should

The Slocan district undoubtedly has a great future before it. There are some 1,900 claims recorded in the Slocan City men "Fifth-Will it be mined? That is to office. Evening Star and Columbia, Ar-lington, Regina, Black Prince and other say, has the management the resources and the purpose to carry on active development work, or is there a proba-bility that the enterprise will be floated can City, which is growing rapidly. The and then dropped?" The caution outlined in the above will the news of the rich strike and the own-

The caution outlined in the above will apply to any locality where mining is carried on as well as to Republic. The thing that is to be most feared is the dishonesty of a company's management. Some individuals associate themselves together simply for the purpose of swindling. They prefer the casier method of mining in the pockets and together simply for the purpose of swindling. They prefer the casier method of mining in the pockets and company threw up the property that all the rich ore had not been taken out. The men who have always stuck to the confidence of the public to the harder working of extracting values from the rock ribs of the earth. The sole idea of combines of this sort is to cheat and opinion that there was an abundance of rich ore if it could only be gotten at have fleece those who invest in their shares. They are swindlers and wildcatters by turned out to be miners of good judg-

nature and are only a detriment to any ment At this writing it could not be mining camp in which they may locate. ained just who the owners of the Two They follow every new mining excite-ment just as vultures follow an army, as tained just who the owners of the Two Friends are. Con. Murphy owns at least a quarter; R. Marpole, of the C.P.R., an-other quarter; A. York & Co., an eighth; Mr. Sloan an eighth and the rest is di-vided up between Mr. Cramm, banker, of Slocan City; F. S. Andrews, barrister, of Nelson, and others. One thing that gives satisfaction here is that most of the mine is owned by Slocan City people. Le Dei Mining Company Limited birds of prey. In the rush and termoil of a new and rich mining camp, when it is difficult to tell the false from the true, the good from the bad, they are successful. Their chances for suc-cess diminish when the camp gets old enough to separate the sheep from the goats, and then they are compelled to seek new fields in which to ply their Le Roi Mining Company, Limited. London, Dec. 6.—The prospectus of the Le Roi Mining Company, Limited, nefarious calling. In the early history of Rossland there were nen of this type here and they did some wildcatting which for the time being injured the was issued this morning. As has been already announced, the capital is £1,-000,000 in 200,000 shares of £5 each, In time they were weeded out the camp is free from them now. of which are now offered for subscrip-As, however, the share-All the new camps will pass through a tion at par. similar experience, as Rossland has, and helders of the London and Globe Fibe similarly injured by these gentry. nance Corporation and British America One thing of importance that should be taken into consideration by investors Corporation have the right of preferential allotment, it cannot at present be ascertained what chance the general mining shares is that the company uld be strong financially. A compublic will have of getting shares. If pany that has only a small amount of reports are true they will not funds on hand might have a Le Roi, a much show, as it is said that nearly all Centre Star or a War Eagle, but if it the holders in the two corporations undid not have enough capital to develop der whose auspices the Le Roi is brought out have decided to take stock. its property it would be useless to it. The management might be as honest as it could possibly be and yet fail, and the The subscription list opened this morning and will close on Thursday next

it could possibly be and yet the hands of property finally fall into the hands of the sheriff and thus make all of the company's stock valueless. The ability of a company to carry out the develop-ment to a paying conclusion, provided the property has merit, is therefore a thing that the investor should know something about before he puts in his remean. These and many other things should be looked into by the intending investor. In fact, should an investor directors of the British America Cor-poration. Mr. F. A. Labouchere, secretary of the British America Corpora-ticn, is also secretary of the Le Roi Company, and the offices are at the company, and the offices are at the use the same caution that he displays in other business transactions, when pur-chasing shares, there would be less losses than there are.—Rossland Miner. Company, and the offices are at the same place, 15 Austin Friars.

The purchase price has been fixed by the British America Corporation at ±950,000, payable in cash or fully-paid Struck it Rich in Two Friends. 18.-A rich Dec. strike of silver-bearing galena ore was made last evening on the Two Friends mine by the lessees of the Bank of Eng-land mineral claim, E. M. Teeter, A. L. Teeter, J. A. Foley and A. York, who had secured the right of way through the lower workings of the Two Friends and right to extend and use for working purposes the drift from the Two Friends Roi tunnel into the Bank of England min eral claim. The ledge was encountered after driving about 25 feet and close to Bank of England mineral claim. M. Teeter, who is responsible for the location of this new strike, predicted such results for some time. Both the owners of the Two Friends and lessees of the Bank of England are to be congratulated on their good luck and the lessees have reason to be gratified in this confirmation of their mining judg-Both the local owners of the Two Friends and lessees of the Bank of England start in the morning to make a thorough investigation. John Foley, a prominent man here, was an eve witness to the strike and vouches for it. He states that a vast amount of ore will be accessible to the new workings. He says they have already penetrated about government mine inspector; N. T. Tre-government mine inspector; N. T. Tre-geer, M. E., superintendent Le Roi, and (by letter) E. P. Rathbone, M. I. M. M., M. I. M. E., A. M. I. C. E., late govinches and the end is not in sight. Two Friends mine has had a The checkered career. Nearly four years ago Gon Murphy, Pete Schomberg and George Gormeley, well known prospec-tors, discovered it and staked out the ernment inspector of mines, S. A. R. From these brief reports investors can claim. They set to work at the mine, draw their own conclusions. Mr. Carlyle cables: Le Roi mine, 70 took out thirty or forty tons of rich ore, and then tied it up. A company, with Mr. Innes as president, stocked the mine, acres, title perfect; total dividends \$995,000. A proof of average value is The company ran a tunnel 200 feet into shown from treatment of 56,000 tons. which yielded 85,000 ounces of gold, 81,-The company ran a tunnel 200 feet into the mountain to tap the vein, which ran east and west. A shaft 110 feet deep east and the ore stoped to the surwas surk and the ore stoped to the sur-face. The mine proved very rich and it was not long before the company had shipped \$44,000 worth of ore. That was all they did, for the rich ore had run out. Working west on the vein the company found that the rich ore termine ated at a wall of blank porphyritic dyke. This was about 40 feet from the shaft. To the east about 40 feet from the shaft. level here; the lowest level, 700 feet, the or split in seams and became less mineralized, the vein having swung off shows chute 30 or 40 feet wide, some other direction. Work was then pay ore on each wall six to eight feet mmenced to locate the vein again and wide; average for whole width will commenced to locate the vein again and four different tunnels were run north in-to the mountain, ranging from 100 to 150 feet in length, and drifts from these west end not yet reached; hence, large were run, but all to no avail, as the vein

in sight will greatly enhance profits. Mr. John M. Long cables: Le Roi shows three separate veins surface; all work confine to one—Le Roi vein-Mine developed by shaft 800 feet deep, started in one body 200 feet long, aver-aging 5 feet wide, increasing to 15 feet before 400 level mached this churte hor NEWS OF THE NORTH. The case of James Stephens, the old colored man who was found in a dirty and almost destitute condition in a cabin two days ago, has accentuated the complications which have of late become no-ticeable between the city and the hospital authorities. The inadequate accommodation for those temporarily detained for examination for insanity has long been a subject of comment among the medical profession and the hospital authorities, and the case of Stephens seems likely to draw public attention to this matter and to other questions connection with the management of the hospital. An examination was made of Stephens

yesterday by Dr. Fraser, the city's medi-cal health officer, and he found that the old man was suffering from mental derangement, evidently induced by neglect and by the wretched life which he had led. Although suffering from hullucina-tions of various kinds, the oldaman seems perfectly harmless and quiet, and as he is over seventy-five years of age and so feeble as to make little resistance. the most natural place for his treatment

hospital. It was, in his opinion, very unfortunate that the isolation and Ju-bilee hospitals were not under one management, in which event cases of this nature could be accommedated in some of the cottages and attended to by the iospital nurses.

Dr. Fraser, who ordered the admis-sion of Stephens, holds the opinion that the old man is more rational than a number of the lamates of the Old Men's Home. There are several there who have similar delusions to those entertained by Stephens, but he says no one would think of sending them to the asylum for the insane. The old man is so old and ill that Dr. Fraser does not

The city contributes \$5,000 a year to the hospital funds, and it is feet that cases sent in by the city's medical of should be treated with grater consideration.

station. President Wilson of the hospital board Mr. Curry, silver shoe horn and button was seen this morning and said that the action of the resident medical officer Miss Warner, silver salad fork. Capt. and Mrs. Grant, set of fruit dishes. Miss Smith, vases. Messrs, McNeill (Vancouver), handsome was, in his opinion, quite justifiable. He pointed out that the regulations regard ing free patients expressly forbade admission of cases such as that botograph album. Mr. and Mrs. Rose, silver butter knife as that o

Stephens. The regulation reads: "Any person, being a bona-fide resident and sugar spoon. Mrs. and Miss McNell, water set. Mr. James Maynard, slippers. Mrs. Walker and Mrs. Cleveland, oak of the province, destitute of means, not insane nor lunatic, nor afflicted with any chair. infectious, contagious nor incurable disease, on producing a card of admissio signed by two directors, and a certificate signed by any registered practitioner of the province, that he or she is a fit The bride and groom were presented with a very handsome cherry wood secre. tary, with brass trimmings, by five young subject for hospital treatment, is men of the Calvary Baptist church-James ted after inspection and approval of the Strachan (brother of the bride), Hector esident medical officer." Mr. Wilson said that he had known Galbraith.

Wriglesworth, Charlie McNeil. the man for years, that he had been in same for a long time, and practically lived on the small sum donated to him For some time he lived in a little cabin in the woods in the outskirts of the city, and called himself God, while he was constantly haunted, so he said, by evil spirits. The directorate had the greatest difficulty in keeping such cases out of the hospital.

Director Shotbolt, one of the two who filled in the card for the old man's application, said that there were only two ways in which to dispose of such cases, and if the man was unfit to be sent to the asylum he should be taken to the

Fat is absolutely neces-

sary as an article of diet. If it is not of the right kind

it may not be digested. Then

the body will not get enough

of it. In this event there and is fat-starvation.

Scott's Emulsion supplies this needed fat, of the right

kind, in the right quantity,

and in the form already

partly digested.

NOTICE.

THE WELSH DONS. The public heard some days ago that a student of the Ladies' Hostel attached to Aberystwith College has been expelled for talking to a student of the other sex. Now it is announced that, "after long and careful deliberation," the senate have re-voked this decree, condemning the young man instead. Such an admission of falli-bility, in so short a space of time, has never been recorded, probably, in the long annahs of Oxford or Cambridge. It is creditable in a sense to the younger insti-tution that the authorities confess an error so promptly; but, oh the other hand, we are led to suspect that the first judgment was delivered in haste. It is "after long and careful deliberation was it which led them to the opposite conclusion? No wonder that the culprit's fellow-students made a demonstration which showed dis-respect for the governing body when he respect for the governing body when he selvers in black, draped their academic gowns like cowls, and so marched to the station after him, singing the "Dead March" and fumeral hymms. And the spec-tions sympathized, apparently. This young man stood and whisided under the ladys window, and why not? It is an immemo-rais submathized, apparently. This young man stood and whisided under the ladys window, and why not? It is an immemo-rais winess the antique song. "On Wortheth at matter, the same usage prevails in England, even in London. And, of torus, the young man, too, came, if only to the indiscrete yount to go away. So the story strikes these honest Welshmen. The students have shown their feelings by pre-string the offender with a "benutiful mar-bet thereplece and a silver plated inkstand." The they lews of the senate in the matter are, to say the least, intell'gible; it is the proversion of the fundyment within a fort-iter on say the least, intell'gible; it is the proversion of the senate in the matter are, to say the least, intell'gible; it is the proversion of the platent within a fort-iter to say Notice is hereby given that application will be made to the Legislative Assemb of the Province of British Columbia, at it next session thereof, by "The Canadia Yukon Rallway Company," for an a remonfunction of the Statutes amending chapter 50 of the the said Province of British the year 1898, entitled "An ing the Canadian Yukon R. pany," by striking out of y," by striking out section 40 thereof, or pany, by thereof, or by and 50, section 40 thereof, or by and "said section 40 by inserting "eighteen" in l'eu of the word the first line of the said section by inserting the figures 1900 the figures 1899 in the sixth 1 section 40.

Beection 40. Dated at Victoria. B.C., this 7th day of December, A.D. 1898. FRANCIS B. GREGORY. Sol'citor for the Canadian Yukon Rai way Company, the applicants.
