UP MONTREAL RIVER BY CANOE **NEW COUNTRY IS OPENING UP**

Som: Prospectors Who Have Been Fortunate in Locating Ore - Perils of Shooting Rapids - Sensations of the Week at Cobalt Include Several Strikes and the First Circus to Visit the North.

Latchford, June 21.—(Staff Special).— in the Temiskaming District. He had never been to a circus, nor had he ever tasted the joy of witnessing a street have returned from a lengthy trip up north, and are very enthusiastic about the master of the master o a thir by boat. In going up the Mont- upon the masterpleces of decorative the agricultural possibilities real River, however, there is not an un. and the butcher real River, however, there is not an un.

art that had adorned the shop windows and the butcher shops, and from daybreak new points of interest.

There are as yet no steamboats on the river and it is not likely there ever will be at this point, but there are several gasoline launches and it was on one of the boats of the Latchford point in one of the boats of the Latchford point in one of the boats of the Latchford point in the several gasoline launches and it was not the control of the Height of Land. On June 10, at the Hudson Bay post at Abitibli Mr. Ross saw large and fragrant pansies and violets growing, and the determined to see as much of it as could not go to Haileybury. This little man could not go to Haileybury bay with him. They were told by the Hudson Bay rount in June 10, at the Hudson In June 10, at the Hudson Bay rount in June 10, at the Hudson In June 10, at the Hudson Bay rou

year on the river. They have street eu, however, in getting a good share of the heavy miner and prospector passenger traffic and their boats are extremely well-behaved. This may extremely well-behaved. This may seem a superfluous remark, but we have heard of gasoline launches in the Temiskaming that sometimes act more

of Manager George Lee of North Ba Our trip, however, only took us as far as Pork Rapids. This is as far as the here and above the rapids the Montreal River Co. has a second boat which enables tourists to go on up the river George Nicholson of the survey brance

It is the reluctance of the canoeist to leave the water and make the portages that causes so many of the drowning accidents. He attempts to go too far before landing or else attempts to pole the rapids. This year many are going up who are absolutely inexperienced, and it is frequently these foolhardy ones who attempt the most dangerous rapids, and it is a wonder that many more have not been drowned than already have.

The scenery along this pant of the large of the canoeist to leave the canoeist to leave the canoeist to leave the canoeist try beyond Flat Rapids.

Mr. Wilson returned yesterday with the sad intelligence that his companion had been drowned about 30 miles up the river. They were approaching some rapids when their boat tipped over. They tried to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were getting too near the rapids and started to save the canoe, but were performed to swim ashore. Wilson was ahead, and, on looking around, was horrified to see that his friend had disappeared. As he was an expert swimmer, it is Foolhardy Canocists.

who has been here since spring, and is fire-rangers' place is the Gray-Kay a partner of C. R. J. M. Wallace & Co

At this time of the year life in the when the canoe turned straight for the bush is almost unbearable. Men continually come in nearly crazed with the the current and not in one of the many MANNION & EVANS. thrually come in nearly crazed with the bites of the mosquitoes and sand-flies. The attacks of the latter can only be justly described as devilish. No matter how carefully the tent is closed, these insects will get in, and they hang around in great masses. It is impossible to use more than one hand, either at work or at meal time. The other is invariably engaged in fighting flies. A man came into Liskeard hospital the other day nearly blind from the effects of flybites. For the next two weeks there bites. For the next two weeks there At Cobalt a certain lull is taking will be few men in the bush, but after place in the activity which has prevail-

the second week in July the old-timers ed. Everybody is hard at work at the say we will be comparatively rid of all mines and at their mining claims and the threatened strike has been called off. The good sense of the large The Circus. "Gee, is that a circus?" was the re- jority has prevailed, and most of the mark of a little lad at Latchford, as men are at work again, the two special trains of the Cole circus passed thru last Sunday. This lit-discovery of the big argentite vein at cus passed thru last Sunday. This lit- discovery of the big argentite tell the tellow had lived his short lifetime the McKinley & Darragh property and!

the new find by the Glen Lake Mining Company, who have made a good silver discovery. R. A. Bailey is in charge of the work and has not been very dis-

of the work and has not been very discursive in his revelations.

The argentite find is a very valuable one, and it is said that this is the first large body of argentite which has been discovered. Argentite practically carries 90 per cent, of silver, as aptly put in the circulars issued by Norton & Co. of Cobalt, who have prepared and are sending to their customers one or the best designed descriptive pamphlets of Cobalt camp that have issued,

In Clay Belt.

Messrs. Ross and Reid of Ottawa

ple 100 miles farther north in New Ontario than any circus had previously been. Hundreds were there who had not seen a circus for years, and many saw one for the first time. Everybody went, and it would have done our friends in the east good to have seen the passengers of the Cobalt special (wno arrived a little late for the parade) running across vacant lots to get a vanhele.

Dougall Chute there are 42 portages and the distance is 60 miles. Early in the spring a lone prospector arrived at the chute. He was a man nearly 70, and had walked in all the way, carrying his pack of 50 pounds and had forded all the breaks in the right of way cut out by the railway. At McDougall's Chute there were no canoes nor boats available, so the old man built a raft. He had no spikes nor nails, but he used

A WORD TO INVESTORS

In mining investments of the right kind lies your opportunity. Most of the world's richest men made their millions because they had faith in mining. Because you have lost money in mining, it does not follow that all mining investments are bad. The thing to do is to investigate and select that which is good. You have this opportunity in,

The Buffalo Mines, Limited NO PERSONAL LIABILITY

(Known also as The Denison-Buffalo Mine, Cobalt, Ont.) Incorporated Under the Ontario Mining Companies Act

SUBSCRIBED CAPITAL \$900,000.00 Total capital being 1,000,000 shares of the par value of \$1.00 each, of which

100,000 are unissued shares, to remain in the Treasury. It is not a prospect but a fully equipped and operating mine. Its ores are showing assays of values as high as \$2500 per ton.

It is a producing and shipping mine. There are eight cars of ore in transit or being treated at the New Jersey smelters from which large returns are expected any day. Another three inch vein was discovered on the property last week. This makes ten veins in all disclosed, and yet only one-half of the forty acres has been prespected.
