

TABLE NO. IV.

Exhibiting the comparative fluctuations in the circulation of the Bank of England and of the Bank of Montreal, from half-year to half-year.

DATE.	Bank of England. £	Rate of Increase per cent.	Rate of Decrease per cent.	DATE.	Bank of Montreal. £	Rate of Increase per cent.	Rate of Decrease per cent.
1825,—February,.....	21,060,130			1830,—February,.....	178,311		
August,.....	19,518,500		7.1	August,.....	213,822	19.9	
1826,—February,.....	24,955,040	427.8		1831,—February,.....	223,558	4.5	
August,.....	21,388,010		14.3	August,.....	313,830	40.3	
1827,—February,.....	21,508,550	5		1832,—February,.....	270,942		13.6
August,.....	22,007,060	2.3		August,.....	292,364	7.9	
1828,—February,.....	22,174,780	.8		1833,—February,.....	233,911		19.9
August,.....	21,817,280		1.6	August,.....	268,632	14.8	
1829,—February,.....	20,204,300		7.3	1834,—February,.....	177,551		33.9
August,.....	19,529,410		3.3	August,.....	223,916	26.1	
1830,—February,.....	20,468,050	4.8		1835,—February,.....	165,592		26.
August,.....	21,934,940	7.2		August,.....	262,132	58.3	
1831,—February,.....	19,650,830		10.4	1836,—February,.....	199,776		23.7
August,.....	18,465,310		6.	August,.....	211,228	5.7	

* I have not the half-yearly returns since this year in my possession. † This great increase is to be attributed to the bubble schemes and wild speculations of 1825-26.
‡ No returns were made prior to this year.
