THE GRAIN GROWERS' GUIDE
Book Department Winnipeg

For the New Barn--or the Old

If you are building the new barn this year or simply fixing over the old one, figure on all the necessary improvements while you are on it. It's easier to equip a barn with labor savers when you are building, but U.G.G. equipment can be used to advantage on either old or new buildings.

U.G.G. Sling Carrier

The illustration shows the main points of the U.G.G. Carrier—the locking device, the strength which means durability, and also shows that the car is reversible and swivel. We can supply complete outfits, consisting of carrier, track, hangers, brackets, slings, pulleys and rope. Tell us the length of your barn and get our prices.

This shows our L. 1413 Carrier on double T. track.

Barn Gable Door Hangers and Tracks

Especially designed to meet the demand for easily operated doors. Particularly good where sling carriers are used. Each door is counter-balanced by weights. See catalog page 115. Give us size and get prices.

Sheet Metal Roofing and Siding -- Eave-troughing and Supplies

We can supply you with everything in sheet metal. Our stock includes metal roofing, siding in several patterns, ridge roll, hip covering, eave starters, end flashing, nails, washers, ventilators, eave-troughing, end caps, mitres, hangers, conductor pipe, centre drops, elbows, funnels, wire strainers, etc. We can submit a reasonable estimate on this work.

Steel Stalls

The cow stall shown is manufactured from 1½ inch tubing, Japan finished. Complete single stall includes one steel stanchion with top clamp and cement clevis, one post, one double curved partition with stanchion rest and sufficient head rail. F.o.b. Winnipeg, \$7.50.

No matter what repair work you have around your farm, no matter what new buildings you are putting up, U.G.G. can help you get the most value for your money. Use this builders' supply department all you can because it can supply you everything you need for a building from lumber to nails. **WRITE US TO-NIGHT.**
