care for it. Your daughter should explain to her that you were simply keeping the picture until she found a suitable place for it. If you try to understand this mother's devotion to her son's portrait you will forget your anger. For your daughter's sake, try to maintain good relations with her relations. Just forget what happened. Dear Susanne: Tom and I have been married for four years and get along well most of the time, except when we go out to a party or to someone's house. We're there not more than five or 10 minutes when Tom is over at the other side of the room talking to the other boys and Em left alone with the women and frankly I don't care for all that girl talk. I'm tired of hearing about their children and what they cooked for dinner

last night and what they're going to wear on Saturday. I've tried to get both groups to mix but all I get is dirty looks and an argument from Tom when we get home. With all that is going on in the world today you would think people could sit down and talk intelligently without worrying over whether it's man talk or girl talk. I like our friends but I don't enjoy our evenings out this way. What can I do to make them see things my way? No Girl-Talker

Dear No:

If yours is a young group you can suggest playing games where everyone has to participate. Or you can simply go sit with the boys and talk to them. Or you can make your girl talk so stimulating that the boys will come and join in. Plan a few topics you would like to discuss before you go out and see what happens. Whatever you do, though, it's not worth arguing about with Tom or you'll have him joining the girls,
