MUST REDUCE IN NEXT TWO MONTHS

Power Company Will Supply City Current Only Part Day Then.

M. A. Pooler, general manager of the New Brunswick Power Company, when asked today how much power was being supplied the N. B. Electric Power Commission, said that his company was supplying an average of 25,000 k. w. h. a day, which was the amount requested by the commission. During the months of December and January, however, Mr. Pooler said, the company would not be able to supply any current from 9 o'clock in the afternoon until 11 o'clock at night as that was their heaviest season. They would be able to give between 18,000 and 20,000 k. w. h. daily during the other hours of the day.

Mr. Pooler said that the commercial and power business had been taken on had more than offset any losses as there had been an increase in the amount of energy used during the last few months. Enquiries had been made at their office as to the possibilities of heating apartments and houses with electricity. It was Mr. Pooler's opinion that electrical energy would never sell cheaply enough in New Brunswick to warrant heating by electricity.

Asked if any arrangement had been made as to the price of the current supplied by his company to the commission, Mr. Pooler replied that the rate had not been fixed as yet. Musquash Water. S. R. Weston, chief engineer of the N. B. Electric Power Commission, when asked if the reports to the effect that the water was lower at Musquash than it had been when the Power Company connected up the hydro line, said so far as he knew the water was rising gradually as they were now able to store on the west branch. He said the water was still below the top of the pipe on the east branch but he saw no occasion to worry over the situation. When told that the Power Company would not be able to supply power during December and January he inferred that the commission had another source of power upon which they could draw in that event.

As Hiram Sees It

"Well, sir," said Mr. Hiram Hornbeam to the Times reporter, "you could have knocked me down with a feather or sold me for a nickel when I heard 'las' night about that there Blue-nose sailin' fer home without 'fishin'! Don't you put me no more stuff in the fish day or how we all ort to eat more fish. I'd eat petaters an' fast. Fish gives you a yaller streak. Won't the Yankees rub it into us now? Say-if I was the Lunenburg folks I'd tell that captain an' his crew they better sail up Salt Creek an' stay there. The idea of a Canadian crew doin' a trick like that. I guess we better quit braggin' about sport-an' teach the kids to sink round the corner whenever they see anything that looks like a trout. Well, well, well-if I was that there committee I'd give that trophy to the Yankee schooner an' wash my hands of the hull business. Was so mad this mornin' that when Hanner give me fishballs fer breakfast I throwed 'em out the window-sit when I seen a feller in fisherman's boots today I hed to ask a policeman to hold me-yes, sir."

Within the last week, he said, there were requests received at his office for at least a dozen seamen but not one was to be had.
