OUR YOUTHFUL HOPES

William Dean Howells, the novelist, says the New York Sun, was being con-gratulated on the fine new addition of his works that is beginning to appear. "You should be very happy, sir," said the reporter, "over the success of your likerary career." "Hut Mr. Howells, shaking his head, re-toined:

ONE THING HORSES CAN'T DO.

"It's a funny thing," said the old ani-nal trainer, "but you can't train a morse to walk on his forefeet, because mal trainer. he ain't built that way. Take the dog or cat animals and they'll not only walk on their forefeet, but they will go up and down stairs with their hind legs in the air. It's a little harder to teach than walking on the hind feet, but it is mercly a matter of patience and know-ing how, but get a horse off his hind legs and you have a lame horse. Dozens trainers have spoiled from one to horses apiece trying for the trick, buidthe nearest any one ever came to it was an English trainer, who had a jackas that could stay up for a little while but even the Jack was strained and soon had to be destroyed. Horses takes, into upstairs theatres will go up the steps as agile as cats, but when they come down they have to be backed That's one reason why horse used in hill work break down so quickly. It's not the long hard pull uphill; it's the helding back going down." -New York Sun.

Headaches Over the Eyes women suffragettes have reason to rejoice at the victory gained by them in California last week. It is a step nearer the goal they are striving tor, and, whether right or wrong, is bound to have an influence in their favor. Another outstanding fact of last week in this connection was the appear-ance of women delegates at the Metho-dist Ecumenical Conference in Torontodist Ecumenical Conference, in Toronto. Given a seat and a voice in this world's Parliament of Methodism, it will be hard

to frame excuses for keeping them out of the Annual Conferences or the Quarterly Board. Not only that, but it gave terly Board. Not only that, but it gave these delegates an opportunity to ap-peal to the reverend fathers and breth-ren on behalf of women in general. Some of these appeals were not only pathetic in the extreme, but bristled with argu-ments in favor of women having the suffrage that have yet to be met. The statement that "the hand that rocks the crafte rules the world," and by im-

the cradle rules the world," and by implication does not need a vote, was met by the query, what about the millions of women who have no cradle to rock, and what about those who have done rocking the cradle. The other stock argument that women should not have a yote because they cannot fight, was met by the statement that the time was coming when the world would emerge from the barbarism of war, but that in the meantime woman did her share in the field of battle under the red cross. They might have gone further and ask

They might have gone further, and ask-ed what about the millions of men-the aged and infirm, the weakling and the sickly, who are unfit for war, but still possess votes. The many disabilities up possess votes. In e many dissonities un-der which women are legally placed, was a compelling force in making women take up the role of a suffragette, they contended, and they felt it to be a "call of God." It is noteworthy that nome of God." It is noteworthy that none of the mere men delegates ventured to

of the mere men delegates ventured to cross swords with the ladies. That the leaven is working in the Methodist Church is seen by a note in least week's Christian Guardian from Mrs. Deltor, North Bay, in which she

"I intended to say that this year there was a strong feeling against promising any specific amount to the trustees of the church, and that the ladies simply

raise what they could in the radies simply way, but to make no special efforts, not that the Board did not appredate the Ladies' Aid and its splendid work, but because the Official Board had thus far failed to recognize by resolution or

otherwise the right of women to be rep resented in our church courts." These words mean, if they mean any thing, that if argument and appeal will not give them their rights in the church

they will use coercion. No vote, no money will be the ultimatum. Apparent-ly the women are growing tired of collecting money, washing dishes. buying carpets and such like work. They rep-resent perhaps the largest half of the membership, and they want equal rights with the men. And they will get

HAD BAD SORE FOUR YEARS

Mrs. Wilson, 110 Wickson avenue, Toronto, says: "About four years ago a sore spot appeared on the right side of my face. This spot increased in size until it became about half an inch in diameter and very painful. I went to data doctor, but the ointment he gave me did not have any good effect. The sore continued to discharge freely and was most painful. I had it cauterized, tried poultices and all kinds of salves. but it was no good, and I continued to suffer from it for four years! PULPIT AND PRESS. (Churt: Life.) The secular press is coming to its own and none too soon. Only this week we heard from a very prominent member of the Woman's Auxiliary of the exceeding kindness of the Winnipeg press in print-ing reports of the Triennial meeting, of their accuracy and of the courtesy of the reporters who procured them. And the lady evidently was volcing the feelings of sister workers. Then a few weeks ago a brave cleric wot up in General Synod and championed lite daily papers which had been peviled because in the stress of a pre-election campaign and in the demad for the fall fair saws the newspapers had at times "belied down" synod reports till nothing remained but the facts. This man had courage enough to say that the clergy did not own the papers, that editors were at perfect ilberty to publish just as much much or as little as they pleased, and that he considered that the church and all good works had occasion to be very printerful to the daily newspaper and its editor. This is such good talk that we'd like a THE FISH-AND-TUB PROBLEM.

THOSE WHO FALL.

(Ottawa Journal.)

(Ottawa Journal.) Those who folow the daily police court cases in Ottawa and elsewhere are often impressed with the fact that appears so obvious in this case, namely how often a very small sum of money would be suf-ficient to free some individual from the tolls into which his own forbishness or weakness has placed him, and give him a new chance in life. In many cases a court appearance is sufficient to put up sharp some man who hitherto has been saling close to the law, and turning him fact-about to honesity and decent clitzen-shin. This does not apply to the habitual criminal: it does to the man who has hitherto been respectable, and is arrested for the first time. Police officials, few of which are wealthy, have to steel their hearts to appeals of this kind: besides, in their case, after a time custom more or less blunts the appeal.
