

You cannot expect good work from a furnace unless it is properly installed.

You cannot buy a Furnace like you do a Stove—send it home and have the "Handy-Man" put it up—not if you expect to get all the heat out of your coal.

¶ Your heating system must be planned. The registers must be properly placed. The warm and cold air ducts must be a certain diameter. The furnace must be located in just the right spot—and it must be just the right size. ¶ We supply plans to you absolutely free and you do not need to buy a furnace to get them either.

¶ If you have a heating problem to solve—new building or old—send us a rough diagram of your building, showing the location of doors and windows. ¶ We will prepare for you complete plans and specifications for heating that building, give you an estimate of the cost of the heating system, and also the advice of our experts on every detail.

"Hecla" Furnace

The plan is essential, but it is also essential to have a furnace that will give you ample heat—one that will supply pure, fresh air without a taint of gas, and, for the lady of the house, heat that will be free from dust and smoke.

The "Hecla" is such a furnace.

CLARE BROS. & CO., LIMITED, - PRESTON, Ont.
PLANS Send a rough diagram of your house and we will send complete plans and estimates for heating it. **FREE**

GET THIS BOOKLET.

"Comfort & Health" tells how you can get heat without gas. It tells how to get the same heat from six tons of coal as you ever got from seven. Write for it to-day. And at the same time ask for any information you may require regarding the heating of your home. 147

Smith—"I have heard that AIR-COOLING is not effective except for small gas engines for light work."
 Morgan—"Yes, I have heard that, too. And the best proof I have to the contrary is the fact that I can do as much and as heavy work with my

Air-Cooled Premier

as any of my neighbors can with their water-cooled engines. Besides, mine does not require more than one-half the attention, and certainly not one-half the gasoline that the water-cooled engines do."

Smith—"How are these engines received about Exeter?"
 Morgan—"One of the best proofs of the merits of the PREMIER engine is the fact that more of them are sold in the neighborhood where they are known than there are of all other makes combined."

Smith—"I will write for the catalogue."
 Morgan—"Yes, and if you give particulars of what you want to do, you can get information applying to your own case."

The Connor Machine Co., Ltd.
 Exeter, Ontario.

Molassine Meal

MADE IN ENGLAND

The only food for horses and cattle that keeps them in perfect condition, and from which you get good results.

MOLASSINE Dog and Puppy Cakes keep dogs healthy, free from worms and smell. Absolutely different from all others.

Learn why the FRICTIONLESS EMPIRE runs easier than others

If you've ever used any other make of separator you'll marvel when you turn the Frictionless Empire. So nearly frictionless that it almost runs itself. Will run for half an hour after you've finished skimming, unless you stop it with our brake.

The Frictionless Empire is the only separator with ball bearings at top and bottom of bowl-spindle. Other makers would jump at the chance of using our Ball Neck Bearing and Three-Ball Bottom Bearing. But our patents prevent others using these friction-eliminating, easy-running, long-life features.

These ball bearing features, together with the lighter bowl, fewer closed bearings, more easily cleaned skimming devices, etc., make the Frictionless Empire the one really good cone separator.

Years of service prove their worth. Empire quality in every machine, and a guarantee as good as a gold bond.

Some day you'll own an Empire. In order to hasten that day we want you to read our new 25c. book. It tells the truth about the two standard methods of cream separation. Gives valuable dairy pointers.

We will send you one copy free, provided you tell us the number of cows you keep. Also name of this publication. Don't miss this book. Send for it immediately. Extra copies 25c. Ask for book No. 2

The EMPIRE Line of Cream Separators

consists of a full range of sizes in both Frictionless Empire (cone method) and Empire Disc. The choice of either cone or disc method, and the size of machine, rests entirely with you.
