ACROSS THE BORDER

Heavy Wind and Thunder Storm at Detroit—Many Drowning Accidents Reported

Lady in Buffalo Discovered to Be Heir to a Large Estate in France.

Terrible Hot Wave Continued—Many Fatalities, Horses Disabled and Factories Closed.

Detroit, Mich., Aug. 10.—A heavy wind and thunder storm which swept over the city yesterday resulted in the drowning of five men in Detroit river. Several yachtsmen had very narrow escapes after the capsizing of their craft.

A special from Benton Harbor, Mich., says: Four persons were drowned in Lake Michigan, a mile north of here. They were bathing, and two of their number who could not swim, were caught by the undertow and the others went to their rescue. Two lost their lives in the effort, while the third had a narrow escape by a drowning man clinging to him and pulling him under.

Chicago, Aug. 10.—Chas. Johnson and Edward Schaubel were drowned in the lake by the capsizing of their boat last evening. They were in the sight of their wives and children, and a number of friends who were picnicking on shore and unable to assist them. The boat was not more than 30 feet from shore and was upset by two companions who jumped from its side into the water for a swim.

Buffalo, Aug. 10.—In September, 1883, the charred remains of Lady Georgiana de Lovelace were found in the ruins of her splendid palace, Thonor Les Baines, Haute Savoie, France. For many years she had lived alone in the palace and when it was burned she was the only victim. Clutched in her hands in death were partly burned certificates representing many thousands of francs, for the lady was very rich. The certificates were so badly burned that it was impossible to identify any of them, except traces of words which proved them to be French and Government securities. Heirs to her fortune are scattered over the world, and one of them is living in this city. She is Mrs. Gregistine, and only a few days ago was handed by her lawyer, E. C. Mansfield, a check for a large portion of the estate. To her it was a Godsend, for since coming to this country her life had been a constant struggle and she was very poor. For several years she had been supported by her son who lives with her in a small cottage. The recovery of her portion of the estate has been a long and tedious process and the end is not yet. Thonor Savoie is near the Swiss boundary and the first step was the correspondence with the American consul at Geneva, Switzerland. He placed Mr. Mansfield in correspondence with a Geneva law firm, who undertook to ferret out the identity of the bonds and securities destroyed by fire. A combination of lawyers were selected to bring up the other heirs and a systematic search made in the public records of several European capitals. Two and one half years have been spent in this work, and the identification and re-issuance of securities have been accomplished. These are issues which were dating from a few days ago the first division of the estate was made, and 104,000 francs were paid to the heirs. There yet remains a large portion of the estate to be identified and it will be many months before the estate is finally divided as not all of the heirs have been located. Mrs. Gregistine is the only one living in this city, but several are said to have been settled in the province of Quebec.

Philadelphia, Aug. 10.—Five persons were drowned last night in the Delaware river by the capsizing of a small row boat. None of the bodies have been recovered. Three men and two women started out about 7 p.m. in a small boat, but had not gone far before a heavy windstorm came upon them, and the boat was caught in a rapid current. The women sank out of sight almost immediately, but the men held on to the bottom of the boat until their strength gave out.

Chicago, Aug. 10.—The effects of the terrible heat were again in evidence this morning. Reports continued to pour in all morning from the various precincts of persons being overcome by sunstroke. Seven deaths were reported, all due to the heat.

Troy, N. Y., Aug. 10.—The intense heat of yesterday is being repeated here today, and many cases of prostration are reported. Two fatalities occurred in cases at the hospitals. The collar factories in the city were closed on account of the heat. The temperature at 11 a.m. was 88 in the shade.

Jersey, N. J., Aug. 10.—There were several prostrations this morning, and four died from the heat.

Stanton, S. I., Aug. 10.—The heat found two victims in Staten Island during the night. Little children suffered there, and there were numerous prostrations.

Chicago, Aug. 10.—The city ambulances and patrol wagons from the police stations were kept on the run all night, bringing victims of the heat to the hospitals. This morning men walked through the streets without coats or vests and passed on and suffered for want of air and shade. Prostrations began as early as 8 o'clock, and were overcome by the heat and dizziness in almost every ward in town.

Brussels, N. J., Aug. 10.—The heat has killed three people in this city.

New York, Aug. 10.—Withdrawals of \$20,000 in gold has been made from the sub-treasury by Canadian banks.

Troy, N. Y., Aug. 10.—Charles P. Bak

ABOUT DR. BROWN

Mrs. Tunnell Asserts The Preacher Was Guilty of the Charges Against Him.

Dr. Brown Retorts That Mrs Tunnell Is a Blackmailer and Reflects on Miss Overman.

San Francisco, Aug. 10.—After months of waiting and evasion, hurried flight from town to town in California and across the southern border, Mrs. M. E. Tunnell has consented to tell the story of her relations with Rev. Dr. C. O. Brown and Mattie Overman, and to explain why she fled at the very moment when her presence was needed to dispel the shadows of scandal or to condemn the pastor who was seriously accused. Mrs. Tunnell is the last witness to speak, and as far as facts are concerned, the testimony she gives closes the great case. She explains the important points upon which the clerical judges of Dr. Brown were in doubt. She removes the elements of uncertainty that made the case a life before pronouncing a final judgment of condemnation.

DASHED TO DEATH

Frightful Trolley Car Accident at Lancaster, Pennsylvania. Last Evening.

Seven Dead and Fifty Injured—Car Was Running a Mile a Minute.

Lancaster, Pa., Aug. 10.—A runaway trolley car on the Columbia and Donegal railway last night killed seven persons and injured fifty more.

The car was returning from Chickies Park to Columbia when the brake rigging broke while descending a steep grade. About 90 passengers were on board who became panic stricken, when they saw the car was beyond control. The hill was a long one, and every moment the runaway gathered additional speed until it is estimated by those aboard that the car was running fully a mile a minute, when it struck a sharp curve and left the track close to a turnpike running parallel with the trolley road, struck against a tree and then toppled over into a deep ditch, being turned upside down.

Those who escaped injury or were only slightly injured crowded from the wrecked car covered with the blood of their more unfortunate fellow-passengers, and at once the work of rescue began. The shrieks of the wounded and the pleadings of those more seriously injured to be killed, put them out of their misery were most pitiable. To add to the horror of the situation there was no light of any kind until some time after the wreck.

The first body taken out was that of Henry Smith, one of the iron workers of Columbia, who had been instantly killed by a piece of wood which pierced his head. Adam Foshinger, the motor-man, was found a few seconds later, having been crushed to death. Near him was Wm. Pinkerton, a Columbia boy, who had met a similar fate. Chief Burgess P. Hess, of Columbia, who had been riding on the rear platform, jumped a few seconds before the car left the track and his lifeless body was found about a quarter of a mile away. His neck having been broken, William Metzger, of Columbia, had both his legs crushed so badly that they had to be amputated and he died a few hours afterwards. W. J. Ludlow, of Seabright, N. J., manager of the Atlantic Fish Co., was so badly injured that he died shortly after being removed to the Columbia hospital. Miss Elsie N. Fitzgerald, of Lancaster, had her left side and head crushed and died at 6 o'clock this morning.

HAWAIIAN ADVICES.

S. S. Peru Arrives at San Francisco With News to August 2nd.

San Francisco, Aug. 10.—The steamship Peru arrived last night from Yokohama and Honolulu, bringing the following advices to the Associated Press:

Honolulu, Aug. 2.—P. C. Jones, ex-minister of finance leaves for San Francisco to-day to float the remaining loan. He expects to sail nearly three and one-half million dollars worth of Hawaiian government bonds, bearing four per cent interest. His contract with the government allows a discount of nearly five per cent, and he will receive a commission of two per cent. Mr. Jones has been given until the 1st of next November to float the bonds. He expects to dispose of them either in New York or Boston.

Letters have been received giving the testimony of eminent men in Vienna on the bacil disease which carried off the natives last year. They give as a final verdict the opinion that the disease was genuine Asiatic cholera, as most of the local physicians pronounced it.

Consul Mills received nothing by the last mail from the friends of the late Kate Field concerning the final disposition of her body and effects. A letter from Geo. Biddle says that Mr. Kohlman of the Chicago Times-Herald will pay all debts of the estate and provide a monument for her grave.

The military trial of Captain John Good has been concluded, but the court has not yet reached a verdict. It is generally understood that he will be dismissed from the government service as the testimony proved he is guilty of conduct unbecoming an officer.

During the trial of a man named H. G. Rhodes, an employe of the government, he testified that he scaled a fence surrounding the government works and then sent the sight from a field piece and then did it through the mail to President Dole. He claims to have performed this feat at night when the sentry was on guard. His story, though generally discredited, may result in the re-organization of the military forces.

Among the passengers from Honolulu on the Peru was Mrs. Sandford B. Dole, wife of the president.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

TOLD BY THE CABLE

Continuation of Attempts to Cause a Riotous Demonstration in Spain.

Land Lords Will Likely Give Up Their Amendments to Irish Land Bill.

Canadian Artillerymen Royally Entertained—The Czar Living in Terror.

Valencia, Spain, Aug. 10.—The attempt to cause riotous demonstrations against the government continues. This city was yesterday placarded with posters "Long live free Cuba," "Long live social revolution," etc. The placards were removed by the police.

London, Aug. 10.—The Duke of Abercorn, Marquis of Londonderry and others of the landlord party in the house of lords who pushed the amendments to the land bill opposed by the government, have issued a manifesto to the effect that the public has attached undue importance to their amendments to the land bill. Editorials in the morning papers very generally agree that this means the landlords will yield to the house of commons and agree to give up their amendments to the bill.

The Canadian artillerymen were entertained at lunch at Woolwich to-day as guests of the Third Kent Artillery Volunteers. Entertainments have been provided for the Canadians throughout the balance of the week. They will be banqueted to-night by the National Artillery Association at Holborn restaurant, upon which occasion 250 persons will be present, including the Earl of Stradbroke, Lieut.-Col. of the First Volunteer brigade, Eastern Division Royal Artillery; Sir Donald A. Smith, Canadian high commissioner; Marquis of Lorne, Col. Middleton and General Herby. Leave dress will be worn.

Berlin, Aug. 10.—In spite of denials it is generally believed that Professor Mendell, the insanity specialist, has been summoned to St. Petersburg to attend the czar, who is said to be in a state of extreme nervous excitement owing to the discovery of renewed nihilist activity. The czar is reported to be in hourly dread of his life, and hundreds of arrests have been made during the past fortnight at St. Petersburg, Moscow, Kieff and Moscow.

There were several suspicious occurrences during Emperor William's recent journey, and they have caused the police to decide to increase their precautions on all future trips. A double inspection of the track and a new minute system in signaling are a part of the creations to be adopted.

Since the London congress the feud between the socialists and anarchists of Germany has been intensely bitter, and there is now a complete split. The socialists deny to the others the right to call themselves Socialists, and to work with the party.

A dispatch to the Neuste Nachrichten from Munich denies the report that Prince Hohenlohe, the imperial chancellor, has resigned, and says that the sole object of his visit to Wilhelmshoer was Emperor William is staying, was to make a report of affairs in the east.

For some time past the government, goaded by the agrarians, has rendered the import of Russian products, especially cattle, horses, pigs and sheep, very difficult. Contrary to treaty stipulations, vexatious fees and inspectors' dues have been imposed, amounting in many cases to 15 to 20 per cent added to the regular tariff rates. Russian fresh meat has been excluded, under the pretext of hygienic precautions. In addition, large shipments of Russian rye and wheat have been refused entry on the plea that they were detrimental to health. Russia has now made the most vigorous protest against this treatment, and the Novoe Vremya states, threatens reprisals.

London, Aug. 10.—Baroness Tennyson, widow of the late poet laureate, is dead. She was a daughter of Henry Sellwood and was married to Baron Tennyson in 1850. Her son, Edgar Tennyson, is the present Baron Tennyson.

CAUGHT IN A CREVICE.

Tragic Death of a Prospector in the Cook Inlet Country.

Port Townsend, Aug. 10.—The particulars of a tragic death of a prospector named Edward Kennah, of Seattle, in the crevice of a glacier in the Cook Inlet country, were received on the steamer Willapa from Alaska. Next to being buried alive or burned at the stake a more horrible death could scarcely be realized. At the bottom of an ice crack eighty feet below the surface, solidly jammed between two walls of ice, Kennah talked to his comrades for about one hour and ten minutes, when his voice was chilled by death.

A party of nine prospectors were walking across a head near Twenty-mile creek at the head of Turn Again arm on the 4th of July. A thin sheet of ice hid from view a crack about 3 feet in width; the party approached diagonally, the end man carrying a gun across both shoulders, when he and the next in line, Kennah, suddenly slipped through the thin coating of ice and disappeared in the chasm below. The other wild cries barely prevented some of the others from meeting with a similar fate. The gun fell crossways four or five feet below the surface and enabled one of the men to be rescued. But the other prospector, Kennah, fell over seventy feet and was tightly jammed between the diverging walls of ice. His voice could be distinctly heard as he directed the movements of his would-be rescuers in their frantic efforts to raise him out of the coffin of ice. Blankets were torn up and tied into long strands and Kennah fastened one end around his body, but the force of the fall had jammed him so tightly between the perpendicular walls of ice, and the chill so benumbed his body and exhausted his vitality that the combined efforts of his partners

HOTTEST ON RECORD

106 in the Shade on Saturday in a Town in Southern Illinois.

Cincinnati, New York and Chicago Suffer Severely—100 Reached at St. Louis.

St. Louis, Aug. 8.—This week has been one of the hottest on record in St. Louis for many years. To-day for the third successive day St. Louis has led the entire country. At 7 a.m. the temperature was 86 degrees. From then on to four o'clock this afternoon, the temperature rose at the rate of one degree or more an hour. At that time the thermometers in the signal service bureau registered 100 degrees in the shade, the highest point in the day. The record in the street and in exposed places was 110. A great many more prostrations were reported to-day, a number of them resulting in death.

Telegrams from points in Southern Illinois show that the intense heat still prevails there, and that many prostrations are reported. The hottest weather of the season at Springfield was recorded to-day, it being 98 in the shade. The Wash shops are closed temporarily. Business was almost suspended at Litchfield, and two men dropped dead from the effects of the heat. At Macomb the past week has been one of unprecedented hot weather. The temperature has gone above 100 in the shade to-day, and reached 106 yesterday. The record to-day was 102. There have been many prostrations from heat.

The city hospital is overcrowded with prostration cases that have been taking place in the past two weeks, and there is scarcely room for more. City physicians say the like has not been known for twenty years. The morgue bodies are brought in so fast that the superintendent had hard work keeping track of them and he is crowded for corpses awaiting identification. To-day the list of these was sent weekly to the heat and died numbers seventeen.

Cincinnati, Aug. 8.—The temperature here for three days has been in the nineties, except yesterday, when the maximum was a trifle below 90. The maximum for the past two days has been 92 and 93, but two o'clock to-day the mercury had risen to 97. The wind was west and blowing steadily. The air was not so humid as yesterday, which made the fearful heat endurable. At 9 o'clock this morning the thermometer registered 89 degrees, but seven degrees less than the maximum temperature on Wednesday. At nearly every street corner prostrate bodies of horses were seen. The following deaths are reported: Michael Glenn, Fred Marks, Chris Hold, Joseph Haman.

New York, Aug. 8.—The decrease in humidity and a brisk breeze brought some relief to-day, although the temperature was about as high as yesterday, 89 degrees. The total number of prostrations officially reported yesterday was thirty-eight.

Nine deaths and forty-five prostrations is the heat record for to-day.

Fargo, N. D., Aug. 8.—A storm of almost cyclonic character occurred in the northern portion of the state last night. The worst damage seems to have been done in the vicinity of Minto and Larimore. No houses are reported blown down, but the damage by wind was considerable over a small strip of territory.

Kansas City, Aug. 8.—The thermometers of the local weather bureau registered 102 degrees yesterday, which is the highest recorded since the local bureau opened eight years ago. The place of observation is the highest in the city. On the streets it was many degrees warmer in the shade, while in the sun it was insufferably hot. In spite of the intense heat very few prostrations were reported. This is doubtless due to the striking about of fatal breezes.

Kansas City, Mo., Aug. 10.—Many prostrations and several deaths from sunstroke are reported from surrounding cities. At Leavenworth a retired army sergeant has died from the effects of sunstroke. At Hardin, an aged man was stricken down and died soon afterwards. At Stillwater, Okla., a laborer died from sunstroke.

Chicago, Aug. 10.—Latest reports show that sixty-five persons were prostrated by heat on Sunday. Twenty were taken to the hospital. One man was stricken down and a servant girl was burned out of a house from smoke and other inmates had a narrow escape. The building was not much damaged.

Woodstock, Aug. 10.—George Mitchell, formerly of Woodstock, and a bride of one year, was burned to death in Detroit while lighting the fire with coal oil.

Kingston, Aug. 10.—The intimation of the Broad Arrow that Major-General Cameron would shortly resign his position as commandant of the Royal Military College is unfounded. The Major-General says he has not spoken of resigning.

Father Point, Aug. 8.—The Allan liner Mongolian from Liverpool passed here inward last evening. Among her passengers are: Lady Tupper, Miss Tupper, C. Tupper, Master W. Tupper, Hon. Dudley Gordon (son of Lord Aberdeen), and a number of members of the Bislew team.

Montreal, Aug. 10.—The reorganization of the provincial finances is complete, and it is stated that when Mr. Atwater brings down his budget it will show a surplus for the past year of about \$200,000.

The early death of Cardinal Tascheran is now announced as certain, although the venerable prelate may linger for some weeks.

St. Thomas, Ont., Aug. 10.—J. W. Paight, aged 62, of Union, is dead from the effects of falling from a load of barley two weeks ago.

AGASSIZ EXCURSION

Thirteen Loaded Passenger Cars Leave Vancouver for Experimental Faam.

The Fruit Growers' Meeting Addressed by Number of Speakers—The Races.

The largest excursion train ever pulled in British Columbia carried the World Fruit Growers and Dairyman's party to Agassiz Saturday. There were in all 14 cars and everyone was crowded. The number from Vancouver, New Westminster and way points up river were about 1100, and a large number came in from the east. In the morning it threatened rain and did rain very heavy before the train reached Agassiz, and for a time after. By one o'clock it had stopped, and with a slight breeze blowing the grass soon dried and a more pleasant afternoon could not have been ordered for the occasion. Agassiz people were surprised. They could not imagine that such a crowd would ever visit their little village. A very large tent or pavilion had been put up in a grove on the experimental farm grounds in which tables were erected to accommodate visitors with baskets. The train was switched on the side track and many had their lunch in the cars, whilst the hotels were taxed to their utmost capacity.

About two o'clock the Vancouver band struck up a tune in the large barn on the experimental farm and the crowd soon gathered there. The fruit growers and dairymen assisted largely in making the excursion a success. Superintendent of the farm, who welcomed the visitors and spoke of the work done on the farm.

J. R. Anderson next addressed the meeting in an able manner, and dealt with many matters of vital importance to fruit growing.

J. C. McLagan, of the World, made a very happy speech. He was, it is needless to say, delighted with the success which had attended his exertions in getting up the excursion. He spoke of the good work done by Mr. Sharpe in converting a forest into a veritable garden, and one of the most delightful spots in British Columbia.

W. Templeman, of the Times, was the next speaker. He complimented his old friend Mr. McLagan for the great success of the excursion, and Mr. Sharpe also for the grand work that he has done on the farm. He did not intend to speak at length as he knew the excursionists came to enjoy themselves and not to listen to long speeches.

Mr. W. Boulter, an extensive fruit grower of Prince Edward county, Ont., was then called upon for an address, which he gave in a very happy manner and was followed by J. A. Ruddle, who was present with the travelling dairy. After the usual vote of thanks the meeting of the fruit growers was closed. Dancing was then commenced in the barn and outdoor sports were carried out according to programme. Three couples competed in a bicycle race, the course being from Harrison Hot Springs hotel to Agassiz. The travelling along the race was fought for the wheels, yet the five miles intervening between starting and winning posts were covered in 25 minutes. Mr. and Mrs. Kelly were the winners, with Miss Emmanuels and Mr. J. W. Prescott a good second.

The train left Agassiz for return at 7 o'clock p.m., and the tired excursionists reached Vancouver at 10:45 after a most enjoyable day's outing.

A TRIBUTE FROM LI HUNG.

London, Aug. 8.—Li Hung Chang to-day proceeded to Trafalgar Square, where the members of his suite placed a wreath upon the pedestal of Gordon's statue, which Li closely examined with an opera glass; afterwards he made a solemn and deep obeisance before it. The Chinese envoy's example was followed by his suite and the crowds of onlookers cheered. The wreath was composed of purple flowers, surmounted by laurel, emblematic of victory, and had a border of white flowers, as typical of General Gordon's purity and disinterestedness. It was inscribed: "To a Soldier and Friend of China. A Tribute of Respect from Li Hung Chang." The Chinese statesman then drove to St. Paul's cathedral and placed two wreaths upon Gen. Gordon's cenotaph. They bore inscriptions similar to the ones upon the wreath placed upon the pedestal. Li Hung Chang was received at the Cathedral by Canon Newbolt; General Sir Redvers Buller, adjutant-general of the auxiliary forces of Great Britain.

ROYAL Baking Powder.

Highest of all in leavening strength.—U. S. Government Report
