pany's bowling quintette won the first series of the Clerical Bowling League Bialas, Lake Placid and Orlie Green which was treminated last Friday evening. Hayward's and Waterbury will fight against one another in the will fight against one another in the second. series of the Clerical Bowling League which was treminated last Friday evening. Hayward's and Waterbury & Rising teams were tied for second honors, one point behind the winners. The official averages for the first series were given out by the scorer, Ernest Till, on Saturday. These show that the champions led the league in pinfall with a total of 11,709 in their nine games, against 11,576 made by Hayward's. The winners had a grand average of 1301 for each game, which is exceptionally high for the league. Waterbury & Rising's has the highest team total for a single string, namely, 1987. Parafit, of the Canadian National Express, holds the season's high single string with 186. Harry Sullivan, of Hayward's, hold the season's three string average, namely, 1022-8, which was 1808. He also holds the league leadership with an average of 92 11-21, closely 1901-27, and Flowers, of Hayward's, with 908-27. Individual Averages.

LECTURE—Given by E. F. CRIST 8049-12-25

the young player who defeated him last year and now in turn has been defeated by him. It is easy to accept at fact value the statement in the news columns that never in the annals of bill liards has there been such a crowd clamoring for admission to a champion ship game. Those who witnessed the play saw a thrilling encounter. The old master and the comparative tyro the son of a man who stood alone for years at the summit of billiards skill gave an exhibition occasionally almost amateurish—for they are but human and sometimes they went down on easy shots — but most of the time it was spectacular play over which the massed spectacular play over which the massed spectacular play over which the massed spectators hung breathless. Almost uncanny is the cleverness with which a master of the cue will apply just the touch and force to drive the widely scattered balls helter-skelter about the table only to bring them together again in a little cluster easily covered by the proverbial hat. Hoppe is as popular a sever, in spite of the sympathy that an American gallery usually gives a young player, and Schaefer has many years before him and can afford to wait. S. **PROFESSIONAL** HOCKEY LEAGUE

WALLACE REID IN FIGHT FOR LIFE IN NOVA SCOTIA

Sydney, N. S., Dec. 18—Negotiations looking to the formation of a Nova Scotia professional hockey league were commenced between Cape Breton and the mainland over the week-end, Chester Gregory of New Glasgow is the principal proponent of the scheme on the mainland and the idea is being received with much favor on the island. IN NOVA SCOTIA

ter Gregory of New Glasgow is the principal proponent of the scheme on the mainland and the idea is being received with much favor on the island. The proposal is for a four team league to include New Glasgow, Stellarton, Glace Bay and Sydney. At the same time an effort is being made to organize another league consisting of Moncton, Amherst, Springhill and possibly Truro, the winners in these leagues to play off at the end of the season for the professional championship of the maritime provinces.

At present Stellarton and New Glasgow are members of the independent league with Amherst and Moncton.

Gregory informed Cape Breton promoters that he would first have to consult with the other members of the independent league before he can give any definite assurance that the new circuit will become a reality.

Head of the scheme on the inlend provided the care of two physicians and two male nurses.

ABOUT WASTE PAPER

(Thrift Magazine)

The paper industry of the United States will this year útilize 2,000,000 tons of waste paper in the manufacture of new paper.

To save waste paper is to save the forests.

Every ton of waste paper used by the paper mills means just so much of our forest resources saved for the future. Taking good pulp wood as an example, it can be said that use of six tons of waste paper is equal to saving of one acre of timber.
