J. H. Plummer arrived in the city this morning and will preside at meetings of both the Steel and Coal boards. The Steel directors will meet at 12.30 p.m., and the Coal directors at 2.30 p.m Steel and Coal issues were easier this morning, especially Coal, but the real significant feature of the recent trading in these issues is that well informed people are steadily increasing their

Why Does Not The Stomach Digest Itself?

An Unsolvable Problem, Which Has Puzzled Physicians of All Schools-

A Trial Package of Stuart's Dyspepsia Tablets Sent Free.

There seems to be no logical reason why the stomach should not digest itself when we consider the fact that it secretes digestive fluids and acids which are powerful enough to disintegrate and digest meats, eggs, fruits, cereals, vegetables and other forms of food taken into it.

In animals which were killed while in full digestion the stomach has undergone complete self-digestion after death, when the body was kept warm; and in human beings who have died suddenly, while digestion was going on, it was found at the autopsy that not only had the stomach been digested, but also the liver, pancreas, spleen and portions of the intestines.

The question naturally presents it-self, "What protects the stomach from self-digestion during life?" Dr. Hunter declared that the "principle of life" in living things protected this organ from being digested by its own fluids, but Dr. Barnard successfully demonstrated that the hind legs of a living frog, when introduced through a fistula or artificial opening into the stomach of a dog, undergo complete digestion, and Dr. Pavy, through similar experiment, found that the same was

true of a rabbit's ear.
While the normal stomach is immune lor g-standing gastritis, and perverted digestion, has completely digested or exten away the mucous membrane lining of the stomach, and in some instances has engendered gastric ulcer, which ate its way clear through the stomach wall, and caused a fatal peritonitis.

In all cases of perverted function of the stomach, which manifests itself by the numerous well-known symptoms of indigestion and dyspepsia, Stuart's Dyspepsia Tablets act as a corrective, restoring it to a normal condition, toning up the secretory glands, as well as the lacteal glands, which absorb the food, and at the same tome assisting the stomach in the process of digestion, and preventing all possibility of such ous arising as will cause pervert d functions, gastritis, gastric ul-cer, or the eating away of the mucous membrane of the stomach.

Stuart's Dyspepsia Tablets are exceedingly powerful digestives, a single b. ing sufficient to dg s 3000 grai s of food, including meats, vege-tables, cereals, etc. They digest albumenous and starchy foods equally well. Whenever the stomacn is in a, weakened condition, and so tacking in tone that it furnishes an insufficient amount of gastric juice, such symp-toms as heartburn, bilousness, headache, belching of gas and sour eruc.ations are sure to a pear, and make one teel generally miserable.
Such symptoms, can, however, be

overcome and done away with at once. Simply take one or two of Stuart's Dyspepsia Tablets and forget all about your dig stive troubles. They do their work promptly and thoroughly, every partice of food being completely dig sied and fermentation, decomposi-tion, and flatulence and heaviness in stemach after eating, relieved and cured. Purchase a box from your thrungist to-day, price 50 cents. Also send us your name and address for free mrt Co., 150 Stuart Bids., Marshall, Mich.

RETIRING PRESIDENT DINES STOCK EXCHANGE

Ontario's Abundant Mineral Wealth appreciation of the honor that had been Theme of speakers-Address of W. C. Fox.

As the guest of W. C. Fox, retiring president of the Standard Stock and Mining Exchange, nearly forty mem-bers of the exchange and their irlends sat down last night to a banguet at the King Edward Hotel. The annual meeting of the exchange was held in the afternoon when J M. Wallace was elected president, and the retiring president delivered his annual address which told of the development of the mining is ustry of the province, and breathed a spirit of optimism for the

The event of last night was splendid in its conception and was carried to a most successful conclusion. Arrang-ed in the shape of a horse shoe, the tables presented an attractive appearance, and were regarded as an omen of the future greathess of the New On-tario mineral district. Toronto's Heritage.

The toast list was an interesting part of the program. Toronto the Queen City was responded to by Ald. James McCausland, who

ed to by Ald. James McCausiand, who thought it was an honor to be a representative of such a grand city.

W. F. Maclean, M.P., was welcomed as a jolly good fellow. There was nothing Mr. Maclean said more worthy than to be a citizen of Toronto. It was the home of the national policy, the centre of Canada's locality to the the centre of Canada's loyalty to the empire and the mother of the mining camps of Cobalt, Gowganda, Lorrain and Porcupine, which had produced so much wealth for the province. He hoped to see Toronto prove the benefits of publicly distributed power and other public utilities. As citizens of the best city in Canada he invited the attendant brokers to become members of the haif million club, a population

J. M. Wallace, New President. which Toronto should attain within

a short period. Canadian Development. The toast to the Dominion of Canada was ably responded to by Lt. Col. Greville Harston and Hon. J. R. Stratton, M.P. The latter speaker thought that Canada would compare favorably with any nation. He cited many statistics to show the wonderful growth of the Dominion, particularly in the Canadian west. The west he thought would develop the future purchasing power, and the east the manufacturing power. He strenuously advocated that all natural products be manufac-tured before exportation. The mineral resources of the country should be taken full advantage of, and legislation should assist its development. Col. Hay and R. R. Gamey, M.L.A., championed the national resources of

Porcupine Gold Field.

Col. Hay spoke of Porcupine to which he had made a recent trip. The showings of gold he said on the properties which he had inspected were really remarkable, but he thought it was an pine were annually cut in the province, but this would go on for years and would still go on. Practically every mineral was available in Ontario and its resources had by no means yet been reached. All over the world the name of Cobalt had redounded to the credit of Ontario and of Canada. He recounted an experiment which is now under way to use the total output of under way to use the total output of the Sudbury nickel mines without ex- in us, true to the mineral industries porting the unfinished product, as is of our land, true to the great public, now done. He thought that Porcupine and true to the tenets and principles had as good a showing of gold as any of our exchange, we shall do our part other district in the world had under to make Ontario known, to make Tothe same development. To the toast of the Standard Stock mineral industry, and the "Queen

Pattison, jr., Ralph Pielsticker, J. J. Powers, W. B. Procor, A. G. Robertson, O. Ross, Victor Ross, W. A. Smiley, Frank J. Stanley, leorge Stevenson, J. R. Stratton, M.P., ohn H. G. Strathy, Gordon Taylor, S. Thorne, A. Gordon Travers, J. M. Vallace, J. J. Warren, Edgar Watt, ohn Webber, Louis J. West, William Vorthington, J. J. Wright.

Officers of Exchange. At the meeting yesterday the follow ag officers were elected: V. M. Walace, president; George Hill 1st vicepresident; J. A. McCausland, 2na vice-

president. Directors—A. J. Barr, D. G. Lorsch, J. T. Eastwood, Gordon Taylor, J. A. Gormaly, Ralph Pielsticker, J. H. T. Strathy and E. Strachan Cox.

Address of Mr. Fox. The address of the retiring president, Mr. Fox, dealt with the history of the exchange. As the first president under the new charter, Mr. Fox spoke his done him. During the year all the extra seats held by the members had been disposed of, and the exchange now had a membership of 39, an increase of five. It had been a strenuous and eventful year in the history of the exchange and of the Ontario mining industry. Some of the important events were the trying out of the rules and regulations under the new charter, the

WANTED MANAGER

W. C. Fox, Retiring President.

new arrangement with the telegraph companies. In this connection the committee appointed had given valuable service.

Mr. Fox referred to the pride they all felt in Toronto, whose building op-erations during a period of the past year equaled one-third of the total building operations of the whole of Canada, and, according to the latest figures, totaled for some ten months over \$18,000,000, with an increase in population over last year from 310,000 to 350,000—but, proud as this record was, the record of business of the Standard Stock Exchange outshone it. The transactions on the board (irrespective of unlisted securities) amounted to 36,-675,802 shares, of a value of \$17,110,722, and the clearing house transactions \$28,170,216.96. This was one of the reasons for the rapidly advancing value of the privilege of a seat on the Standard Stock Exchange, and was a last-ing tribute to the wisdom of the establishment by the Standard Stock Ex-change of "the clearing house sys-

The installation of the ticker service had been decidedly beneficial to clients and brokers, and a forward move in the march of progress, and characteristic of the business acumen of the members of the Standard Stock Exchange. The new arrangement with the telegraph companies had been beneficial both to the companies and to the members of the exchange.

of Ontario, he was sure that every nember of the excharge, and every on interested, whether Canadian or foreign, had every reason to be proud of the record. Where only some few years ago, was a vast lone wilderness a hunters' paradise, where only echoes resounded to the voice of the Indian trapper, there were groups of silver mines, pouring out their millions of annually in dividends to their dellars shareholders, who only a short time ago considered mining nothing better than gambling—and to this potent agency must be ascribed in a measure, the wonderful progress of this city during the last few years, for Toronto was becoming known as the home of The number of stocks listed on our board was thirry-four, and of these fourteen had paid dividends

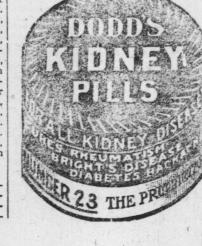

amounting to some \$6,193,836 during the past year. From all indications these would increase next year, and for many years to come, and if the reports of the astounding riches of the new gold fields of the north were justified by later developments, there would be no necessity for emigration agencies, assisted passages, beautifully illustrated wheat land circulars, for without these old Ontario would surely come into her own-and the men who had the courage to "do and dare" would reap a golden reward.

With such a record behind, and such grand prospects before, he felt that the closing sentences of his former address were almost prophetic.

most of the exchanges of the world. More Hospital Patients. Since the beginning of this year the Toronto General Horpital has had an for the corresponding days of 1909. There have been an extraordinary

number of fractures thru badly kept sidewalks. Oil Doesn't Replace Coal.

NEW YORK, Jan. 11.—Oil-burning locomotives are more or less of a failure, especially in cold weather, according to the New York Central, which after a season's trial, has elected a favor of coal as the most economical fuel.
