The above Table does not include the summer herring, of which as much as 200,000 barrels are sometimes exported.

I annex likewise a Table showing the chief countries which imported Norwegian herrings, in the years 1863, 1864, and 1865.

	In 1863.		In 1864.		In 1865.

Sweden, Russia, and the Baltic ports are the chief markets for the Norwegian herring. Attempts have been made to ship to Leghorn, the Black Sea, and Madeira, but the results have not been encouraging. Of late years, shipments have been made to England, but it appears that the prices obtained there are low, and the demand depends to a great extent upon the result of the Scotch fisheries. The English, it seems, purchase only what they call here "round salted" herrings, which they afterwards smoke, and the Norwegians are turning their attention to the possibility of themselves smoke-curing, with a view to finding a good market in England and Holland, and, through this latter country, in Germany, where smoked herrings are consumed in very large quantities.

The Scotch and Dutch herring command a higher price on foreign markets than the Norwegian does; but this fact does not, it appears, injure the demand, for the consumption of the former kinds is principally limited to the better or middle classes, whereas the lat-
