Louis P. Bouvier, envelope maker lowing her vocation as an envelope-maker. Bouvier pleaded not guilty and elected trial by magistrate. The case was adjourned until next Wed-nesday.

Miss McCann said that she had los all her positions thru conspiracy of the four firms. She had been employed at piecework in Bouvier's establishment, but was put on time work with no satisfactory explanation.

On complaining to the forewoman, she was told to see the bookkeeper.

The Lusitania, the largest ship affoat, was given a royal welcome on her arrival, and it was a continual ovation from the time she sped past the Sandy Hook lightship and made her way thru the Ambrose Channel, the first ocean liner to enter the new fairmay, until she was safely warped into her dock.

HOW ONTARIO IS HIT FROM THE RAILWAYS

Giant Cunard Liner Succeeds in Says That Four Firms Are in Discrimination by Companies Against Toronto-New Sunday Laws Hurt, Too-

> The World had an interview yesterday with a prominent manufacturer of Toronto, who does not care to have his name published. In the course of his remarks, he said:

"I am very much in sympathy with The Toronto World in its new mission of arousing the people of Ontario to the fact that the Montreal management of the Ontario railways is exercised very much against the interests of the province, and of Toronto and our other cities and towns, and altogether in favor of Montreal and the Province of Quebec."

He said that it was simply scan-He said that it was simply scandalous that the equipment for both the Grand Trunk system and the Canadian Pacific system in this province had to be built in Montreal. There could be first class car building departments, switch-building departments in this province. He did not care whether in Hamilton, in London, in St. Catharines, in Kingston, Toronto or some northern town or any other care whether in Hamilton, in London, in St. Catharines, in Kingston, Toronto or some northern town or any other place within the province. These roads, as The World has pointed out, derive the largest part of their revenue from this province, and yet they were getting nothing in return, and it was impossible to get the necessary equipment for the Ontario roads outside of the province, and he thought our boards of trade and the legislature of the province should deal with this condition of affairs.

"But there is another thing," he said, "that I wish to point out, and it is this that the people of the Province of Queliec and the City of Montreal are bound to benefit to a very large extent, and Ontario to be prejudicially affected by the enforcement of the Sabbath Observance Act in this province, as was now being attempted."

It had been pointed out that nearly 20 per cent, of the efficiency of any railway was destroyed by a strict enforcement of this law. The Province

per cent. of the efficiency of any railway was destroyed by a strict enforcement of this law. The Province of Quebec, while it had thru its members, almost to a man, voted for this new Sunday law, had with equal impressiveness taken good care that the local legislature immediately thereafter voted that province without the operation of the law, i.e., they put the yoke upon Ontario and removed it from themselves. As a consequence the City of Montreal and the manufacturers of the Province of Quebec would get the benefiet of the discrimination as to the application of the ination as to the application of the held in secret.
