of this session's salary. You will have learned the result of the Local Election in North York. The U.F.O. must be allowed to run its course and if the Dominion Government does not go to the country for a couple of years it is not improbable that by that time it will have spent its force. Meantime, the wise thing to do would be I think to sympathize with them. When the Dom. Elections come on, the farmers will remember that a few days before the voting day the Government promised unqualified exemption from military service to Farmers Sons & shortly after passed an O-in-C conscripting them without their having the right which all other conscripts had of appealing to the Military Tribunals. The Govt. knew or should have known, the military needs, as well before as after their election. Walton made a good run. The prohibition sentiment in North York is strong. It is unlikely that ~~Walton~~ drew any temperance votes /Lennox from those not conservatives. Foote the U.F.O. candidate is supposed to have cut into both sides about equally, but my personal view is that he did more harm to Walton than to Lennox but I can form a better opinion on this point when I see the vote by polling subdivisions. I will then analyse it and tell you what my conclusions are. With best wishes I am

Yours faithfully,

(Sgd.) W. MULOCK

P.S. Be careful, go slowly, later when firmly seated in the saddle you can ride with a freer rein.

W.M.
