Morristown and Other Places Threatened With Another Johnstown Deluge.

of Houses and Rescued With Small Boats

Sacrificed in Rescuing Human Life

Morristown, N. J., Feb. 7.-Residents of the lower section of this town were kept in a state of terror all night by toods caused by the breaking of the Pocahontas lake dam on the upper side of Morristown. The water rushed into the valley sweeping everything before it. People had to go to the upper stories of their houses and remain there until rescued in boats. Water rose from 7 to 10 feet. No lives have been lost. The most serious damage was done to the Hygienic company, and the Malley & Tate electric light powe house and Cody and Seeley estate. This morning the water had gone down considerably in the southern section of the own, not being more than three or four feet deep. The lake dam had for a long time been in a dilapidated condition and threatened breaking during any

severe storm. Somerville, N. J., Feb. 7.-Bound brook last night experienced the most dreadful calamity of its existence. Not only was there a big fire, but a big flood swept the town. The water from the Raritan river ran through the streets of the village. At three o'clock this morning the water was nearly ten feet deep astounded the profession and his enter- in the main street. The flood was caused by the heavy rainfall overflow-

## THE NINEVEH WRECK

Full Particulars of the Loss of the Bark Nineveh Off Cape Flattery.

They Were Heading for the Straits When They Met the Schooner Compeer.

Mate R. M. Reader gives the following particulars of the loss of the British bark Ninevah, the crew of which reached Oakland on Tuesday on the schooner Compeer: "Five weeks ago we left Sydney, New South Wales, where the Liberal press showed that all were Ninevah was owned by Goodlet & ready to do and die for England, What-Smith, lumber merchants, of that city. ever party was in power, England We arrived at Vancouver in good time, and there loaded 875,000 feet of lumber for Sydney. We left Vancouver Jan-uary 16th, and all went well on our homeward voyage, until January 24th, when a storm struck us. A big sea went over the ship and lifted a lot of the deck cargo and broke the pump handle. At this time Captain Broadafter two hours' work, we found the water was deepening in the hold. The donkey engines were fired up under trying circumstances, and we continued to pump both by hand and steam. By this time there were six and a half feet of water in the hold, the wind was blowing a hurricane and a terrific sea was rolling. The barometer had fallen to "At 4 o'clock Sunday morning." 28.62 January 26th, the water measured seven and a half feet and the pumps had been running all the time. At S o'clock the wind and sea had moderated some, and by daylight we found that the lee balwarks had all been washed away. The ship was working and leaking badly. At noon the soundings showed nine feet of water in the hold, and the crew, becoming disheartened, requested the captain to put to port. The course was shaped for Cape Flattery. At 9 p.m. the water had gained so that it measured ten feet. The ship was rolling heavily, taking water over both family in the upper part of their rails, and the donkey fire was put out. The captain then fired several signal he was drowned. The family remained rockets. At 4 o'clock Monday the water in the hold had increased to twelve feet. Steam and hand pumps had been going continually since the ship had begun to leak. The men had worked for three tain, but it is learned this morning that days and nights, stopping only long enough to eat their meals. On Monday morning at 8 o'clock the Compeer hove the captain to hoist the ensign upside down. The captain, realizing the conands of people are passing through this dition the ship was in and the remote ed the signal for assistance. The Compeer came to under the lee of the Ninethe accident last night, through the long | Captain Broadfoot was the last to leave hours until this morning, the scene wa: the ship. PERHAPS HAMLIN WAS HASTY. His Alleged Interference in Healy's

NO 48

Trial May Be Investigated. San Francisco, Feb. 8.-The Chron-

cle says the alleged interference of Assistant Secretary Hamlin, of the treasury department, in the trial of Captain Healy, ex-commander of the revenue cutter Bear, will, it is said, result in serious charges being filed against him at Washington in the near future, and that it is not unlikely that resolutions may be introduced into congress with a view to impeaching Mr. Hamlin for his alleged attempt to prejudice the court against Captain Healy.

"TEETH" OR "SCALES" ON WOOL

Do you know that every healthy fibre of wool is covered from root to point with numerous overlapping "teeth" or "seales," and it is because of this scaly structure that wool can be "felted" or interlaced and entangled by mechanical operatons so as to become a web with a dense, cloth-like texture? Human hair and hog bristles are also of a scaly nar-Halifax, Feb. 7 .- The banquet to Sir | ure, but the teeth are few compared Charles Tupper last night was largely with those found on sheep's wool. From a commercial point of view the excellence of wool is determined by the number and closeness of these microscopic said it was with the greatest reluctance | teeth or scales. In some species of sheep the teeth number over two thoutics. The relations between Sir Mac- sand to the inch, while in others there been and were now of a most pleasant | counting the scales on a single fibre of wool an expert buyer can tell exactly was merely child's play. The Liberals what species or variety of sheep any inhad floooded the country with able and spected fleece is from. For an instance brilliant men, but they had no policy to if a grower brings in a load of wool present. He took exception to a motto and declares it to be from Merino sheep which formed part of the decorations; the buyer only needs to take down his high-grade microscope and count the teeth on a single fibre of the wool. If cause he believed that the people of he finds that these fall under two thonsand to the inch he knows that the farmer is on the "beat" and acts accordingly. The superior quality of wool from which the yarn called Saxony is spun usually has from 2,700 to 2,750 scales or teeth to the inch. The finest and best wool on the market seldom has less than twenty-eight hundred or more than three thousand overlapping scales to the inch

> Madrid, Feb. 8.-The government organ regards the resolution of the United States senate committee on foreign rethe Cuban insurgents, as being of no importance. They declare that the relations between the Spanish and American governments are very cordial, and that the campaign in Cuba has not changed them. Marshal Martinez de Campos dined last evening with the

CAMPOS NOT NOW POPULAR.

Spain Bent on Retaining Cuba, so the French Papers Think.

Paris, Feb. 8.—The Figaro and other papers give considerable prominence to the manifestations at Valladolid and Midrid against Marshal Campos, who only a few months ago was the most popular soldier in Spain. The opinion here is that the hissing and hooting clearly indicate that public opinion in Spain is worked up to a state of great excitement over Cuba, which the Spanish mean to retain, if possible, at any sacrifice, many of them considering that its loss might involve national bankruptcy.

Buffalo, N.Y., Feb. 8.—Alexander F. Hamilton, formerly of this city, now a captain in the Third division of the Insurgent army under Gen, Garcia in Cuba, gave a graphic review last night of the methods of warfare in Cuba's struggle for independence. He said:

"I think Gen. Gomez will attempt to capture Havana. He will bring up all his forces for a great attack, and that will settle it. This will be a difficult task and it should have been done at first."

"Are there many Americans in the insurgent forces?"

"Terhaps two-thirds of them arm surgents for independence. He said:
