

but to the presence of the seventh harmonic, which, it is supposed, is naturally offensive to the ear. This, then, forms the explanation of the ratios found in the Major Scale. The speaker concluded by stating that tone music did not by any means consist in harmonic chords alone, but rather in the skilful blending of pleasing chords and harsh discords, and closed his admirable lecture by sounding the notes of the octave, by dropping upon the table bits of wood *chord* wood, perhaps they might appropriately be called. The next in the series of the regular lectures will be given by Professor Farmer, on the evening of March 15th, upon the Epistle to the Colossians. We hope that the interest in these popular lectures of McMaster will be not only sustained, but increased. We can assure to all a most hearty welcome.

MOULTON COLLEGE.

THE craze for photos comes in again with the opening season. "Park's Panels" are the latest. Moved and seconded that we apply for help from outside to assist in accompanying students down to Park's every Saturday morning.

"WHEN is Miss Stork coming back?" is a daily question, which shows how she is missed. She went to her home several weeks ago, to rest and recover from illness contracted by overwork. Her physician thinks she will be able to return in a week or two.

WE are pleased to see among us again the beaming countenance of one of our recent graduates, Miss Emma Dryden, who has assumed the dignified position of Mathematical Instructor during Miss Stork's absence. The senior class in mathematics is indebted to Miss McKay, of McMaster Hall, for her able guidance in their favorite science.

A FEW weeks ago the members of Bloor Street Baptist church had the pleasure of attending the first annual roll-call. The members of the church from Moulton were present, and spent a pleasant evening. Needless to say that the refreshments offered were highly acceptable. A large number responded to the roll-call, and those who were unable to attend in person sent letters. Several reports were read by the officers of the church, showing progress in different departments of the work.

THOSE who were present at dinner the evening of 29th of February, will not soon forget the scene of waving kerchiefs and smiling faces. Both were caused by the arrival in our midst of one of Moulton's former teachers, Mrs. William B. Hale, of Rochester, N. Y. As Miss Clara L. Andrews, she occupied the chair of Science during the first two years of the existence of the College, devoting every energy to the building up of her department, and the advancement of the entire school. The students who were here during that time remember gratefully, and will carry with them through life, the inspiring memory of her high thinking and noble acting.
