## Fredericton Globe.

A. J. MACHUM, Publisher and Proprietor.

FREDERICTON, N. B. JUNE 10, 1893.

### SALUATORY.

With the present issue the FREDERICTON GLOBE enters upon the first period of its existence as an eight page paper. It has always been the aim of the proprietor to make the GLOBE a first class weekly paper in every way and to render it an indispensable factor in the equipment of every intelligent and well read household in the county of York and contiguous parts of the province. To this end we have always done our level best to provide for our subscribers a weekly epitome of spicy news from Fredericton and vicinity. We have in addition furnished the latest news of the world in an attractive and satisfactory manner; we have contrived to provide original and well written editorials upon subjects of interest to the people of the county. In furtherance of this aim we have lately organized our Teachers' column, which has thus far proved a complete success. But we have discovered that the successful attainment of our desires for the welfare of the reading public was incompatible with the amount of space formerly at our disposal, and to add to our dilemma, we found our list of advertisers, which has been steadily increasing since the first publication of the GLOBE, had become so large that it was impossible to accommodate them in our old limits, and at the same time do justice to the reading public. We have accordingly doubled the size of the GLOBE, and we now present the first number to our patrons, trusting that the increase in its dimensions may be attended by a corresponding increase in its usefulness and value to our patrons. On the first page will always be found readable and instructive agricultural notes, which we hope will prove especially desirable and useful to our farming patrons. On the last page is the weekly instalment of our serial story. Within we have provided space for a teachers' column, news of the world, varieties, local news and editorial matter, all of which we pledge ourselves to make as spicy and entertaining as possible. On the whole we feel that our new move has already been more or less productive of good, for it has enabled us to enlarge our advertising space. Those of our patrons who are interested in horse news will find a column or two devoted to horse gossip, and giving all the latest news regarding horses and horse races. In fact there is scarcely any one class of readers, who will not find within our columns something suited to its taste, provided it possesses a taste, and we express the hope that all may be satisfied with what they find herein, as, in good faith, we will endeavour to make them. Trusting that our numerous subscribers may find an added interest and pleasure in the GLOBE we leave the paper in their hands.

### LIBERAL CONVENTIONS.

Since the date of holding the Liberal convention in York county, there have been large and successful conventions of the adherents of that party held in the counties of St. John, Albert, Westmorland, Carleton, Kings, Queens and Sunbury, at every one of which a great amount of enthusiasm was displayed, and a large, strong and influential delegation appointed to attend the general convention at Ottawa on the 20th of this month. The call issued by Mr. Laurier to the party to send men to Ottawa well furnished with good intellectual equipment and a well ordered zeal for the interests of their country and of the party has been well obeyed, and judging from the names of those who have been elected in our own and in neighboring counties, the New Brunswick contingent will be in no wise inferior to any body of men, with whom they will meet. This

is well, for the Liberal party needs an especially strong, wise and forceful representation from New Brunswick. It was in this province and in Nova Scotia that the present governmental party obtained the majority at the last election which virtually saved its political life, while the well-known fact that the Maritime Provinces, more than any other portions of the Dominion, feel the blighting effects of the National policy, together with the equally well known aversion entertained by the majority of the voters of these provinces towards the Tory party and its ruinous legislation, lead us to believe that success of the Tories at the last contest was the result in the first place of manipulation of the voters list and, in the second place of the judicious expenditure of an immense sum of corruption money with which the counties of New Brunswick were flooded. The people of the provinces by the sea were virtually bought up by the Tory party. Had it not been for this shameless bargain and sale, the Liberal victory in Ontario would have been followed by a change of government, leading the county to prosperity and the people to contented enjoyment of their lot. And there is very little doubt that the same tactics will be employed at the coming contest. The partisan revising baristers will attempt to manipulate the voters' list; the contest itself will be fought by the Tories with an enormous sum of money at their backs; the returning officers will, if possible, make false returns of the number of ballots cast; and it is to take measures to guard against the influence and advantage which the employment of these tactics affords their opponents, that the Liberals are to be convened at the call of their leader. The maritime provinces delegates need to exercise peculiar care and caution in the formation and completion of the plan of organization for the coming struggle. It is here, by the sea, that the bitterest struggle will be fought. Quebec and Ontario are almost sure to give a Liberal majority, which will be offset in a manner by the Tory majorities from Western Canada, but the Maritime Provinces hold the key which unlocks the portal leading to the political future of our country. A victory for the Liberals here is a victory for greater freedom of trade, for material prosperity, for universal contentment, but to continue the present party in power is to perpetuate for another term the iniquitous blood sucking existence of the national policy, to exhaust the wealth and energies of the people, and to further aggravate the afflictions under which our population is struggling. Let the delegates succeed in completing a judicious and thorough organization, and with a policy such as they have, acceptable to the people at large, it will go hard but we shall roll up in New Brunswick a respectable majority for the political emancipation of the country.

### A BENEFIT TO CANADA.

The Big Canadian cheese now on exhibition at the World's Fair will be a beneficial advertisement to Canada. It may not be known to the majority of our readers, and it may interest them to know that our country, Canada, is the great cheese producing country of the world. Canada now sends to Great Britain between one-third and one-half of all the cheese which the mother country imports. We send thither one-fourth more than the United States, and nearly four times as much as Holland, which is the next principal source of supply. In 1892 the import of cheese to the British markets from various countries was as follows:-

From	Value
Holland.....	\$ 3,292,875
France.....	716,646
Canada.....	12,468,125
United States.....	9,807,035
Other countries.....	704,810
Total.....	\$27,088,885

This table speaks for itself. Canada is the great cheese exporting country of the world; every true Canadian is proud of the fact, and the mammoth cheese shown at the World's Fair is a fair and sensible as well as impressive illustration of our proud pre-eminence in this particular. Other means of advertising the country have done and will continue to do something for us. A great agency to that end has been the Canadian Pacific Railway, the greatest railway on earth. It is a magnificent specimen of successful Canadian enterprise which has excited the envy of its competitors and challenged the admiration of the world. We know of nothing which has done more to make Canada well and favorably known abroad.

A scheme has lately been broached to bring to Canada all the commissioners who represent the various nations of the world at Chicago. The notion is a grand one, and if it could be carried out would be a splendid advertisement for the Dominion. If these representatives, from every land under the sun could be brought to Canada and traverse this country from end to end, view our noble lakes and rivers, our vast areas of fertile land, our forests and mineral wealth, our maris of commerce and our industries and schools, they would carry away with them to the ends of the earth the impression that Canada is a great country. They might wonder, perhaps, at the narrowness of our restrictive trade policy, but they would feel that it could not much longer be permitted to shackle a free, enlightened and progressive people such as Canadians are. There is just one obstacle to their coming. There is no parliamentary appropriation to cover the expense. To obviate this it is proposed that the cities of Canada should combine to extend a liberal hospitality to the world's representatives. It is worth thinking over at least.

### A ST. JOHN'S MIRACLE.

Eight Hundred and Twenty Dollars Spent in Vain Efforts to Regain Health.

An Engineer's Painful Existence and Wonderful Restoration—Hospital and Doctors Failed to Cure Him—Health Restored by a Remedy Almost Forgotten Upon Him—A Story Worthy a Careful Perusal. The News St. John's, Que.

It is now some fourteen months since THE NEWS commenced publishing reports of the wonderful results produced by Dr. Williams' Pink Pills, and every one must admit that many of the cures effected seemed little short of the miraculous. The names of the remedies which claim to cure all the ills flesh is heir to are today legion, and whatever the merits and demerits of these preparations may be there is no question as to the great reputation achieved by Dr. Williams' Pink Pills for Pale People. Some people no doubt laugh at these stories and believe them to be advertising dodges to catch the unwary and rope in some of their shekels. We have now printed and published THE NEWS for nearly half a century; it enjoys the reputation of being a high-toned weekly with a large circulation, and we naturally do business with the advertising men of the day, and from the reputation of Dr. Williams' Medicine Company, we have never had any reason to doubt the perfect accuracy of the cures related; but it is only now that we are placed in a position to testify personally as to the wonderful curative powers of Pink Pills. The story we were about to relate though no less remarkable than others regarding the same medicine naturally impresses itself more upon our mind and upon the minds of others in the community because the party chiefly concerned is known to us, and we are enabled to bear personal testimony as to the correctness of his declarations.

The gentleman who was a short time ago so greatly afflicted is now almost as well as he ever was and cheerfully related his story to the representative of THE NEWS, in the hope that those who read it might be benefited thereby.

Mr. Camille Dubouque is a man of fifty-three years of age and has been a mechanical engineer for twenty-five years, working on the steamer Reindeer which runs on Lake Champlain, and occasionally on the River Richelieu. "Four years ago," said Mr. Dubouque, "while our steamer had an excursion party on board of an evening run, I was rather tired after a long day's work, and went up on the upper deck to enjoy a smoke before retiring. At that time I felt myself to be in perfect health but, when I went to my room I was taken with chills and was unable to keep myself warm. Although that night I had but little sleep, I felt comparatively well the next day. About a fortnight after I was taken with frightful pains in my back near my spine, and in my side. I went to the hospital in Burlington Vt., and was treated there for three weeks and then feeling but little better I came to my home in Iberville county, five and a half miles from St. John's. I was then doctored by a medical man from Iberville. His treatment seemed to relieve me very little and I determined to visit Montreal and see another physician. This I did in March, (three years ago) and put myself in an eminent physician's care who treated me from March until July, and certainly did all he could for me. I did not stay in Montreal all the time but went backwards and forwards to see him. In July I got tired of this and was beginning to feel down-hearted. I then called in a medical man from Henryville, a village a few miles from where I live, and he prescribed for me over again, but by this time I was almost powerless to help myself and no one knows what frightful agony I suffered. For seven long months I sat in a chair with my feet on a lounge. I was unable to lie down day or night and often thought that death would be a happy relief. Last spring my wife read an account of a Saratoga miracle in THE NEWS and determined to get a box of Pink Pills for me. I remonstrated with her, telling her that it was useless spending more money, but

## McMURRAY & Co.

HAVE JUST RECEIVED

### 5 Cases Sabbath School Books,

Containing the Pansy, Elsie, Mildred, Bessie, and a Great Variety of Miscellaneous Books at Lowest Prices.

If you are in need of a Library write to McMURRAY & Co.
