

Mansfield Mains Sir Douglas Haig (Imp. 16163).

Herd sire at Glenhurst. This is one of the latest introductions to the Glenhurst herd. He is young yet, but gives promise of being a worthy successor to other famous sires who have headed this noted herd. Besides being almost faultless in type, he carries some of the very best producing blood of the breed, being particularly strong in the blood of the Bargnock and Garclaugh strains.

Mansfield Mains Miss Findlay (Imp. 43692), dam of Mansfield Mains Sir Douglas Haig.

Here we have about as fine a combination of Scottish show type with the deep full bodied milking appearance as could be found anywhere. She is not only a show animal, but is also a producer, having given 10,500 lbs. of milk testing 3.8% in 32 weeks.

Glenhurst

A satisfactory reputation is the safest guide in the selection of foundation stock. We have it at Glenhurst. Look up our past record.

Ayrshires

In this herd are found Ayrshires that are both show cows and producers. That was the aim when the herd was founded, 40 years ago and that same standard has been maintained and improved upon during the intervening time. We specialize in foundation stock, and if you look up the best herds in America to-day you will be surprised to see how many of the good ones among them have the name of Glenhurst.

What we have done in the past we are still doing and can continue to do in future.

Why not get your next herd sire at Glenhurst, or those young females that you intend to buy. We have some good ones at all ages. Your inspection is invited. Visitors are always welcome, but if you can't come write for prices. Our young stuff carries the blood of such noted sires as Lessnessoc Comet and Glenhurst Torrs Master.

James Benning Importer and Breeder R R. No. 1 **Williamstown, Ont.**

Ship Summerstown Station, G.T.R. Bell Telephone 78-3, Cornwall

Glenhurst Ayrshires at home—a summer scene in Glengarry County. The cow in the foreground is Torrs Cony 3rd (Imp.) who has given 66 lbs. per day testing 4.2% fat. This is one of the grandest dairy cows in Canada, irrespective of breed. There are others in the Glenhurst herd that are almost her equal.
