

# RU-BER-OID ROOFING

Is the peer of any composition roofing made.

It has a proud record of service, covering more than a quarter of a century.

On many a roof the limit of its endurance has not yet been found after more than twenty years of duty.

Inborn quality, from the surface to the centre, is what gives RU-BER-OID its character.

We would suggest you consider this, for your own benefit, when planning to purchase a roof covering for that new or old building.

in the protected zone is sufficient to offset fully the effects of shading and sapping. In a wheat field protected by a dense windbreak the grain amounted to about 10 bushels per acre where the protection was most complete, and gradually grew less as the distance from the windbreak increased. The total gain was about equal to the amount of grain which could

have been grown on the shaded ground near the trees. The season in which the measurements were taken was not of high winds, nor did it lack moisture. It would appear, therefore, that in a windy year when evaporation was high the total gain for the field would be much more than balance the loss. In another case, barley on the south of an ash and honey locust windbreak

## "Canoes that have made Maps and History."

EXPLORERS, TRADERS AND TRAPPERS HAVE KNOWN THE QUALITY OF LAKEFIELD CANOES FOR OVER FIFTY YEARS

When Canadian forests were in their pristine glory and when the canoe was the chief means of wilderness transportation, THE LAKEFIELD CANOE was being made and sold. We build Canoes and Boats for every known purpose and have several models with different sizes in each for every possible requirement.
