Summer cooking with comfort

TO need to stew your life out over a coal range during the hot weather. Gas is a much cheaper cooking fuel than coal, and far more convenient in the summer time. Why fatigue yourself and make the house uncomfortable for the whole family when you can save money by cooking with gas. Any "McClary" Gas Range will pay for itself in a very short time by the actual cash it saves, not to say anything about its handiness.

The Model shown in the cut is a handsome Gas Range - "Mc-Clary's" 1912 Modeland considered the biggest range value on the market. You will see at a glance that the convenience and comfort of the housekeeper has been considered by the designers and makers. The Ovens are elevated - just conveniently high-so that there is no "stooping or bending" when cooking with this range.

This Model like other McClary Ranges has the bright black ena-

mel finish-white enamelled broiler and drip pan-Ovens just the right size with proper flue construction. Also Anti-Rust linings and plain smooth nickelled finish.

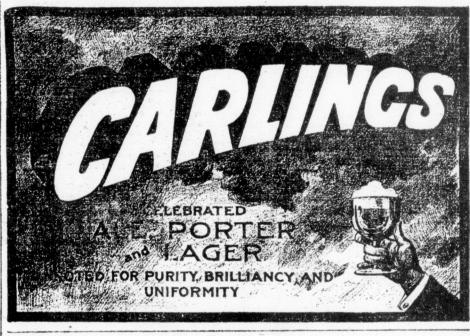

Better see the McClary dealer and ask him to tell you the reasons why you should buy a McClary gas range. He will explain the exclusive features of the range suitable for your kitchen without placing you under any obligation to buy. All we want you to do is to make perfectly certain that the Gas Range you buy will pay for itself very
