STORIES OF BANK NOTES.

Queer Records of Some of Those Pre served In England.

A curious and interesting volume might be written on the adventures of some Bank of England notes from the day when they leave the printing press, clean and crisp and beautiful, to the last day of their varied careers, when, shorn of signature and with a hole punched through the figures which have made them so attractive, they are bundled into a close furnace and converted into ashes. Their leases of life vary as widely as their adventures, for, while some return to the fold with their work done within a day or two, there may be seen in Threadneedle street a note which was wandering for a century and a quarter before it came again into the "Old Lade" become

Lady's" keeping.
One of the most historically interesting of bank notes was that for £1,000 with of bank notes was that for £1,000 with which Admiral Cochrane paid the in-iquitous fine imposed on him in 1814. It may be remembered that this most gal-lant of sailors had been accused of conspiring to defraud the Stock Exchange by circulating a false report of the death of Napoleon and had been contenced to a fine of £1,000, 12 months' imprisonment and an hour in the pillory.

A public subscription was raised among his constituents for the payment of his fine, and the admiral thus indorsed the note which they presented him:

GRATED CHAMBER, KING'S BENCH PRISON, July 3, 1815.

My health having suffered by long and closs confinement and my oppressors being resolved to deprive me of property or life, I submit to robbery to protect myself from murder in the hope that I shall live to bring the delinquents to justice.

Once and only once the bank issued by mistake a note for a penny, which for some years was a source of annoyance and anxiety. Like a willful and stubboru sheep, it would not come back to the fold, and it was only recovered when the bank in despair offered a reward of £5 for its

In a mood of rare extravagance the bank once printed four notes, each for £1,000,000, and promptly destroyed the plate. Two of these notes came into the very appropriate hands of Rothschilds and Coutts, where for a time they attracted many open mouthed spectators. The only notes approaching these in value were two for £100,000 each, which

were destined to a very "short life." Bank of England notes have often, as perhaps is not unnatural, been associated with tragedies and crime. It is not many years since a young gentleman of the name of Swann was found dead, shot by his own hand, in a London attic. He had squandered a large fortune in every kind dissipation, and when he was reduced to his last £5 note he decided that life had on a table by the side of his revolver

was found a charred portion of a bank note, with which, in bravado, he had lit his last cigar, and on it these words were penciled, "The last note of a dying penciled, Swann. In the days when to steal or forge a

bank note was a crime punishable by death the histories of many notes were tragic in the extreme. The circumstances of one memorable case are peculiarly sad.

A certain young man called Howland was accused by his uncle, a merchant in was accused by his uncle, a merchant in the city, of stealing a 550 note from the writing table in his study. Although it was not proved that the note had ever been in his possession or that it had been cashed, the circumstances were consider-ed suspicious enough to justify conviction, and the young man, who was popular and of irreproachable character, was

sentenced to death. Some years after his execution the note for which his life was sacrificed was found in a recess in the library chimney, where it is supposed a draft had carried

"But the people of London," says Liebknecht, "don't understand a joke an attack is made on their stomachs. By the hundred thousand they wandered out to Hyde park on the Sunday after the passage of that bill and thundered into the ears of the pious aristocratic males and females who were enjoying their rides in carriages and on horseback a sneering 'Go to church!' so loud that the pious males and females were terror stricken. On the next Sunday the quarter of a million had increased to a half million, and the 'Go to church!' had become stronger and more serious, and by the third Sunday the measure was already revoked."

How It's Done.

The celebrated German organist, Martin Cesau, while on a visit this country, chanced one day to attend Dr. Robbins' church, in company with a friend and countryman, who was a member of the choir. The character of the visitor became known to the singers, and they were sager to hear the German play. The chorister whispered to the old or-ganist. Winder, that he must let Cesau "play the congregation out."
This was simply a voluntary which
the organist was in the habit of performing while the congregation were retiring at the close of the services. The old organist turned up his nose in disdain and disapproved; but the pressure came so hard that he at length gave in, and the German good-naturedly consented to give a

taste of his quality.

The closing anthem had come to a conclusion, the benediction was pro-nounced, and Winder reluctantly arose from his seat and allowed Cesau to take his place. The people had risen in the pews below, and were making for the aisles on their way out. But hark! What new sound is that? A new voice had burst from the organ. A harmony unknown be-fore was in the throbbing air.

The throng stopped where stood and listened. Even the good old doctor, halfway down the pulpit stairs, stood spell-bound. Old der saw the situation. The congregation had been seemingly petrified, and their powers of locomotion sus-

And, with an unceremonious push he ousted Cesau from his seat, seated himself before the keys, and struck into one of his old doxological vol-untaries. Very quickly the people be low dropped their heads and moved outwards: and, when the church was empty, old Winder rose from the organ in triumph.

A childless home is a cheerless nome. The maternal instinct exists in every woman, and when it is ungrat-ified she is deprived of much of the happiness of life. It often happens that childlessness is due to some cause which can be removed by the use of Dr. Pierce's Favorite Prescription. The vigor and vitality which this medicine imparts to the delicate womanly organs, puts them in a condition of normal health, the lack of which is often the sole obstruction to maternity. Every woman should read Dr. Pierce's Common Sense Medical Adviser, a book containing 1008 pages and 700 illustrations.
