

- national and global emission forecasts
 - in-depth reviews of national communications
 - information from all countries, including Non-Annex I countries, concerning their activities/measures to implement commitments under Article 4.1)
- 2) Currently suggested approaches, including:
- AOSIS proposal (20 percent CO² reduction by 2005)
 - EU agreement (maintenance of 1990 greenhouse gas levels indefinitely after 2000)
 - UK call (5-10 percent greenhouse gas reduction by 2010)
 - other (including analysis of various dates through 2020)
- 3) Other possible approaches, including successful experiences with policies and measures (and technology development/diffusion potential) in areas such as:
- transport
 - energy
 - industrial
 - residential/commercial
 - agriculture/forestry
 - non-CO² gases
- 4) Market mechanisms such as:
- fiscal instruments
 - activities implemented jointly/joint implementation
 - emissions trading
- 5) Technological opportunities including:
- improved energy efficiency
 - switching to lower emitting fossil fuels and new fuel sources/increased use of more efficient and safer conventional energy conversion technologies (e.g., clean-coal technologies and nuclear power)
