

GENERAL REMARKS.

In addition to the information called for in the twelve queries, and the three supplementary ones annexed—you will state, under head, any information of importance to the interests of the Indians, that may from time to time come within your knowledge, not only as regards this or any other particular Lot, but with reference to any matter connected with the Tract.

SUPPLEMENTARY.

1. State the minimum quantity of Land which will be actually and necessarily required by the Grand River Navigation Company, to enable it to complete the work from its present navigable termination to Brantford, and the full value of it; and let a diagram of the same, with full references, accompany your report.

None

2. In all instances where the clearances of Squatters or of Indians are irregular, so that they cross other Lots, as laid down on the old or new surveys, you will report the best method of adjusting such inconveniences without doing injustice to parties interested; you will state as correctly as possible, the fair and reasonable price which any one party should pay to another in the event of the improvements of the former falling within the limits of the latter, and transmit with the said information, diagrams or sketches, shewing how the proposed arrangements are to be made.

Malashe Files occupies the North end of this Lot. Barnard Files the middle part and John Files the South end. The parties have agreed to divide the Lot amongst them in the manner marked on the map.

3. What blocks, lots, pieces or parcels of Land, should be reserved for Town Plots, or sites of Villages, and let a Plan shewing their relative position, accompany your report.

None
