

Dust-Free School-Rooms

Pure air in the school-rooms keeps pupils and teachers healthy, happy and energetic—eager for the work in hand.

IMPERIAL STANDARD Floor Dressing

Imperial Standard Floor Dressing is an air purifier. It works like a magnet. The germ-laden dust atoms that ordinarily float in the air or are scattered by a duster are held down to the floor of the room. All that is necessary to keep the dressed surface in good order is regular sweeping of the accumulated dust with a brush or broom.

Imperial Standard Floor Dressing is sanitary—a preservative and economical. One gallon will treat 500 to 700 square feet of surface—one application will last for months.

It is sold in one and four gallon cans.
