active at the local live stock market this morning, and all the cattle were disposed Some of the larger dealers were not present on account of the inclement weather, and the prospects for a light day, but a steady demand, were evident all departments for choice cattle. Rough cattle, however, were not required and proved a drag on the market. The best butcher cattle brought in the neigh-borhood of \$5.75 to \$6 per cwt. Medium stock sold at \$5.50 per cwt, and common at \$4.25 to \$5. Choice milkers sold at \$15.50 per cwt, and common at \$4.25 to \$5. and common to medium ones at \$30 to \$40. Springers were scarce at \$40. to \$50, a slight advance over yesterday's levels. Sheep, lambs and calves were steady and unchanged in price, although the market was just perceptibly weaker, owing, possibly, to the large run. Lambs sold in the neighborhood of \$6 per cwt, to which price they declined on Monday, but in a few instances \$6.20 was obtained Prices in today for extra choice stock. the export department fluctuated somewhat when the market opened, receding about 25c per cwt all round. They rallied, however, and closed strong at yesterday's levels. The receipts were 129 cars, containing 1450 cattle, 3560 sheep and lambs.

C. D. Sheldon-Investor

His Plan of Investment---Profits That Have Been Made---Opportunities for Investment

Without sensational advertising, and without any unusual or extraordinary method, C. D. Sheldon, of Montreal, has created a business involving an investment of over one million dollars a month for over 3,000 clients.

Mr. Sheldon's methods and successes have created such great interest throughout Canada, that they have invited criticism, and naturally excite both interest and curiosity.

The whole facts of Mr. Sheldon's business are embodied in the following interview with the writer of this article:

"Mr. Sheldon, you have made phenomenal profits for your clients during the past two years. Can you

give me an idea what these have amounted to?" "The lowest profit made in any one month was 20 per cent, but the average has been between 30 per cent and 50 per cent. I made individual investments, but the increasing volume of business with the infinite detail made it necessary to change the system, so that the money now forms a common fund, and all investors receive the same percentage of profits"

"When you declare 20, 30 or 40 per cent a month, if the profits are not taken out, do they become part of the principal, and begin earning with the original capital?"

"All profits not taken out are added to capital and immediately become active."

"Mr. Sheldon, you are aware that you are accused of making extravagant promises. What promises do you make? What do you authorize your agents

"I make no promises and the only authorization my agents have is to state facts as they are-to outline my plan of operation, and to say that I shall do all I can to produce results in the future as satisfactory as they have been in the past. I do not guarantee any fixed percentage of profit."

"It has been suggested that the only way in which such large profits can be paid is by applying later deposits to pay dividends on previous investments. What answer do you give this 'robbing Peter to pay Paul' theory?"

"As I have during the past two years paid out in cash as profits over three times as much as I have received from my clients, this theory at once falls to the ground."

"Do you guarantee against loss?"

"I do to the fullest possible extent. I protect all my investments, and never ask my clients to put up for margin, nor are my clients' investments 'wiped out' by an unexpected decline in stocks."

Address all communications to-

"What provision do you make for the inevitable but unexpected shrinkage? In declaring your monthly profits, do you create a reserve fund of are the total earnings allotted as profits?"

"'Profits with safety' is the central idea of my operations, so that I make ample provision to avoid being caught napping."

"You know your methods have been spoken of as 'stock gambling'? To what extent is it a gamble, and to what extent a speculation only?"

"If I did not know the earning, the commercial value, of the stocks in which I invest, if I did not study the conditions that affect the stock markets, and invested my clients' money indiscriminately, it would be a gamble pure and simple. As it is, I study the conditions that affect each individual stock just as real estate brokers study the real estate market and invest accordingly."

"Do you never make mistakes-doesn't the stock

go the opposite way at times?" "If my judgment was not right in the great majority of cases, I would not be making the money I do, but I may say that whenever and wherever I invest. I provide for a possible mistake!

"Are your books open for the inspection of your

"Yes, we will show any interested parties our daily transactions, and also give the fullest possible information, showing our investments, our profits and the application of these profits."

"What amounts do you receive for investment?" "Two hundred and fifty dollars is the least amount now accept, and shortly I intend increasing that to

\$500, and probably syndicate the business, confining my operations to large investors, and limit the number of my clients. In the meantime, though, I shall continue receiving amounts of \$250 or over." "What stocks do you buy and what are the

present prospects?" "I buy only Railway and Industrial Stocks, with

good earning power. I do not deal in Mining or uncertain Stocks, and among Canadian Stocks I only buy C. P. R. The fall is a good time to invest, as there is unusual activity when times are good."

"When and how may moneys be withdrawn?"

"Investments, with accrued profits, may be withdrawn at any time. Pass books, in which all deposits and withdrawals will be entered, will be supplied customers."
