SUDDEN PASSING OF J. M. MACKAY, B.A.

(Galt Reporter)
The sad news of the death of J. M. Mackay, B.A. mathematical master at the Collegiate Institute, which occurred shortly after four o'clock Tuesday afternoon, will be received with the greatest regret by all classes of citizens. Deceased had taught his classes as usual Tuesday morning and left the school at noon accompanied by Mr. G. P. Keys and crossed the campus to Water street. As they reached the sidewalk they were about to part to go to their respective homes, when Mr. Keys noticed Mr. McKay drag his leg and gradually sink. Mr. Keys immediately went to his assistance and grabbed him, Mr. McKay remarking "I feel strange," and then collapsed completely. Some school boys were summoned who procured a stretcher and the prostrate man was carried to his home at 38 Samuelson street. By this time he had become unconscious. Principal Gundry immediately summoned medical aid, but in spite of everything possible being done, he passed away shortly after 4 o'clock. The immediate cause of his death was paralysis.

Deceased was born in West Zorra, near Embro, and began teaching in East Nissouri, afterwards in Middlemiss and Dutton. He became principal of the Kincardine High School, from which place he came to the Galt Collegiate Institute four years ago as mathematical master, a position he has filled with the greatest efficiency and satisfaction to the Board. In religion he was a Presbyterian and a member of Knox Church. It was his custom to spend his vacation with his brother William, on the farm in East Nissouri, being a man who was fond of country life and a lover of nature.

He was married eleven years ago to Miss Edith Humphries, of Watford, who survives him; also two children, Florence Isabel, 8 years, and Muriel, 17 months. Three brothers and two sisters also survive—William, of East Nissouri, Archibald of Detroit, Donald of Ottawa, Mrs. John McKenzie in the west and Miss Annie at home.

With every tribute of respect the remains were laid at rest in Kintore cemetery on Thursday afternoon. Many friends were present at the funeral service, which was conducted by Rev. Dr. J. P. Fraser at the family residence, 38 Samuelson street, at noon. Among those present were the members of the Collegiate Institute Board and the teaching staff. A double file of students stood in line from the house to the hearse as the casket was carried out. The following members of the Collegiate Institute teaching staff acted as pallbearers: Messrs. C. S. Heming, R. S. Hamilton, G. P. Keys, P. J. Phelan, J. G. Althous, and Principal A. P. Gundry. The funeral took place by motor, two cars being occupied by students. There was a large attendance of friends at the burial service in Kintore, which was also conducted by Rev. Dr. Fraser.

New Specials at The Rexall Store

for Friday and Saturday

When the war broke out the United States had forty-four men paying income-tax on one million dollars and over. When the fighting ended the United States had three hundred and seventy-six men paying income tax, on one million dollars and over. A similar experience has been that of Canada, Great Britain, France and other countries.

Petrolia lawn bowlers have organized for the summer with the following officers:—Patronesses, Mrs. Eugenia Corey and Miss Kerr; Patron, Mr. Bloss P. Corey; Honorary Pres., K. C. Kerr; Honorary Vice-Pres., R. J. Campbell; President, J. A. Taylor; Vice-President, W. McIntosh; Secretary-Treasurer, C. G. Walker; Chaplin, John W. Marks.

SHORT COURSES IN FOREIGN TRADE

An absence of preparatory work in Canadian schools and colleges for the study of foreign trade service has been brought prominently before the Canadian Trade Commission in its investigations into possibilities for increased Dominion export trade. It is felt that a permanent expansion of our trade abroad must be undertaken if manufacturers are adequately to share in meeting the burden which the great additions to the national debt will impose for many years to come. Extension of home markets will not meet the needs in the same way.

As a first step to bringing before the public the importance of means for the training of younger men to take up foreign trade work, the Trade Commission has written to all the Canadian universities asking if they can give their immediate support by establishing, this summer, short courses for business men and students featuring especially aspects of foreign trade.

It is believed this matter will be enthusiastically taken up by younger men and women anxious to secure an opening in life which will apparently not be overcrowded and which will develop in importance as trade of the Dominion increases. There appears to be a decided quickening of opinion in Canada as in Great Britain and all the British overseas dominions in the study of modern languages for the securing not merely of the trade which formerly fell to German and Austrian merchants, but in the wider fields of China, the East Indies and South America.

The one thing which the Commission insists upon is that the present reconstructive work in Europe must be regarded as only showing the way to what Canada can do abroad in export trade, and it emphasizes the fact that expansion on absolutely permanent lines in the whole of the world's markets must be undertaken by manufacturers if our natural resources are to be utilized to the full.

The net earnings of the Willys-Overland Company last year exceeded ten million dollars.

Potatoes—Seed and Time of Planting

(Experimental Farms Note)
The yield of potatoes throughout Canada would be very much increased if everyone who grew potatoes used seed of the strongest vitality, free from disease. While the variety used is important, the quality of the seed often makes much more difference in the yield than the variety.

Seed potatoes from a crop which grew vigorously until the tops were cut down by frost in Autumn usually give much better returns than those from a crop where the tops dried up in the middle of summer. There are parts of Canada where the former conditions obtain, as a rule, and it is from such places that the most vigorous seed is usually obtained.

In 1918 the best seed of the Green Mountain potato yielded at the rate of 387 bushels per acre while the poorest seed yielded only 57 bushels per acre at Ottawa. In the case of Irish Cobbler, the best seed yielded at the rate of 616 bushels per acre while poor seed yielded only 26 bushels per acre, a remarkable difference. Just as striking differences have been obtained in other years.

Each grower of potatoes should aim to have a full stand of plants in the field and to have every plant a vigorous and healthy one. There is often a large proportion of misses in potato fields and a still larger proportion of weak and diseased plants which lessen the yield enormously.

Experiments have been tried in different parts of Canada to determine the best time to plant potatoes for highest yields, and from these experiments and the experience of the best grower, the following dates are suggested as being the best:—Prince Edward Island, June 1-7; Nova Scotia, June 1-15; New Brunswick, June 1-15; Quebec, May 15 to June 15; depending on what part of the province; Ontario, May 1 to June 15, depending on what part of the province; Manitoba May 10-15; Saskatchewan, May 10-24; Alberta May 10-24; British Columbia, April 1 to May 15, depending on what part of the province. The tendency has been in most places in Canada to plant later than is desirable for highest yields. From results obtained, the following general recommendation is made:—

Where the spring is early and autumn frosts early, plant early. Where the spring is early and summers dry, plant early. Where the spring is late, early planting is not so important. Where the spring is early and autumn frosts are early, plant as soon as soil is dry enough.

SPRING IMPURITIES CLOG THE BLOOD

A Tonic Medicine is a Necessity at This Season.

Dr. Williams' Pink Pills for Pale People are an all-year-round tonic, blood-builder and nerve restorer. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season of the year when the blood is so much in need of purifying and enriching, and every dose of these pills helps to make new, red blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give new strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach, aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills speedily clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, neuralgia, erysipelas and many other troubles are most persistent because of poor, weak blood, and it is at this time, when all nature takes on new life, that the blood most seriously needs attention. Dr. Williams' Pink Pills actually renew and enrich the blood, and this new blood reaches every organ and every nerve in the body, bringing new health and new strength to weak, easily tired men, women and children.—Here is a bit of proof: Miss Anna Patterson, R. F. D., No. 1, Thorold, Ont., says:—"My trouble was one of general weakness, which thinned my blood and gave me at times unbearable headaches, loss of appetite and also loss in weight. I tried several medicines, but without success. Then I heard of Dr. Williams' Pink Pills and decided to give them a fair trial. The result is that I feel like a new person. My appetite improved, I gained in weight, my blood is thoroughly purified, and my face cleared of some unsightly pimples which had troubled me. If one good turn deserves another then I have much pleasure in recommending Dr. Williams' Pink Pills."

If you need a medicine this spring try Dr. Williams' Pink Pills—they will not disappoint you. These pills are sold by all medicine dealers, or you can get them by mail at 50 cents a box or six boxes for \$3.50 from the Dr. Williams' Medicine Co., Brockville, Ont.
