

OUR COUNTRY CORRESPONDENCE.

FREDERICTON.

Fredericton, July 4.—(Special).—A young man giving his name as George Murray lived at City Treasurer Golding's livery stable on Tuesday last to drive to Stanley, 25 miles from here. He was to return the next day but has not yet put in an appearance and no trace of him can be found. He was dark in complexion with a black moustache, wore dark clothes and a cap, is about five feet six inches tall and about 24 years old. The rig was one of Mr. Golding's best, a bay mare and a covered carriage.

Murray's apparent respectability and knowledge of Stanley and surrounding country satisfied the manager of the stables that everything was all right. He referred to well known people as his connections but they know him not. He said he had been working on the boom but nobody by that name has recently been paid off. A man talking with Murray's description called at McThorn's stables on Tuesday last and engaged a horse for the following Thursday to drive to Newcastle, Queens county, but he failed to put in an appearance that day.

Messages have been sent in various directions without result and it is feared the man has slipped away. He is being sought by the police.

Fredericton, July 4.—(Special).—Wentworth Winslow, of Woodstock, has been the guest of E. Byron Winslow, St. John street, went to the Victoria Hospital today to have an operation performed on his eyes. The operation was successful. Doctors Atherton and Bridges were the surgeons in attendance.

Paul Brewer, of Saunders street, an employee at the Aberdeen mill, was taken with appendicitis yesterday and this morning was operated on at the hospital by Doctor Vanwart, assisted by Doctor Weaver.

Prof. G. W. Gamon, of Smith's College, Northampton (Mass.), is in the city accompanied by a friend. They will leave Monday for the Tobique where they will spend several weeks in scientific investigation.

Two shares of the capital stock of the People's Bank of New Brunswick were sold at auction today by Auctioneer Wetmore. They were bid in by Auditor-General J. S. Beek at \$27 a share. The stock entries with \$2 each each share as may be decided after June 30, of the present year. The par value is \$150. A few weeks ago seven shares were sold at \$250 a share, but they carried the semi-annual dividend of 4 per cent.

Colonel McDougall left last evening for Halifax, having been ordered to proceed there at once, although he expected to remain here until Monday. Mrs. McDougall and son went some days ago to Little Metis, where they usually spend the summer. Colonel and Mrs. Dunbar left for Quebec this morning. Although they are in their native city yet both the Colonel and Mrs. Dunbar express their regrets at leaving Fredericton. The citizens regret the departure of these two officers, even should they be going merely that Col. Wadmore has returned to the city where he was popular when stationed here on a former occasion.

Fredericton, July 4.—(Special).—The young man who hired the rig at Golding's livery stable Tuesday last, has not yet been found. It is supposed that his name is Thomas Dewitt, of Riverview. Nothing has been seen of him at that place.

Scott's saw mill, at Springhill, has been equipped with electric light and will save by night for the balance of the season. Rev. J. D. Vernon, pastor of the Baptist church at Hartland, passed through here tonight en route to Springfield, Kings county, to spend his vacation. He is accompanied by Mrs. Vernon.

The adjourned sitting of the York Circuit court will open tomorrow morning, Justice Landry presiding.

Hon. C. H. LeBlond, commissioner of public works, is in the city.

Residents of Stanley and other settlements along the Naswaak are very desirous that a fishway should be constructed at the Marysville dam. The older ones remember when Salmon abounded in the Naswaak before the dam was made. There is a movement on foot to interest the tourist associations of the province in the matter.

HAMPTON.

Hampton Village, July 4.—On Sunday afternoon the officers and members of the Corinthian Lodge, F. & A. M., marched to the parish Episcopal church by way of the village and returned by Lakeside. The Hampton Cornet Band accompanied them. Rev. C. D. Schofield, chaplain of the lodge, and secretary of the parish, conducted the service and preached to a large congregation.

President, J. F. Edmondson, of the United States & Canada Coal & Iron Company, who has been detained at Wakefield (Mass.), on account of sickness in his family, is expected back every day. Professor Sharples, state assayer of Massachusetts, has said that the analysis of the coal in the mine at Norton resembles a fine burning anthracite coal. The analysis gives between 81 and 85 per cent. carbon; moisture and volatile, 10 per cent.; ash, 5 per cent.; while the sulphur was so small that it was not considered necessary to reckon it in the analysis, it being only 1.0 per cent.

H. Larkin, jr., mechanical engineer for Frank H. Gilbert, of Boston, is here accompanied by his wife. They visited the coal mine on Friday and will return when the machinery is in operation. Mr. Larkin took samples of the coal with him. A moose crossed Albert Fairweather's meadow at Lower Norton, one day last week and proceeded down the road to Alexander Prince's, where he entered a potato field and pawed over some of his potatoes, subsequently continuing his journey down the shore road to Perry Point, where he swam towards Rothesay. Three deer were seen at the Ravine about the same time.

David Prince, the Lower Norton fisherman, says there seems to be a new run of shad and some of them are good ones. Miss Mildred Frost is in St. John for a few days, the guest of her uncle, Clement Rutherford.

Miss Townsend, of Boston, and Mr. and Mrs. Parker, of Halifax, are guests at Riverview Hotel.

Kenneth Warfield, son of Dr. Percy Warfield, is home for an excursion by moon light to Fredericton on the steamer Clifton, leaving here on Friday the 11th inst., at 8 p. m., arriving in Fredericton early on Saturday morning and staying home early Sunday morning.

Harry McLean, who has been cruising with Capt. Pratt, of the Curlew, has returned home.

George Dineen, of Germain Point, is acting as night operator at Coldbrook. Fred M. Sproul, post county master, went to Collins Corner Monday evening to visit Sproul Lodge, No. 10, where he initiated seven members and conferred the royal arch degree upon 12. He was met at Apohaqui by leading men of that place and requested to organize another lodge between Apohaqui and Millville.

Mrs. Scott Ebb and child have gone home to live with their father at Bellisle.

Mr. and Mrs. James Snodgrass will celebrate the twentieth anniversary of their wedding Monday next.

The sale of Henry Baxter's farm at Central Norton, advertised for Saturday last, was postponed for a week.

The G. G. Flowering Co., Ltd., have had painters at work giving their store a coat of brick colored with light trimmings.

Wm. Beatty has built for himself a bicycle boat. The propeller is attached to a rod which in turn connects with a bicycle from which it receives the driving power. Two narrow canoes, decked over and placed parallel a short distance apart, support the voyager who spins along on his bicycle on the water without chance to upset.

CAMPBELLTON.

Campbellton, July 6.—The wet weather having up, business operations are in full blast. Mr. Titus has started his large three-story building on corner of Cedar and Water streets. William Compton, photographer, has well under way a large three-story building on north side of Water street, West End. The Methodist and Baptist congregations are adding large stone additions to their churches. The Albion Hotel improvements are now about completed, many necessary changes having been made to meet increasing business.

John Henderson has sold his lot and store on Water street to Sylvester Martin, by whom it is being conducted. Mr. Henderson still continues business on a recently fitted-up store on Prince William street.

Chapeltonians have great confidence in the continued growth and prosperity of their town, being now second to none in the province as it is now.

Shives-Stetson Company will build the largest lumber and wood-working mill in the province, near Campbellton. The mill of the New Richmond Lumber Company, at New Richmond (P. Q.), is now being taken down to be removed to Little Metis, where they usually spend the summer. Colonel and Mrs. Dunbar left for Quebec this morning. Although they are in their native city yet both the Colonel and Mrs. Dunbar express their regrets at leaving Fredericton. The citizens regret the departure of these two officers, even should they be going merely that Col. Wadmore has returned to the city where he was popular when stationed here on a former occasion.

Miss Townsend, of Boston, and Mr. and Mrs. Parker, of Halifax, are guests at Riverview Hotel.

Kenneth Warfield, son of Dr. Percy Warfield, is home for an excursion by moon light to Fredericton on the steamer Clifton, leaving here on Friday the 11th inst., at 8 p. m., arriving in Fredericton early on Saturday morning and staying home early Sunday morning.

A motion to reduce the pay of council-

lors, while attending the sessions, from \$3 to \$2.50 a day was not seconded.

G. Hugh Harrison, principal of the Woodstock Grammar School, finished today a three days' examination for matriculation and normal school course. Twenty-two candidates presented themselves, several of whom are from Centreville and Florenceville, Carleton county.

There is quite a building boom now in evidence and several fine buildings are well under way.

HOPEWELL HILL.

Hopewell Hill, July 4.—At a meeting of the ratepayers of this school district today, the matter of having a central school under the Sloyd system in this section was discussed. The were present from Riverside, ex-Governor A. R. McClellan, W. E. Reid, D. W. Stuart, Capt. H. A. Turner and Mr. James McLeath. The meeting was held at the residence of Mr. E. Smith. He is accompanied by Mrs. Barker and family.

The bee keepers in this vicinity say that the cold, wet weather has destroyed a lot of hives and that there is very little honey in the flowers, and some hives have to be artificially fed.

NORTON.

Norton, July 4.—On Monday evening last a number of the pupils of the advanced department of our school met and presented their retiring principal, J. W. Bennett, with a very handsome silver-headed cane engraved with his name and the name of the school presenting it. Mr. Bennett has been principal here for 20 years and is now retiring from the profession.

Rev. Father Byrne will hold his annual picnic here on July 15. These picnics have been held for many years and have been but in the surrounding country, because of the very successful efforts made in providing amusement and entertainment for the young people.

Mrs. J. W. McAlary, of St. John, is visiting at St. Allison's.

A. W. Hickson and family, of Campbellton, are visiting Mr. Hickson's brother, James Hickson.

Miss Ora Sharp, of St. John, is visiting friends in Norton and vicinity.

John Mackinnon, of St. John, spent yesterday in Amherst, the guest of his brother-in-law, R. J. Lawson.

Rev. Stephen Brownell, D. D., of West Barre, visited his wife and child, who are visiting his father, William Brownell, at Northport.

About \$10 worth of whiskey was removed from the Canadian express office Tuesday evening by unknown parties.

The Point de Bute Baptist church celebrated their 25th anniversary last evening. The church was crowded and the services were held. The clerk read a short sketch of the church. The roll was called, a large number responding.

Rev. J. D. Vernon, pastor of the Baptist church at Hartland, passed through here tonight en route to Springfield, Kings county, to spend his vacation. He is accompanied by Mrs. Vernon.

The adjourned sitting of the York Circuit court will open tomorrow morning, Justice Landry presiding.

THE NATIONAL COUNCIL OF WOMEN.

(Continued from page 2.)

promote manual training. That province has 11 schools where there were only one two years ago. Ten more will probably be opened next year. In New Brunswick, thanks to Doctor Inch, a bill asking in decrements to introduce manual training was presented at the close of last session.

Everywhere the schools are proving important and should occupy the closing years of the term.

Professor Kidner expressed the hope that soon every school in this province would be teaching domestic science and manual training.

Mrs. Hoodless, of Ontario, regretted seeing manual training and domestic science separated subjects on the program. The educational value of the two subjects is about equal, the same principles are applied, only one is more directly to the women in the home.

The present danger is that this rising spirit will absorb the other three great forces. Provision has been made for the church and school, but the corner stone of the structure—the home—has been left unprotected. Instead of finding pleasure in the home circle women now are in the interest of pure air, showing the result of this. The two links which should be most closely united in the social chain are the church and the school. The new education aims to affiliate the school with life. In nearly all the universities in the United States a department of domestic science has been established. Domestic science is as the name implies—the application of scientific principles to the management of the home. It teaches the value of pure air, proper food, economy of time, labor and money, sanitation, care of children, nursing, etc.

As an impetus to the new movement, Sir William Macdonald, of Montreal, has given \$125,000 for establishment of a training school of domestic science in Quebec for teachers, with special courses for those who do not wish to teach, in domestic science and give warmer air, study and manual training. The school open to the Dominion.

The speaker hoped New Brunswick may will maintain by Ontario, though follow the good example of Nova Scotia and Ontario, and urged the ladies of this city to give the matter earnest attention.

Doctor Inch, provincial superintendent of education, pledged his personal and professional influence to any movement along the line of domestic science. Freilich has had an opportunity of studying manual training, and all are agreed as to its practicability in the schools. It seems to stimulate and give warmth and attachment to the schools on the part of the pupil. The cost of the system can be met by the sale of the surplus of the people. The speaker regretted that the same attention had not been shown in the cultivation of domestic science here as in Nova Scotia and Ontario, but he trusted this would soon be remedied and that though the words domestic science had been used, it would be presented to the legislature, it would not interfere with its development. If this interfered with it he felt sure the government would amend the law.

That adds to the hygienic conditions of the home, its purity and happiness helps to the well-being of the nation. There is no need for this now than at any other time. Manual training was not so good now as in the last century and under present conditions the home is neglected and the nation is suffering. It is a pity that the women of last century knew more of domestic science than the woman of the present day.

Rev. John deSoyres made a brief and witty speech in which he highly complimented the speaker and the ladies, and said that the women of last century knew more of domestic science than the woman of the present day.

Rev. John deSoyres made a brief and witty speech in which he highly complimented the speaker and the ladies, and said that the women of last century knew more of domestic science than the woman of the present day.

Miss Wilson will address the meeting. The nurses here are now making 200 visits monthly, it will be interesting to hear all about the work.

There is still much business to be transacted, but the various forms of entertainment offered have been so attractive that frequent adjournments were necessary. Anything that prolongs the stay of the ladies will be welcomed by St. John. Ontario must have some pretty people according to Mrs. Hoodless. Even our school girls know how to make a lined poultice and have first aid to the injured at their finger tips and all without a domestic science school.

New Brunswick isn't a bit jealous of Nova Scotia even though that province is getting all the bouquets just now.

Bachelors were out in force last night to hear the talk on domestic science and stored up some valuable knowledge for future use.

Mrs. C. E. MacMichael wanted to open the meeting of the King's Daughters with a chapter from the Bible yesterday, but the Good Book could not be found in the building.

Mrs. Nicholson Cutter will speak at 4.30 today on Physical Culture; Its Place in Education. Gentlemen are invited to be present.

WOODBRIDGE'S COUNSEL OBJECTS TO TAKING UP IMMORALITY CHARGES

(Continued from page 2.)

at the inquiry. The commissioner said that none need fear any interference with the witnesses while giving their testimony for if he saw or learned of anyone doing anything of that kind he would have no person excluded whether he was a party in interest in this inquiry or not.

Mr. Prince, a teacher of the institution, and Mr. Neville, a collector, were allowed to go. The former had been subpoenaed as a witness but it was stated he would not be needed to give his evidence today and notice would be sent him when his presence was desired. Assurance was also given that Mr. Prince was in no way implicated in the immoral charges.

At this point the public and press representatives were excluded and the evidence taken with closed doors.

In consonance with the desires of the commissioner, The Telegraph will not publish the evidence taken in camera. This is the more desirable as much of the evidence given yesterday was such as could not be published in a journal of the home such as The Telegraph seeks to be.

For adjournment it was suggested by Mr. Plimley that it would be an expensive matter to keep so many witnesses in Fredericton and suggested they be allowed to return home and an adjournment was set for St. John later to take their evidence.

Commissioner Barry intimated that the attorney-general on behalf of the government had spoken to him in regard to the saving of expense which might be effected by holding a session in St. John, and had authorized him if he felt it necessary in the interests of justice to the committee of the institution to pay the expenses of three of the committee to and from St. John.

The commissioner intimated he would probably agree to such a session being held in St. John but would announce his decision formally in the morning.

THIRD POLITICAL PARTY.

Grand Lodge, I. O. G. T., Sitting at Truro Urges Establishment.

Truro, July 4.—The Grand Lodge of the Independent Order of Good Templars has been in session in Truro for a day or two and this morning the delegates left for home. The sessions, excepting a public meeting last night, were behind closed doors. Nothing of public interest was accomplished, but a resolution respecting political action was adopted which calls for all good templars to go out as a political party. The resolution was as follows:

"Whereas, both political parties have in the past betrayed our interests time and time again, and judging by the past we can expect nothing from either;

"Therefore, we urge all Good Templars to completely withdraw from both;

"We further recommend that steps be taken to secure the cooperation of the different churches and temperance and labor organizations for the purpose of establishing a prohibition party."

The new officers elected are: G. C. T.—W. H. Thurston, Yarmouth. G. C. O.—Sydney Purdy, Wentworth. G. V. T.—Mrs. Dickey. G. S. J. T.—Mrs. Dickey. G. Secretary—W. O. Creighton. G. Treas.—E. Jew. G. C. T.—Mr. Simpson. G. Chap.—Rev. J. A. G. Belyea. G. Marshal—M. E. Hunt. G. D. M.—Miss Mabel Oymann. G. Grand—Mrs. A. B. Fieldier. G. Sent—Seymour Carley. A. S.—I. Thomas. G. Mess.—Finch Simpson.

TRIED TO KILL FAMILY.

Chicago Laborer Murdered Sleeping Wife, and Wounded His Child.

Chicago, July 6.—Through revenge for a quarrel Theodore Oelzefer, a laborer, shot and killed his wife, today as she lay asleep in bed. He then shot his baby son, and stepdaughter, who were sleeping with his wife, wounding the former probably fatally and putting a bullet in the latter's shoulder. He also fired a shot at his two step sons, but hit neither. He was arrested.

Freight Ditched and the Unprofitable Packages Are Dumped Out.

Chicago, July 6.—A freight wreck on the Lake Shore and Michigan Southern railroad at 90th street today, resulted in the injury of seven men who were beating their way to Chicago. Eight cars filled with trunks were telescoped, and shouts of pain came from men buried in the wreckage. Many of the trunks were not severely injured, and as soon as they gained their liberty they ran away. There were at least 50 trunks containing clothes in the cars.
