

Chicago Stock Co.

The Chicago Stock Co., under the efficient management of Chas. H. Ross Kam, and which by its unequalled success in all the larger cities of the Provinces has established itself as the leading and emphatically the best travelling stock organization in existence to-day, will open its initial engagement in this city at the T. A. Hall on Thursday evening next. That the company is all that is claimed for it is proven by the following notice

which recently appeared in the Portland (Maine) press, following the opening performance of the company in that city: "The Chicago Stock Co. opened here last night before an enthusiastic audience, and as the curtain went down on the last act had succeeded in establishing themselves as one of the best road attractions ever appearing for a road engagement at the Efferson Theatre. The play chosen for the first performance was Grace George's former New York success "Clothes," from the pen of Avery Haywood and Channing Pol-

lock, giving them an excellent vehicle for their first bow for public favor; but it was also a play which, if they had not had a wealth of stasings, would have appeared at a disadvantage. However, they produced this elaborate dramatic offering, and to the observer it was hard to believe it was a popular priced offering, for no more beautiful stage pictures have been produced with the two dollar attractions appearing here, while the gowns upon which the plot of the play rests were an instant hit with the feminine part of the audience. Miss Clara

Eelle Præ, who appears in the leading role, won many admirers, while Norbert E. Dorente, the leading man, drew a well defined character in the role of Richard Burbank, a typical man of the world. The supporting cast were all well suited to their respective parts, and if the remaining plays, they are giving a different one at every performance, are as well produced as was "Clothes," before the week is over seats will be at a premium." Seats are now selling at the Atlantic Bookstore.

Sports of the C. C. C.

The committee in charge of the C. C. C. sports held a meeting last evening to arrange the drawing in the football contests. The preliminaries will take place next Monday evening. The Brigade and College teams will be governed by the rules of their respective branches. The entries from the various clubs show that there will be keen competition.

Monsignor Reardon Ill.

Rev. Monsignor Reardon of Placentia has been ill for several days past suffering from a severe cold and rheumatism. Yesterday he was much improved and his many friends here will be glad to learn that it will be only a question of a few days when he will be completely recovered.

CITY COUNCIL.

Mayor Gibbs presided at the regular weekly meeting of the City Council held last evening. A full Board was present.

A letter was received from Mr. G. H. Masser, of the Reid Nhd. Co. in reference to the necessity of repairing the road near the Long Bridge where the railway tracks cross there. Council will attend to it.

An enquiry was ordered into the request made by R. A. Squires on behalf of John Walsh, of Portugal Cove Road, who wants to get paid for land alleged to have been taken by the City Council from him when the Reservoir was built out there and the water pipes laid.

Mr. Geo. Best asked for compensation for loss said to be caused by the closing of Thomas Street. He will be informed that the street was closed by Act of Parliament and all claims settled long ago.

The Secretary of the Placentia Water Co. offered \$150 to the Council in full settlement of its claim. Enquiry will be made.

Mr. A. Samuelson sent in a protest against the Council giving the Sundry Tannery people permission to divert the water of Dillon's Brook, as he, Mr. S., had built a structure in the vicinity of the stream with a view to being able to use the water. Two Councilors will visit the locus in question.

C. E. Hunt sent a letter on behalf of James Thomas, Freshwater Road, asking that he be allowed to proceed with the erection of his house which had recently been forbidden by the City Engineer. The Council will send three of their members there to see the place.

H. W. LeMessurier complained that milk men and others coming to town drive their vehicles on the sidewalk at King's Bridge Road. He also asked that the place be cleaned up. The Council referred him to the police.

Mr. J. R. Johnson asked for street line to erect three houses on New Gower Street, and permission to remove old ones there. He will be asked to send in plans giving fuller particulars.

J. Harding, of Coronation St. asked leave to build a shed in his back yard for a carriage house. Referred to the Engineer.

Geo. Williams asked that he be allowed to build a wood shed in his yard. He will be allowed to do so.

J. A. Clift, acting for Thomas Lawlor, cabman, asked permission to build a stable off Fleming St. Referred to the Health Officer for enquiry.

The Road Committee will consider the application of James Moakler who wants to erect a house on Simms Street where a stable now stands.

T. J. Martin, King's Bridge Road, will be given permission to repair his house when the Engineer visits the place.

The solicitor forwarded a letter from McNelly & McNelly asking that the water rates paid for Dunluce Cottage, Portugal Cove Road, be refunded.

The Council will let the case go to the court.

The solicitor says that the Horwood Lumber Co. can be held responsible for any damage that they shall cause by obstructing the sewer running through their field. They will be written to accordingly.

The solicitor also reported that the Council had power to refuse to allow Mr. Thompson to divert Dillon's Brook.

The Engineer's report was submitted, also that of the Health Officer which showed that there were 12 cases of diphtheria in the hospital, and ten of scarlet fever being treated.

E. Langmead, in the opinion of the Health Officer, should be given permission to erect a stable on his premises with a concrete floor and proper sewerage.

The renewal of the negotiations between the Commercial Cable Co. and the City Council came to nothing. The company want to open up the streets of the city to lay their wires without paying anything for the privilege. This the Council refused to do.

After passing the pay rolls the meeting adjourned.

Cochrane St. Church.

Miss Sweetman will deliver an address on the Work of the Deaconess Board at the regular service in Cochrane St. Church to-morrow evening. Miss Beard will also speak of her own work in connection with the Cochrane St. congregation. A hearty invitation is extended to all. The offering for the support of Deaconesses will be taken up in envelopes the following Sunday.

THEY WALKED HOME.—During the week six men belonging to Shearstown walked home from the new branch railroad, coming along over the railway track. They covered 149 miles and were pretty well used up on reaching their destination.

Children Had Eczema

Treatment prescribed had no effect—DR. CHASE'S OINTMENT made thorough cure.

Mrs. Oscar Vanscott, St. Antoine, Sack, writes: "I have found Dr. Chase's Ointment to be a permanent cure for Eczema and other skin diseases. One son, while nursing, broke out with running watery sores all over his head and around the ears. Many salves were prescribed to no effect. The child's head became a mass of scabs and he suffered agony untold. He became weak and frail and would not eat and we thought we would lose him."

"Providentially we heard of Dr. Chase's Ointment and it soon thoroughly cured him. He is seven years old now and strong and well. An older boy was also cured of eczema by this Ointment and we hope more people will learn about it so that their little ones may be saved from suffering."

As a cure for eczema and itching skin disease there is no treatment to be compared to Dr. A. W. Chase's Ointment, 60 cents a box, at all Dealers of Edmonstone, Bates & Co., Toronto. Dr. Chase's Recipes sent free.

Notes From Harbor Grace.

A daughter was born to Mr. and Mrs. Michael Connolly yesterday.

Miss Nellie Rogers arrived from Montreal by Monday's express on a visit to her parents, Mr. and Mrs. Edmund Rogers.

Miss Lizzie Kennedy leaves by the express on Thursday next for Boston.

Miss Alice Ryan, daughter of Sergt. John Ryan, of Trinity, has accepted a position as book-keeper with Mr. Harris, of Grand Bank. Miss Fanny, another daughter of Sergt. Ryan, expects to take a similar position with Mr. Lake, also of Grand Bank. Both these young ladies are natives of H. Grace, and we wish them much success.

A daughter was born to Mr. and Mrs. Frank Keefe yesterday.

The Shoe Factory whistles sounding at 7 and 10 o'clock each night is indeed a healthy sign. With all the rushing, orders are pouring in, and it seems as if a busy season was before them.

Some fishermen succeeded in catching a quantity of caplin yesterday. They sold readily at 20 cents per bucket.

Professor Anderson and party arrived by train yesterday, and will entertain all who attend at St. Paul's Hall to-night.

A vaudeville company entertained a fair audience at St. Patrick's Hall last night. The hand bills said "children for 10 cents." A fine chance for some of our townpeople who are minus that valuable addition to the home circle.

The S. S. Euphrates arrived from Bell Isle on Tuesday evening, with a number of gentlemen, who came to attend the meeting of the Knights of Columbus. She left again early in the morning for the island.

An item in your paper on Thursday says that Messrs. McEae's Procyon left here for Labrador with the firm's Grady crew. This is not correct. The Procyon is owned by Munn & Co., and took their dealer's and crews to Shoal Bay and Snug Harbor. The S. S. Ingraham took down the Grady crews of the Messrs. McEae. May they all secure good fares and good prices.

CORRESPONDENT.

Hr. Grace, June 3, 1910.

COLDS LEAD TO CATARRH.

In this changing climate repeated colds drift into Catarrh. This tendency of Catarrh is to extend through the system, and nasal Catarrh is not the only result. Unless a complete cure is effected, the inflammation passes rapidly into the throat, bronchial tubes, and then to the lungs. You cannot make new lungs any more than you can make new fingers, but Catarrh can be cured. Catarrh sufferers, meaning those with colds, sore throat, bronchial trouble, can be relieved by inhaling Catarrhozone. In using Catarrhozone you do not take medicine into the stomach. You just breathe a healing piney vapor direct into the lungs and air passages. Healing balsams and germ-killers are sent to every spot where catarrhal inflammation exists—germs are killed, foul secretions are destroyed, nature is aided, and the disease is quickly expelled. Colds and throat troubles cannot last if healing vapor of Catarrhozone is breathed. Use Catarrhozone to remove your winter ills. It is pleasant, safe, and guaranteed in every case. Price \$1.00; trial size, 25c.

Astray in the Fog.

Tuesday forenoon Messrs. Henry Boone and S. Morris, of this city, went out to seek some codfish, but got astray in the fog for quite awhile. After making Small Point they rowed for quite awhile and eventually found themselves off the "Spout" up in Freshwater Bay. They did not expect to get fish here but had a try out of curiosity and were surprised at the result. They jigged 5 cwt. of fine fish and sold them in Steer's Cove next morning realizing \$6.80 each.

Mr. Lindberg Dead.

The death occurred this morning of Mr. John Lindberg, in his 68th year. Mr. Lindberg, who for years was a prominent figure in commercial and social circles in St. John's, carried on a prosperous business in the jewellery business and was the proprietor of the Lindberg Brewery, another successful business concern. Mr. John Lindberg, Jr., is a son of the deceased, and to him the Telegram extends its sympathy.

CRICKET MATCH.—The cricket match between the Feldian and St. Bonaventure teams was finished at St. George's Field this afternoon.

Saturday's Cut Prices.

- 30c. lb. French Coffee for 25c.
- 35c. bots. Gillard's Relish for 30c.

Empire Day. The Slattery Memorial

Editor Evening Telegram. Dear Mr. Editor.—Yesterday (Empire Day) was kept as a holiday, especially by the school children. They (the children) met in the school at 10 a.m. when a patriotic programme was enthusiastically carried out. Cheers were then given for the Empire, King, Newfoundland, etc. The children evidently were proud (and who is not?) of having the privilege and honour of being members of such a glorious Empire. Great praise is due Lord Meath for instituting the Empire Movement, as we believe much good has resulted therefrom. It is to be hoped that the parents will, in future, take a keener interest in the matter and join with the children in celebrating Empire Day. J. G. HODDER, Heart's Delight, May 25th, 1910.

We class these all together, because they are all substitutes for Ruberoid. Ruberoid was the first ready roofing, in 1892. The date of registration of our trade mark proves that. To-day there are 300 substitutes. 150 of them have names ending in "oid" or names similar to Ruberoid. These names are used simply to make you think they are like Ruberoid. Some of these substitutes are surfaced with sand, quartz, mica—some surfaced with road dust. This surfacing is put there, not to improve the roofing, but merely for its effect on you—and to add needless weight.

MERELY A "TALKING POINT"

It is a "talking point," to lead you, the purchaser, to believe that these products are different from or better than they really are. For the sand, quartz, mica, dirt, washes off in a few rains. It adds no durability, no strength, no flexibility, no wearing quality, no value, adds nothing but weight, for which you will pay without an equivalent. And the makers of some of these coated roofings, having found that the coating washes off and chokes gutters and drain pipes, have printed in their directions that the roofing is to be laid sanded side down. They cannot leave out the sand, for they have advertised it as a superiority. You can judge the value of this sand coating, when the sanded side is down.

NO "COATED" RUBEROID

We have been asked many times to make a "coated" Ruberoid. To have done so would have been merely to increase weight without increasing value. That is why Ruberoid is to be had only in smooth surfaces.

And if knowing what you do, you still want a sanded roofing, we will tell you how you can sand a roof of Ruberoid after it is laid, at a trifling cost.

Many substitute roofings claim rubber. They are known as rubber roofings.

There is no rubber in Ruberoid. And the roofing which is labeled "rubber" is either a fraud, in pretending to be what it is not—or it is roofing so poor as to be valueless.

Your difficulty in judging substitute roofings is that they are made to look like Ruberoid. It is not alone your difficulty. It is your danger. For the hidden weakness in a roofing can often be determined only by actual test.

That you may see the common faults which substitute roofings develop, we will give on Monday the results of ten of our Roof Garden Tests.

The ROYAL STORES, Ltd.,
Are Sole Agents in Newfoundland for Ruberoid Roofing.
