Warned Against Siberia

Moscow, March 26.—(By the Associated Press)—The commissioner for agriculture has sent out a warning to all councils of workers and soldiers' delegates against emigration to Siberia, which is increasing to a noticeable extent among peasants and also workmen who have been deprived of their livelihood by the closing of mills and factories. The commissioner says there is little good land in Siberia, which is available for immediate colonization, and it is very difficult under present conditions to carry out the necessary work of organization. He suggests that the peasants first take the land owners' estates.

The colonization policy of the former imperial government, the commissioner says, was meant to divert the attention of the peasants from the land problem at home, and caused the ruin of thousands who settled in marshes or arid tracts.

Tensions At Work

Moscow, March 25.—(By the Associated Press)—Prince Henry of Prussia, brother of the German emperor, and one of his sons, have arrived at Riga, Estonia. They were created nobility by the German government, but the Estonians refused to participate in the reception. The visit is attributed to a desire to create pro-German feeling in the Baltic provinces.

The Germans are busy collecting bread stuffs from the Tskov district northeast of Dvinsk. At Percher-skaya, near Pskov, forty members of the German detachments requisitioning bread were killed by the peasants. Bridges were destroyed by the peasants, who also harassed the Germans by carrying away the bread and destroying carts and wagons. The Germans tricked many of the peasants into Pskov by announcing they had an abundance of bread and sugar which would be sold cheaply. The Germans seized the carts and horses of the peasants, but sold no food.

A Bolshevik supreme war council has been formed to take charge of army organization. Leon Trotsky has been appointed chairman of the council. Agents are being sent from Moscow into all the provinces to organize the peasants to supplement the efforts of the city workmen in opposing the Germans. Volunteers will be called for, after which local committees will prepare lists of men refusing to volunteer and will post them publicly. To all citizens will be denied the right to participate in public affairs.
