

# The Story of Dr. Chase's Kidney-Liver Pills

Not an accidental discovery but the result of years of effort, study and experiment

It is not a new story but an interesting one to many thousands who have tested the disease curing, life saving virtues of Dr. Chase's Kidney-Liver Pills.

Unlike many medical discoveries the formula of this great kidney and liver medicine was not an accidental find, but the outcome of years of earnest work on the part of Dr. A. W. Chase.

The doctor had not long been in practice at Ann Arbor, Mich., before he found out that a surprising proportion of human ills were the direct result of derangements of the liver and kidneys, and plainly saw that if he could compound a preparation which would have a combined action on these two organs of the body that he would be able to control at least seven-tenths of the common ills of human life.

At this time Dr. Chase was at work on his great Receipt Book which has since become famous the world over and had access to many of the greatest prescriptions that were ever written, and as he then had a large practice was enabled to test the various formulas.

It took many years to perfect the prescription for Dr. Chase's Kidney-Liver Pills and during that time the reputation of

Dr. Chase as an unusually successful physician spread abroad. Outgrowing the limits of his own State he became known far and near and was sought for in serious cases which seemed to defy the skill of the ordinary physician.

Being unable to be present at the bedside of all the sick and suffering who applied for his assistance, the doctor would send some of his Kidney-Liver Pills, and so it came about that they were put up as they are to-day for public sale, Dr. Chase restricting the price to twenty-five cents a box.

The success of this great family medicine has been phenomenal and is attributed to the fact that it has a direct and combined action on the kidneys and liver. It begins by regulating the bowels and making the kidneys and liver active in removing waste matter and impurities from the system.

It is probably not going too far to claim that Dr. Chase's Kidney-Liver Pills are the greatest medical discovery of the past half century. They have certainly relieved more suffering and cured more serious disease than any medicine that is before the public to-day.

MR. EMBREE.

## Lumbago and Pains in the Back

Totally disabled this merchant—Physicians failed but Dr. Chase's Kidney-Liver Pills cured.

MR. THOMAS A. EMBREE, general merchant, a highly respected citizen of Springhill, N.S., was completely laid up with kidney disease, lumbago and pains in the back. He was unable to attend to business, and his sufferings were only temporarily relieved by physicians.

He writes:—"As the result of a severe cold settling on the kidneys I contracted kidney disease, which lingered for years, causing me much suffering from terrible pains in the back. For some time I was entirely unable to work, and though I tried several physicians I could only obtain slight temporary relief.

"Having heard of the merits of Dr. Chase's Kidney-Liver Pills on many similar cases, I began to use them, and after using seven boxes was completely cured. The cure is due entirely to the use of this grand medicine, which has since cured several persons to whom I recommended them."
