

Technical Assistance

- Since September 1991, the Government has committed more than \$4 million in technical assistance to Estonia. This assistance is targeted at democracy and good governance, education, health care, and trade and investment. For example, Canadians have trained Estonian teachers in curriculum development and public servants in managing a free-market economy.
- Canada has also provided \$3.2 million in humanitarian assistance to Estonia, Latvia, and Lithuania. An additional \$1.5 million in humanitarian assistance was committed to the Baltic countries in April.
