Correspondence Invited! PRINCE EDWARD ISLAND KINGS CO., P.E.I.

LOWER MONTAGUE, Aug. 26.—Harvest is well under way and is a poor crop. Some have threshed and report grain very light in weight; as low as 31 lbs. to the bushel. Cattle are bad shape, owing to no after grass. Rain is coming now, but it is too late. It will help the soil crop, which looks good. Hay is set to 414; potatoes, 40c; eggs, 15c.—G.A.

COMPTON CO., QUE. COMPTON CENTRE, Sept. 4.—Harvesting is almost all done. We have had fine harvest weather lately. We have had such dry weather this season that many farmers are short of water. Cattle are very scarce, and are selling at a high price. Potatoes will be rather a small crop in this section, but root crops are fairly good.—J.G.C.

CHATHAM, QUE. BOWICK STATION, Aug. 26.—Threshing completed. The grain crop in

this section is below the average. Oats are light, averaging from 15 to 20 bu. an acre. Barley is a fair average crop. Peas, which are only grown in small quantities, are a fair crop of excellent quality. Corn is below the average but is improving of late.—J.B.

ONTARIO

HAYTINGS CO., ONT. SIDNEY CROSSING, Ont. 23.—Wheat is a fair sample and turns out well. Barley is an average yield; oats abundant; peas a short crop. Hay is looking fine and prospects are for a good crop. Early corn is very poor; late corn is fine and promising a very good yield. Root crops generally are of the exception of potatoes. The early ones are a failure; the late ones may be better if we have plenty of rain. Harvest is all in. Fall plowing has started.—J.K.

NORFOLK CO., ONT.

ERIE VIEW, Sept. 4.—September was greeted with a warm electric storm, which has had a beneficial effect on pasture. Fall apple picking is the order of the day. They are small in quantity but excellent in quality. Some are doing spraying. Farmers are preparing for fall seeding and dealing with various perennial seeds.—B.J.

HALDIMAND CO., ONT.

VARENEY, Sept. 1.—The acreage of wheat is larger than last year. Pasture is good, continued rains having kept it green. Fruit is somewhat ahead of clover seed is being harvested. Buyers are bidding \$10 a bu. Alskin seed goes for \$1.50. Labor is very scarce. Apples are one-half crop. Labor is very scarce. Apples are one-half crop, \$250 with board.—G.L.

WENTWORTH CO., ONT.

KIDDERLAND, Sept. 8.—The weather is still very dry. Cattle are still in good shape except on summer fallows, unless they get rain soon. Root crops are suffering and pastures are becoming very bare. Several good pieces of wheat are to be seen. If the frost keeps off for two weeks longer this wheat will yield splendidly. Fruit is somewhat scarce. Potatoes are selling at 45¢ a pk; butter, 28c; eggs, 25c; hys, 41¢; wheat, 30c; oats, 46c; corn, 45 to 50 cents. The weather is scarce; hogs down to \$7.50.—O.A.W.

ELGIN CO., ONT.

ST. THOMAS, Sept. 7.—We have had some nice rains, which have freshened the pastures, and which have increased the acreage of wheat is being put in. Good land being in fine condition. There is a great shortage of hay and straw and about half a crop of grain. Our only salvation for winter feed is a splendid crop of corn. Sows are already filling their silos, although the crop would have better silage were they to wait a week or two. Hay is selling at \$15 a ton, and hard to get.—J.H.

KENT CO., ONT.

BLENHEIM, Sept. 7.—Kent and Essex are experiencing an influx of farmers from Ohio and Indiana, whose specialty is corn growing on clay lands. Prices of farms are therefore advancing. The decision of the Railway Commission some time ago to make the Bell company continue with the independent companies is viewed with satisfaction, but the terms imposed are most discriminating. The subscribers for the coal line will be taxed 15 cents a message, whilst the city company on the Bell line gets his work done for nothing at the expense of the local company.—J.H.

HURON CO., ONT.

POETERS HILL, Aug. 31.—The harvest this year has been somewhat light, owing to continued wet weather during the month of July; consequently hay was less than one-half a crop, fall wheat only medium, oats very short and barley the same. Roots and cress are doing fine now. Plums, cherries and raspberries were a very light crop. Peas are a fair crop, while sprouts are right—less than one-fifth of a crop, taking the average of the orchards. Well cared for orchards have a very fair showing. Harvest is about over and many are preparing their land for wheat. The market prices for farm produce are: Wheat, 36c; oats, 37c to 42c; barley, 52c to 56c; hogs, \$7.35; butter, 15c to 20c; eggs, 17c to 18c. Plums are selling at 35c to 60c; apples, 50c to 75c; hys, 40c. We are endeavoring to create much interest, especially for reciprocity.—R.B.S.

BRUCE CO., ONT.

WALKERTON, Aug. 21.—The harvest in all parts of this county is about all over and is a little below the average in yield and quality; oats are good, but

light in weight. Corn is a promising crop. Roots are a little less; potatoes poor. Butter is 17c; eggs, 17c. Pasture is poor on account of drought.—J.A.L.

MANITOBA

MARQUETTE DIST., MAN. KELLOE, Aug. 30.—Harvest is in full swing now. It rained heavily Saturday and Sunday and caused a slow delay. Wheat cutting is almost finished. Cutting is rather a slow process, the grain being in bad shape. In an acre of wheat the crop 10 per cent. will be wasted on harvesting. Ten days' fine weather ought to see the harvest completed. Labor is fairly plentiful at \$2.50 a day and \$50 a month.—L.J.N.

BRITISH COLUMBIA

SIMILIKAMEEN DIST., B.C. ALLEN GROVE, Aug. 15.—Having had considerable rain 10 days, crops and roots of all kinds are good. Hay was extra good. Small fruits are above average. Potatoes this season of year. Blueberries are threefold in this part of B.C. Raspberries are 15c a qt.; apricots, 10c a lb.; plums, 12c a lb.; apples, 8c a lb.; hys, 43c to 85c; potatoes, 85¢ a cwt.—R.L.A.

A GREAT HOT WATER RECORD

Editor, Farm and Dairy: I notice in Farm and Dairy August 3 that Messrs Platt & Son claim the highest milk record ever made in hot weather. They certainly made a record to be proud of, and we wish to extend congratulations, and we can get them one better.

Helton DeKol freshened on May 12 and commenced her 30-day test on June 11, and her best 7-day record was made from June 12 to 5, which was the longest week we ever had in this section, being about 90 degrees in the shade every day and nearly 100 degrees in the face of this unfavorable weather she made 31.54 lbs. butter in 7 days, 128.57 lbs. in 30 days, her best day's milk was 24 lbs.—Edmund Laidlaw & Sons, Aylmer, West, Ont.

REPORT OF OFFICIAL TESTS OF HOLSTEINS JULY 1911

The list of official records for July contains the report of the largest yield of butter fat ever produced in Canada, made by Helton DeKol, 6 years old, of the late E. Laidlaw & Sons, Aylmer, Ont. She made 25.23 lbs. fat, equivalent to 31.54 butter, in seven days, and 102.86 lbs. fat and 128.57 lbs. butter in thirty days. This highest record reported last month for Jenny Bonerages Ormsby, which as a four-year-old made 24.63 lbs. fat and 30.76 lbs. butter in seven days, and 100.35 lbs. fat and 125.44 lbs. butter in thirty days.
