PATENT SECURED IN CANADA.

It is fixed on the lining under the drapery, and is worked from the outside much more easily with one hand than with two.

All that is necessary is to raise the dress behind, and at whatever place it is let go the sliding catch and the Suspender automatically fixes itself and sustains the dress at any desired height from the ground; indeed, so simple is it in operation, that this can be done quite well, even with an ulster on. No dress complete without it. To be had at
