty-five quit gathering fruit and vegetables.

But the entire one hundred men continue to insist upon their right to eat.

The daily food supply gradually shrinks. The man with two fish de-

### AUCTIONS

### BUSINESS FOR SALE

**GOOD FRUIT AND CONFECTION-ery store, with ice cream parlor and soda fountain, well located. Big stock on hand. For particulars Phone Main 3632.** 15407-11-29

mands three bananas in exchange for one of them. The man with two bananas refuses to part with one for fewer than three fish.

Finally the ten men remaining at work quit in disgust. Everybody continues to eat. The hidden fish are brought to light and consumed. Comes a day when there is no food of any kind. Everybody on the island blames everybody else.

What would seem to be the solution? Exactly? We thought you would guess it.

For we repeat that you can't eat, buy, sell, steal, give away, hoard, wear, use, play with or gamble with What Isn't.

### DEMOCRACY IN INDUSTRY.

A news despatch recently stated that next to the United States Steel Corporation, the Goodyear Tire and Rubber Company, Akron, Ohio, has more of its workers as shareholders than any other company in the world, no less than 70 per cent. of its employees owning stock. This principle is extending in industry, and it is believed will be an important factor in bringing about and holding industrial peace. There will doubtless always be a percentage of workers who move from one factory to another, and do not take root, but the principle is one that makes for steadiness. The Firestone Tire and Rubber Company, the Pennsylvania Railway, the American Telephone and Telegraph Company, and many other large corporations are examples in which employees have large interests. William C. Redfield, who recently resigned the position of Secretary of Commerce for the United States, reviewing the "Democratic Drift in Cor-

porate Ownership" in an article in the New York Commercial, reaches this conclusion: "Let us hope that the movement toward employee ownership, customer ownership, employee management, and toward the widespread distribution of corporate stocks may continue. Thus workmen become their own employers and their own managers. Thus the corporation is not the focus of a widespread popular life. Thus the man or woman in the mill or at the shop is working for himself or herself. The wage system, so bitterly attacked, is on the one hand a small measure self-determined, but is supplemented by further compensation arising from ownership. The capitalist, instead of being a parasite, becomes a transfusion of new blood; it becomes the representative increasingly not of a class but of the mass; it approaches in the very social ideals that reformers have sought, but constructively without harm and through a normal evolution and not through attack and disaster."

**PILES**

**Cold Pack Canning Process By "Wear-Ever" System Is Great Advantage Over Older Methods**  
Interesting Point Explained and Illustrated in Demonstration of "Wear-Ever" Aluminum Cooking Utensils at Thorne's.

Much interest and enthusiasm were manifested by the many housewives who attended yesterday afternoon's demonstration of the "Wear-Ever" Aluminum, in the Household Department of W. H. Thorne & Co's store, when Miss Chamberlain, the Domestic Science expert, explained and illustrated the great advantage of using the "Wear-Ever" Aluminum Double Roaster in connection with the "cold pack" system of canning fruits and vegetables.

In the old cumbersome "wash-boiler" method, it was shown that the jars are merely immersed in hot water, while in the "Wear-Ever" Double Roaster they are thoroughly steamed, thus ensuring a perfectly airtight seal, preventing the natural flavors of both vegetables and fruits. The "Wear-Ever" Double Roaster is large and roomy, allowing abundant space for half-a-dozen glass fruit jars.

Miss Chamberlain, who is highly qualified in Domestic Science, will be pleased to answer any questions along that line and to assist in the solution of problems in Household Economy in which she has had an extensive training.

The "Wear-Ever" demonstration will be continued all this week at the stores of W. H. Thorne & Co., Ltd., and should be very largely attended.
