

On page 58, of vol. 7, of the CANADIAN ENTOMOLOGIST, I gave a list of Mr. Morrison's synonyms in the Noctuidae then known to me. I have since then become acquainted with more of Mr. Morrison's species, many of which appear to me undoubtedly valid and well described. Difficulties were thrown in my way in my endeavor to find out what Mr. Morrison's descriptions covered. There still remain a considerable number of Mr. Morrison's species which I cannot identify and would like to know, to enable me to place them in a new List of our Noctuidae upon which I am at work. The following is the list of synonyms I have made out :
