BUSINESS BLOCK ON WATER ST. flend. Here was stored big stored by s LINS', LAWRENCE & CO'S, AND T. CURRAN'S BUSINESS PREM-ISES COMPLETEELY GUTTED AND CONTENTS DESTROYED HEAVY LOSSES.

At 6.35 yesterday evening a de structive fire broke out in Mr. P. F. Collins' dry goods store on Water St. just west of Adelaide Street, and by 11 o'clock the premises of P. F. Collins, Lawrence Nfld. Co. and Mr. T. Curran, blacksmith, on Holdsworth Street, were completelly gutted and all the contents destroyed, either by

the contents destroyed, either by fire, water or smoke. Mr. Simon Kesner was the first to notice the existence of the fire at Collins', and saw it in the centre shop of the three departments as he passed that way, while Cohsts. Lawlor and O'Neill, who were on their beats, saw the reflection of the blaze through the windows and were quickly on the scene. Lawlor were quickly on the scene. Lawlor telephoned the sub-station and soon the electric current was turned off. as it would be a danger to firemen and citizens collected at the scene; the street cars were stopped running. and an alarm of fire was turned in from box 31 at the foot of Adelaide Street. On Mr. Collins' premises. premises. which was filled with dry goods and the most inflammable of material, the fire soon gained great headway, and when the Western and Central fire-men arrived they had their work cut out for them. Ladders were thrown up to the windows, and in a short while no less than six streams of water were playing on the burning fabric. There was a strong breeze blowing and the flames in a short while burst through the windows and shot through the roof far into the air, brilliantly illuminating the surroundings. Thousands of people, supplemented by the crowds of sealers in the city, thronged Water Street, Holdsworth, Adelaide, George's and New Gower Streets, and the spectacle kept most of them on the scene till past 10 o'clock. The firemen were very promptly on the scene, considering the condition of the streets, and inspector General Sullivan. Sunt-Dunn and Chiefs Kane, Winsor and Trebble guided the fire-fighters in an admirable way. From the start the firemen had plenty of water at their command, there being 70 lbs. pressure at the hydrants. When the fire was about half an hour in progress a general alarm was sent in and the Feeters, firemen arrived quickly to

## a general airm was sent and the Eastern firemen arrived quickly to help the two divisions already there. In a very short space of time the Collins building was completely enveloped in flame and the fire had ate its IT WAS STONE IN THE BLADDER

"Five years ago, I was taken down with what the doctors called annual mation of the Bladder—intense pains in the back and loins, and difficulty in urinating, and the attacks, which became more frequent, amounted to unbe trable agony. I became so weak that I could not walk across the floor.

My wife read in the papers about GIN PILLS and sent for a box. From the very first, I felt that GIN PILLS were doing me good. The pain was

GIN PILLS PASSED IT

were doing me good. The pain was relieved at once, and the attacks were relieved at once, and the attacks were less frequent.

In six weeks, the Stone in the Bladder came away. When I recall how I suffered and how now I am healthy and able to work, I cannot express myself strongly enough when I speak of what GIN PILLS have done for me". JOHN HERMAN, Hamilton, Ont. Regular size, 50c. a box, 6 for \$2.50—at all dealers. You can try them free by writing for a free sample to National Pure & Chemical Co. of Canada, L.m.ted, Lept. N. Toronto.

way west to the Lawrence Nfld. Co's. premises, which, despite the flood of water being poured into the burning buildings both front and rear, was also soon in the grasp of the fire fiend. Here was stored big stocks of

samples, &c., and the destroying ele-ment had planty of material on which to feed. Next the fire burned through to Mr. T. Curran's blacksmith's pre-mises, and this too was soon envelop-ed in flames. The firemen, reserves and citizens who generously helped, worked inside the buildings as well as on the outside, and though all, from the Inspector General down to the humblest reservist, were saturated the Inspector General down to the humblest reservist, were saturated with water, not a man flinched or deserted his post until the "all-out" signal was sent in at 11.30. In the three buildings the men, who early in the fight against the flames forced their way through with lines of hose, found large quantities of goods and all that they could save, was thrown out

they could save was thrown out through the windows. Very little came in this way from Collins', but from Lawrence's and Curran's considerable goods were thrown into the sidewalks. Mr. Curran had \$600 worth of hay stored in the second flat and most of this was saved, being chucked out through the windows. On the Adelaide Street side the fire entered through S. Zavillot's ladies' tailoring department and did considerable damage also. Further up on Adel-

ture went about. One was that a girl assistant at Collins' was burned to death in the building; another that Supt. Dunn fell through the flats in the building and was seriously hurt. and a third that Sergt. Reardon had fallen through the floors in the Colfallen through the floors in the Collins' building with a reserve men and that both had been killed. As a matter of fact Capt. Kean of the Western Station with Messrs. Whitten, Moore, Connolly and O'Neill were working at the rear on the roof of an annex when it collapsed and all were precipitated to the cellar below, which was filled with smoke and firme. The men were quickly rescued but were songs and reels will be into the collapsed and firme. men were quickly rescued but were half suffocated with smoke, especially Capt. Kane, who was several minutes before he revived. Supt. Grimes and a large squad of police kept the crowds away from the buildings, en-

and a large squard of pointer kept the crowds away from the buildings, enabling the firemen to work freely. The firemen worked well and the praises of onlookers were deservedly bestowed on them. How the fire originated was a mystery. When Mr. Collins closed his store (personally) at 6.25 p.m. there was no fire in the premises. He always saw himself that the fires were quenched, and this he did yesterday before leaving. It is possible that a little fire was left in the stove in the central department and that a coal dropped out, or that some male customer who was late in the store threw a match carelessly inside and caused the fire. Mr. Collins carried a stock valued at about \$20,000, on which he has \$14,000 insurance. Saturday's and yesterday's cash sales are in his safe, but he could not say last night if his work of the same of the Nickel Theatre, which is undoubtedly the largest shipment of its kind that ever came to this Colony. There are, in all, about 36 reeks, or about 43,000 feet of film—six of these are brand new Vita-graph productions, personally selective by Mr. Kiely during his recent visit to New York; and these should make attractive Nickel features in the near future.

As a Gure for Whooping Cough

but he could not say last night if his books were stowed away. He had in his employ 23 assistants.

Mr. R. Aitken locked up the Law-rence Co's. premises at 6.15. Mr. Lindsay, the manager, informed the Telegram last night that he had secured the books, which were in the safe, and all the latest correspond-ence. They had a 30 years' leasehold

### A \$44,000 Sheep Pasture.

Mr. Gear, member for Burin, asked very pertinent question in the House f Assembly yesterday. In answer to question of his on March 7th, he ound \$44,000 (Forty-four Thousand collars) had been spent in Burin Dis-rict last year on Main Roads and

mberland and Derbyshire are still determined to give up for nothing less than a minimum wage. Meanwhile the industrial upheaval has grown roads. He got no encouragement from the Government that this would be done. The newly elected member for the District sat silent. The inference is, the grant of forty-four thousand dollars was meant as a sop to the electorate. The roads are to be permitted to fall into disuse as highways, but in pursuance of his farming policy Sir Edward is to allow the newlymade roads to become verdant with two-blade grass, on which thousands of sheep are to graze, and you know sheep are for Edward's especial delight. This is rather an expensive way of providing a sheep pasture, but hang the expense, seems to be the motto of the Picnic Party. The \$1,000 asked for by Mr. Gear would finance a fair-sized picnic. Fancy, ye fishermen, what delightful picnics those long lanes of green pasture may witness next summer, while you are out on the stormy sea, risking life and limb, to earn the money which is so recklessly used by the most extravagant crew that ever held power in this country.

The minkin. The miner still determined to give up for nothing less than a minimum wage. Meanwhile the industrial upheaval has grown from bad to worse. The leading rail-roads are further reducing their service this week. Trains in the rural district of Northumberland and Cumberland have ceased running. Rail-roads from east, west and north-east are almost two per almost two working the staffs have been suspended, and the other half are only working three days a week. In Mold district families are almost roads from east, west and north-east are almost working the rural fisher. The independent of Northumberland and Cumberland have ceased running. Rail-roads from east, west and north-east are almost two per almost stopped. Half the staffs have been suspended and the other half are only wor spent because an election was to take place there in the Fall. If it was not

### Found Dead on the Track.

At 7 o'clock last evening a section man named Garnier arrived at Horwood's from Cook's Brook, and reported that he had found the dead body of a man about 2 miles west of the camp and lying in the centre of the railway track. The body when he found it was partly covered with snow, and Garnier who is a section man said he identified it as the body of an Asyrian named Basha. The Reid Nfld. Co. enquired along the line and found that two men on Sunday, and found that two men on Sunday, named Pennel and Neema, the latter an Asyrian watchmaker, left the stall-ed train to walk to Birchy Cove. He and Pennell walked along together as far as Burton's Grade where they sep-arated. Neema told Pennell to go on and he would follow. Pennell arrived at Birchy Cove all right, but Neema it is believed died of exposure on the road in Sunday night's storm and it is believed that it was his body that the section man erroneously identified

### The Coal Strike Situation.

LONDON, March 11.

The beginning of the new week sees the coal strike no nearer settlement; but optimists expect much from this week's conferences. There ment; but optimists expect much from this week's conferences. There is an overwhelming opinion that the South Wales strike will continue another month. The miners of Northumberland and Derbyshire are still determined to give up for nothing less than a minimum wage. Meanwhile the industrial upheaval has grown from bad to worse. The leading railroads are further reducing their service this week. Trains in the rural district of Northumberland and Cumberland have ceased running. Railroads from east, west and north-east are almost stopped. Half the staffs have been suspended, and the other half are only working three days a week. In Mold district families are starving and looting is in order. Stealing of tame pigeons and rabbits and raids on potato pits are common. London storekeepers have further increased the price of bread, butter and all food stuffs. A mass meeting of railway men, arranged to take place to day in Trafalear Source was ston-LONDON, March 12.

The Miners' Federation unanimously decided last night to accept Premier Asquith's invitation to meet the coal owners and representatives of the Government at a round table con ference, at which the Premier will preside. It is understood this means that the granting of a minimum wage will not be assumed as conceded; but does not imply that the schedule of minimum wage rates, as drawn up by the Miners' Federation, will not discussed. The coal owners have yet accepted the Premier's invitation, but will meet this morning to decide. Even if the Welsh and Scotch own-ers stand aloof, it is taken for granted that the English owners will accept the invitation and attend the confer-ence to be held this afternoon. The miners' representatives are not au-thorized to agree to any reduction in the scale or rates, or to any scheme determining rates without a new bal-lot of the miners. Therefore a settlement of the strike at the conference can only be attained if the owners agree to accept the miners' schedule, which is improbable. It is practical-ly determined that the strike must be ended by agreement; or immediate legislation will be invoked to bring about compulsory peace. Thursday is expected to see parliamentary action inless extremists on both sides relax sufficiently in the meantime to enable

LONDON, March 11. duced in the Commons April 9th of Asquith made this promise to commons this afternoon. This the date previously contemplated by the Government to introduce the Bill. The Government have always thought that the Bill, considering its magni tude by far the most important to be brought in this session, ought to be introduced under conditions which

afterwards swept away by storms. On the whole, however, he considers it Scott is successful also.

will secure adequate parliamentary

NEW YORK, March 11. Another message from London to the Tribune says that Shackleton is surprised that Amundsen should re-port calm weather at the Pole. This s quite different from what he ex-perienced. Shackleton still thinks, however, that it is possible the Brit ish expedition reached the goal be-fore the Norwgeian.

PARIS. March 11. About two-thirds of the coal miners of France have responded to the appeal of the Miners' Federation to strike for twenty-four hours. This action is not directed against mine owners, but is designed to show the Government the solidity of the miners and the dissatisfaction of present

NEW, YORK, March 11. A world-wide strike of coal miners is regarded by the coal trade in this country as more than likely, if nego-tiations now in progress between the anthracite and bituminous workers and their employers do not result in settlement as to working conditions
