SKILLFUL COOKS' DUTY.

Should Make Food Taste and Look Well.

The true science of cookery is to select proper and nourishing ingredients and then prepare them in such a manner as will please the taste, and incidentally the eye.

The most valuable food will not long agree with a person if its taste is disagreeable. This does not argue that all nice tasting articles are nutritious and nourishing. However, it is the duty of all food experts to produce delicious food and from the best possible ingredients, and to have a comprehensive knowledge of the laws of digestion and assimilation.

Grape-Nuts, the new food made by Postum Cereal Co., Ltd., Battle Creek, and now on sale at grocers, is thought to be the highest type of scientifically made food thus far produced.

It possesses the delicate sweet of grape-sugar, with a new and peculiar flavor of a most winning character, while the processes of manufacture have brought the food to such a condition that it is absorbed by the system in a most natural and healthful manner.

were dull. Butter—Receipts, 9,000 packages; weak. Cheese—Receipts, 963 packages; quiet. Eggs—Receipts, 11,943 packages; steady. Sugar—Raw quiet and steady; refined steady. Hops—Steady. Lead—Dull. Potatoes—Quiet; southern first, \$1 50 to \$2 75; southern second, 50c to \$1 50. Wool—Firm.
