

## THE RIGHT

FOR RUTTAN'S VENTILATION.

---

WHENEVER this system of ventilation is used in connection with Ruttan's Air-warmers, the following rates will be charged:

Dwelling house from \$50 to \$300, according to cost.

The rates for extra large and valuable dwellings, or for public buildings, can be ascertained by addressing H. J. Ruttan, Cobourg.

It should be remembered that any one adopting this method of ventilation, will economize enough in fuel in one or two years to pay for its cost, besides the health and comfort which he will enjoy from a constant supply of pure air.

### INFRINGEMENTS.

It will be regarded and treated as an infringement on Ruttan's Patent for Ventilating and Warming buildings, wherever the air is exhausted from a room *at, near or under* the floor, or heated air introduced into a room *at or near the ceiling*, or warmed air is *conducted from the furnace or Air-warmer to a room, without artificial tubing.*
