

If You Would Be Well You Must Keep Your Kidneys Well.

Help them to work freely. Help them to flush off all the body's waste and impurities.

Doan's Kidney Pills

Are for this purpose only.

Have you suspected your kidneys as the cause of your trouble? If you have backache, swelling of the feet and ankles, frequent or suppressed urination, pain in the back, or aching in the joints, or if you are troubled with the urinary organs, then your kidneys are affected.

It is really not difficult to cure kidney trouble in its first stages. All you have to do is to give Doan's Kidney Pills a trial. They are the most effective medicine to be had for all kidney and urinary troubles.

Mrs. Mary Galley, Auburn, N.S., was cured by their use. She says: "For over four months I was troubled with a lame back, and was unable to turn in bed without help. I tried plasters and liniments of all kinds, but to no effect. At last I was induced by a friend to try Doan's Kidney Pills. After I had used two-thirds of a box my back was as strong and as well as ever."

Doan's Kidney Pills are 50 cents per box, or 8 for \$1.25. All dealers, or sent direct by mail on receipt of price.

THE DOAN KIDNEY PILL CO., TORONTO, ONT.

Why We Have One-sided Men.
Faculties must be exercised or they will not grow. Nature is too good an economist to allow us to keep any faculty or function which we do not employ. We can have just what we use and that will constantly increase. Everything else will be gradually taken away from us. Man becomes strong and powerful and broad just in proportion to the extent and healthiness of the activity of his faculties, and it must not be one-sided, not an exercise of one or two faculties or one set of faculties, or the man will topple over. Balance in life comes from the healthful exercise of all the faculties. One reason why we have so many one-sided men in this country is because they pursue one idea, exercise one side of their nature, and of course they cannot retain their balance. This is one of the curses of specialities. They are a good thing for the race, but death to the individual who pursues his speciality at the expense of the development of the all around man.—O. S. Marden in Success Magazine.

Beware of Ointments for Catarrh that Contain Mercury.

As mercury will destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces, such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is far too great to be worth any possible benefit from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 75c per bottle. Take Hall's Family Pills for constipation.

Myrtle in Construction.

The important part which myrtle plays in the construction of modern steel steamships is well illustrated by the fact that in the new Cunard liner *Carmania*, the largest ship ever constructed in Great Britain, no up to 1,800,000 rivets were used, the total weight represented being about 600 tons. The greater part of the riveting work was done by hydraulic power.

Self-Centered.

"Is there any reason why you should insist on playing Hamlet?" said the friend on playing Hamlet? "I never thought of that phase of the question," answered Mr. Stormington Barnes. "What I desire to know is why the public should insist that I shall not play it."

LARGEST ORGAN IN THE BODY.

Is the liver. Small wonder that liver trouble makes you feel so miserable. The symptoms are constipation, dizziness, indigestion, headache, feeling of depression and lack of appetite.

There is but one sure cure—Dr. Hamilton's Pills. In every case they are successful. By relying on Dr. Hamilton's Pills you are sure of strong vitality, nourishing blood, bright, cheery spirits. No longer will you suffer from disordered liver or kidneys. The marvel of this medicine is that it keeps you well—prevents and wards off sickness of every kind. 25c. per box everywhere.

The postman believes that we should take things as they come.

Coughs, colds, hoarseness and other throat ailments are quickly relieved by Coughing Tablets, ten cents per box. All druggists.

The woman lawyer does not always disdain a man's suit.

Monkey Brand soap cleans kitchen utensils, steel, iron and tinware, knives and forks, and all kinds of cutlery.

A PIONEER'S EXPERIENCE.

Alma McIntyre, of Egremont Township, Tells of Her Early Life Cutting Out a Forest Home.

Alma McIntyre of Egremont Township, came to Canada in 1851. Mr. McIntyre stayed a short time in Ontario, then he came to Egremont, where he took the farm which he still owns, built a log shanty in the heart of the bush, moved in when there was only a canvas hung up for a door and the wolves would be howling around at night, like to tear it down, but he always kept the ax, "the sword of defence," near at hand.

There was then no neighbors, no roads, one did not know where the roads would be, as the land was not yet surveyed; the only way of traveling was by marking the trees with the ax, so that one could return the same way.

The nearest place where the new-comer could sharpen his ax was at Mr. McDaniel's, who lived where Mr. Dan Murphy lives now, three or four miles away, who had a grindstone.

The nearest place to get groceries was up the Owen Sound road; one Cochrane kept a little store there. It goes by that name yet. There is a small burying ground there.

Herd Wolves Hacking.
The first winter he started off one day to get his ax sharpened, and also get some groceries. Striking across the bush, the crust on the snow would carry him. As he was about two miles from home, he was he supposed to be killed, so he removed parts of his clothing and hung them up in a tree, his bonnet along with the rest. Perhaps some body might come along and find them. Then he set his back against a tree, the ax in hand ready to fight to the last. To his great relief they took another route, being after a deer instead of a man. In going through the bush one could often see deer carcasses where they had been killed by the wolves and partly eaten.

The next spring he bought two hundred and four and fifteen bushels of potatoes from a person in Arthur Township. The next job was to get his purchase home, as the river was flooded and there was no bridge, only a tree chopped down across the water, which was very high in the spring, and the tree would be floating on the water. Still he had to face it. The farmer brought the stuff as far as Mr. Samuel Wallace's on the other side of the river, the land now owned by Mr. Canton, about two miles away by the road, he had to take it, but there was nothing else for it, and to carry it all on his back. He had to make several trips across the river, expecting every trip would be the last, as the log was swinging so, but he got it all over. The next thing was to carry it all home, and he persevered until he got it all home, but he used himself up so that he had to take a rest on the broad of his back on the bed.

Left Family in the Woods.
In the summer time he used to go down the country to work, leaving his wife and two little children in the bush. He worked in one place for eleven dollars a month, and now men have the cheek to ask thirty dollars a month.

In the winter time he used to cut down as much of the bush as he could, and he would cut enough to clear a little patch of ground, sow a little wheat and plant some potatoes. It happened one bright moonlight night, when the grass was full grown, that he was aroused out of his sleep by hearing tramping about the house. Thinking it was a black steer that he had which had broken into the grain, he got up, partly dressed and went out. As he thought was the steer down amongst the grain. He picked up a stick, wanting to give him a good "whack" before he got out, there being only a slash fence in those days to protect the crop, and he hurried after him through the grain, the stick raised in the air ready to give him the full weight of it, but as they both got over the fence in quick succession the supposed steer stood up on his hind legs with his back against a tree, and he pursued directly as he was chasing. So he called to his neighbor, he had one then, to come out with a gun, as he had a bear standing up against a tree, and there was a fine chance to put a bear through him. But the neighbor, thinking he was safest where he was, said, "Well, Sandy if you knew Mr. Bruin as well as I do you would leave him alone." He also made the excuse that he could not find the powder or balls for the gun. After trying both coaxing and scolding the neighbor till he was tired he had to give it up. He backed to the fence, keeping his eye on the bear all the time. When he got near enough he threw himself over. Mr. Bruin at the same time letting himself down on all fours, disappeared in the bush.

His First Shot.
His first shot was the product of the first wheat he cut. He threshed some of it by spreading sheets and quilts on the ground, and by tying two sticks together he made a flail with which he knocked the grain off the straw, then he cleaned it by winnowing it in the wind, the way they used to do in olden times. When he had three bushels, then he had to carry it on his back all the way through the bush to Martin's Mills, which, as everybody knows, are between three and four miles away. The grist had to be got home a mile in the same way. When he had his first yield of wheat broken in his neighbor's wife took sick and he was asked to go for a doctor. So he hitched the steers into the jumper, a rig that was used instead of a sleigh, made with his own hands, not a nail in it or iron of any kind about it, and off he started away down to Arthur, just as anyone would do

now with a horse and buggy. On the way he met an acquaintance. When he told his errand the other said: "Well, Sandy, if they knew in the old country that you were going after a doctor with a pair of stirrups, they would have a good laugh."

Fleeing Through the Bush.
Another time he and his neighbor's boy started off with the steers and the jumper, with two grists, one for each family. In going away they were all right, for it was daylight, but in coming home it was dark in the bush and they had a torch with them made out of cedar bark, but they had not proceeded very far when the torch went out and they were left in the dark. What was to be done but plod along the best way they could. Mr. McIntyre went on ahead feeling for the road, while the boy came behind with the steers and their loads, with a rope tied to their horns to guide them. The boy traveled along that way for quite a while, but when they went back to inspect, the jumper was empty, the bags had dropped off one by one till there were none left. That was another predicament. The only thing he could do was to find his way back and try and gather all the bags together again, so after charging the boy to keep the steers' heads straight ahead and not let them turn around, he started on his search for the lost. When he found them all he had to carry them one by one until he got them all on the jumper again, then make another start for home. When they got as far as Thomas Gardner's where Mr. Jerry Burk lives now, Mr. Gardner gave them another torch. They were all right then until they reached Mr. David Wright's mill, where the jumper went to pieces. Then he had to carry all the loads back again to Mr. Gardner's and leave it till the neighbor came after it next day. It was daylight when they got home.

Another time he and the neighbor and his wife were coming home through the bush after dark with the steers and the jumper. The neighbor had a little pig that he was taking home, but the little fellow got out into the bush and he went back after the little porker. They left the woman on the jumper minding the steers, while they themselves took after the little rascal. Every time when they thought they had him he would slip away, and they would get a knock against a tree or tangled in the brush. In the meantime the woman was yelling that she was afraid of the wolves. Still they captured the wayward, declaring there was nothing like persevering to succeed in life.

Sheep Killed by Wolves.
When he had a few sheep one night the wolves killed some of them, and a night or two after, about dawn, the dog made an awful noise barking. His master got up, dressed, took the gun (he had one then) and went out to investigate. The dog went ahead till he came near the place where the sheep were, and they call "Sandy's" hit and run down on the path was what he supposed was a wolf. He raised the gun and took aim. When a man stuck his head out from behind a tree, he let do as he would, and he went forward. Two men had been coming home with a jug of whiskey for a logging bee next day, so the supposed wolf was one of the men stooping over a log, trying to take the cork out so as to get a little drink. They kept them along on their long tramp away up to Proton. Mr. McIntyre put away the gun and never lifted it again, very thankful things turned out as they did.

In closing it might be said that Mr. McIntyre is due a great deal of credit for making the road on the sixth concession, for when it was not passable for either man or beast, he used to make a way through the swamp, in those days they did not stand or sit till the whistle blew before starting, but they would begin as soon as possible after daylight and work till dark, sometimes coming home for their dinner, but taking it with them if there were no children to carry it to them.—Mount Forest Confederate.

Lord and Lady Dundonald.
Lady Dundonald and her children have arrived in London from Canada. Lady Dundonald was Miss Winifred Keshel, only child and heiress of Mr. Robert Keshel, of Gwyrch Castle, near Abertawe. She was born in Wales, and her marriage with Lord Dundonald—then Lord Lochranke—took place in 1878. She is a tall, handsome, dark-haired woman, with a pleasant smile and a statuesque figure. Her time is spent between Gwyrch Castle—now her own property—and a fine residence in Portman Square. Lady Dundonald shows much interest in Welsh industries, and seldom fails to appear at their annual exhibition in London. The marriage of Lady Grizel Hamilton ended, for the moment her duties as a chaperon, but the lovely Lady will probably make her debut in 1905. Lord Dundonald's distinguished career as a soldier is known to all the world, but everyone may not be aware that himself a clever inventor, he comes of a family of discoverers and scientists. The present peer has improved gun-carriages, thought out a means of storing water for troops in the march, and invented a useful article for warming the hands called an instra. And his forbears have had the same tastes and talents. Archibald, the ninth Earl, made many chemical discoveries, and the tenth Earl, like his father, was a distinguished scientist, and invented improvements in engines, boilers, and screw-propellers. The Cochrane are one of the oldest Scotch families, and their gift for mechanics and invention is one rarely to be found among the aristocracy of these islands.—M.A.P.

Care of Young Children.
Care is what it takes in raising young chicks; so don't let them out on wet days and not too early in the morning, as the damp grass is injurious to them.

CORDIAL INVITATION

ADDRESSED TO WORKING GIRLS

Miss Robitaille Tells How Mrs. Pinkham's Advice Helps Working Girls

Girls who work are particularly susceptible to female disorders, especially those who are obliged to stand on their feet from morning until night in stores or factories. Day in and day out the girl toils, and she is often the bread-winner of the family. Whether she is sick or well, whether it rains or shines, she must get to her place of employment, perform the duties exacted of her, smile and be agreeable.

Among this class the symptoms of female diseases are early manifest by weak and aching backs, pain in the limbs and lower part of the stomach. In consequence of frequent wetting of the feet, monthly periods become painful and irregular, and frequently there are faint and dizzy spells, with loss of appetite, until life is a burden. All of these symptoms point to a derangement of the female organism which can be easily and promptly cured by Lydia E. Pinkham's Vegetable Compound.

Miss Alma Robitaille, 78 rue St. Francois, Quebec, tells what this great medicine did for her. She writes: "Overwork and long hours at the office, together with a neglected cold, brought on a very serious female trouble until finally I was unable to go to work. Then I thought of a friend who had taken Lydia E. Pinkham's Vegetable Compound when her health was in the same condition that mine was, and I straightway sent out for a bottle. It took two more bottles before I really began to improve, but after that my recovery was very rapid and I was soon able to go back to work again. I certainly think your medicine for sick women worthy of praise and an added glad to endorse it."

It is to such girls that Mrs. Pinkham holds out a helping hand, and extends a cordial invitation to correspond with her. Her long record of success in treating women's ills makes her letters of advice of unusual value to every ailing working girl, and from her wide experience and skill she quickly points the way to health. Her advice is free, and all letters are held by her in the strictest confidence. Address, Mrs. Pinkham, Lynn, Mass.

Good Bread For Dyspeptics.
Pulled bread is served at several of the best restaurants, and it is not only palatable, but much better for people inclined to be fat or dyspeptic than ordinary bread. When kneading the bread for baking do it in such a way that the grain will be lengthwise of the loaf. When baked and before it is cold remove the crust, cut into quarters, lengthwise of the loaf. Keep dividing it until the bread is of the desired shape; it is usually in long pieces about two inches in circumference. Place the pieces on a rack, put in a pan and dry out the moisture in a slow oven and color a light brown.

THE HAPPINESS OF HOME.
Very largely depends on the mother's disposition. If she is animated and bright, "Whence" is happy; but if she is nervous, irritable and everything goes wrong. Bright, cheery women usually use Perrozene, the great health-maker known. By setting through the blood, Perrozene is able to reach all the organs that need assistance; it establishes regular and healthy action of all functions, builds up the general health, fortifies the system, and conserves energy that defies disease. Put off—Perrozene costs only 50c. at any drug store; set it to-day.

Baglan Castle.
Baglan, near Milcombe, in England, is pre-eminent among English castles, as Heidelberg among those upon the Rhine. Its towers and battlements are richly given by the red sandstone of which they are built. It has a mighty tower that was half destroyed after its last great siege so that it might not trouble the enemy again. For here, after his fatal battle at Naseby, Charles I. found refuge with Lord Beauchamp, and his staunch supporters, although already nearly four score years. Fifty thousand men and \$500,000 he placed at the service of his luckless guest, but in vain. Then came Fairfax, and the last castle faithful to the monarch fell, costing its loyal owner a second sum of equal value and imprisonment.

LISTEN FOR THE BRONCHIAL "WHEEZE."
It means that disease will soon attack the lungs. Wheezing is distressing to the sufferer and annoying to his friends. Nothing half so certain in bronchitis and throat trouble as "Catarrh" cures. It gives instant relief and cures the worst Bronchitis fairly flies under the magic influence of Catarrhose, which cures so thoroughly the disease never returns. Catarrh remedies may be had, but "Catarrh" cures. It cures catarrh, and throat trouble for all time to come. Sold everywhere.

It is always a bad thing to have too much of a good thing.

THE FAST TRAINS.

To California are run over the Union Pacific, via Omaha, 16 hours by the San Francisco than any other line. The change of roads, no detours. "The Overland Route" all the way. Be sure your ticket reads over the Union Pacific. Inquire of H. F. Carter, T. P. A., 14 James Building, Toronto, or F. B. Choate, G. A., 126 Woodward avenue, Detroit.

Minard's Liniment Cures Colds, etc.

DRESS ORNAMENTATION.

Good and Bertha Effects—Shirred Boleros of Lace.

Where a bertha effect is not desired a hood effect is often simulated by means of flat folds of lace lined with bright silk. Panels of oriental embroidery run perpendicularly on skirts and are finished at the ends with fringed trimmings.

A full shirred bolero effect of lace is often used over a tight fitting bodice belt.

Black chiffon velvet makes a delightful evening gown, for it allows of a full gathered skirt owing to its supple, clinging folds, and the waist can be prettily draped and finished off with a deep border of the creamy lace.

It is being enthusiastically revived—the coat of mail jet, but jet em-broideries, jet leaves and jet flowers. Jet dret collars encircle the throat and are set off by fastenings of diamonds, and a wreath of jet leaves worn in the hair is excessively smart.

One of the latest novelties is a black chiffon veil with appliques of velvet

ivy leaves or in an exquisite French blue shade with a bright Dresden stripe and threads of gold on either side, while quite one of the newest styles is composed of plain black taffeta, unrelieved by lace or chiffon, the only adornment being rows of frilled ruchings about four inches apart. The inner side is lined with black.

The cut shows a hat of violet silk trimmed with pale violet ostrich tips.

JUDIC CHOLLET.

LOUIS XVI. EFFECTS.

Pompadour Silks, Ruched Trimmings and Tiny Flower Trimmings.

Evening gowns are becoming more and more elaborate, and many of them show marked Louis XVI. effects. This is shown in the long pointed girdles, the sleeves with wide ruffles and the wide skirts with their festooned ruchings. A very up to date model recent-ly seen in the workshop of a great dressmaker had a shirred and corded waist with a wide pointed girdle and elbow sleeves, plentifully ruched and ruffled. The skirt was gathered in very full all around the waistband, and it was trimmed at the bottom with rows of ruching. The material was a beautiful pompadour silk in a blurred design.

Roses and their buds made of chiffon adorn many a pink chiffon dancing frock, and these pretty trimmings can be bought by the yard and detached. Velvet ribbon threaded through coarse lace is another "fancy" trimming, and so are medallions of lace applied at intervals on flowered ribbon.

Ruchings, however, are far and away

the most popular, and they are particularly handsome made of chiffon or brussels net.

Spangled robes are "in" once more, and these are made up with the addition of lace or chiffon.

The long, voluminous hanging sleeves are a feature of every evening gown. They are often accented, plaited and edged with a tiny ruching.

The hair dressed low, with a big black velvet bow, is an evening style greatly in favor among red haired and blond women.

A most becoming white stock is adorned with violets composed of French knots, the neckband fastened with three tiny buttons, revealing a touch of pale blue, while the stole ends are adorned with chiffon violets.

The picture shows an evening gown of white tulle over white silk, trimmed with a pink sash and tiny pink roses.

JUDIC CHOLLET.

CHIFFON OF WHITE TULLE.

Chung Tea.
In China and some parts of India the finest tea costs only 6 or 8 cents a pound.

The Brain Stone.
One of the most peculiar marine curiosities found at the bottom of the sea is the brain stone, which in many ways resembles the head of a human being, with its many brainlike furrows.

TERRIBLE BACK PAINS.
They fairly agonize your life. Something powerful and penetrating is needed. Doctors know of nothing so swift to relieve as Nervine, a strong, penetrating liniment made to cure just such pains as yours. Nervine is very concentrated, about four times more powerful than ordinary liniments. In the worst cases Polson's Nervine is extraordinarily good. All muscular pain flees before it. Nearly fifty years in use—a good recommendation, surely.

A Half Too Often.
He-Yes, I inherited all my rich uncle's money, thanks to his passion for travel.

She-But what had that to do with it?

He-Everything. He crossed the ocean nineteen and a half times—Women's Home Companion.

"Have by some surgeon, Skyhook on thy charge, to stop his wound lest he do bleed to death." People can bleed to death. The loss of blood weakens the body. It must follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is in large part due to its action on the blood-making glands and the increased supply of pure, rich blood it produces. It is only when the blood is impoverished and impure that disease finds a soil in which to grow. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is enfeebled, the lungs are weak, and there is obstinate cough, "Golden Medical Discovery" puts the body on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health is fully and permanently restored. It has cured thousands who were hopeless and helpless, and who had tried all other means of cure without avail.

Thirty-one one-cent stamps to cover expense of mailing and customs will obtain a copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, in paper cover. Send 50 stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

A woman's influence may be strong but she seldom uses it judiciously.

I was cured of Acute Bronchitis by MINARD'S LINIMENT.

Bay of Islands. I was cured of Chronic Rheumatism by MINARD'S LINIMENT.

Springhill, N. S. I was cured of Chronic Rheumatism by MINARD'S LINIMENT.
