Amodi country. Fifteen arrived at San Francisco in July last, from the Amodi valley, for service in the mountains. They will prove of great service.

WATER GAS.—The most decided testimony yet given, says the Boston Journal, in favor of the water gas they are making in Philadelphia, is the action of the city gas company in refusing to supply a portion of the Girard house with their gas, unless the proprietors stop making water gas, with which they are supplying a portion of the Hotel.

The British Government appear resolved to carry into effect the doctrine enunciated in the act of emancipation. We mentioned very recently that the Major-General Gordon, Jamaica, was made a companion of the Bath; and now we hear that another gentleman of color, Mr. Samuel Cockburn, of the Island of Granada, has been appointed administrator of the Government of Montserrat.

Apples of the best description are so plentiful in Massachusetts that they are now selling in Boston and other places for 15 cents a barrel.

A LYNX measuring five feet was killed a week or two since in Carlisle near Concord, Mass. It is said to be a specimen of an almost extinct species in those parts.

The French Academy distributes every year twenty-four prizes for "Virtue," amounting in all to 300 francs. This year seventeen have been given to females.

The London Free Press rejoices over the raising in that neighbourhood, measuring 12 inches round, and apples measuring 18 inches and weighing 244 ounces each.

The cars in which the Prince of Wales and his suite travelled from Albany to Boston are said to be models of elegance, the equals of which were never seen in America.

DEATH OF THE MAN WHO INSULTED THE PRINCE.—New York, Oct. 18.—The Englishman who insultingly threatened the Prince of Wales here, died yesterday with the delirium tremens.

ARRIVAL OF THE CITY OF WASHINGTON.
The steamer City of Washington off Cape Race on Tuesday at 7 P. M. She brings dates of Thursday 17th.

The news is mainly confined to details of the battle of Voltorno. The Neapolitans estimated at 30,000 strong, attacked the walls of Capua, under cover of a thick mist, and carried some positions, and for a time succeeded in driving back the Garibaldians, whose number did not reach half theirs.

Garibaldi went forward with his army. After a desperate fight of eight hours duration, the Neapolitans were broken and routed, and were pursued close under the walls of Capua, and a brigade of Germans were cut off and driven to the mountains, and the Garibaldians took five thousand prisoners and 2,000 arms.

The Neapolitans had three thousand killed and wounded; the Garibaldians 1,200 to 2,000. The royalists subsequently made some progress, but the German brigade, and were repulsed. The King and his brothers were present at the battle.

Rumors were current that Capua had surrendered, and that the bombardment was progressing; neither, however, is true.

The line of the Voltorno is still strongly protected, and it is said that the Neapolitans are prepared to defend their positions.

Some Sardinian troops assisted the Garibaldians.

Garibaldi called on the King of Sardinia to go to Naples and send him 14,000 men immediately. The Piedmontese have not yet entered the Neapolitan territory. It is reported that the three Great Powers had protested.

Mazzini, by request of the pro-dictator, quitted Rome.

The Pope remained in Rome.

Emerson returned to France.

The French occupied numerous places near Rome. There were reports that the third division would be sent from France.

Paris Bourse dull, depressed 68.80.

Military movements on a vast scale reported in Austria.

News from Pekin to the commencement of July, via St. Petersburg, and London, and English funds depressed by heavy gold exports to France.

The City of Washington encountered strong N. W. and S. W. gales during the entire passage.

MARKETS.—Cotton buoyant; Flour dull; Wheat dull; Corn firm; Pig iron steady; Sugar quiet; Live quiet; Coffee quiet; Tea slow, sale but prices unaltered. Money market generally unchanged.

LATEST.—Orestes, Thursday noon—Cotton buoyant; Breadstuffs firm and quiet; Provision dull; Rice firm.

London, Thursday noon—Consols 93 for money; 93 1/2 for account.

Railway affairs unchanged.

Captain Vine Hall, late of the steamship Great Eastern, has resigned his position; also Mr. McClellan the chief engineer. The second trip of this great ship across the Atlantic is said to be indefinitely postponed.

SEVEN DATES LATER FROM EUROPE.
ST. ALBANS "PULTON" OFF CAPE RACE.

Per Telegram to the Merchant's Exchange Meeting.

The Steamship Fulton passed Cape Race on Sunday, bringing dates from Liverpool to the 18th inst.

All the Great Powers, except England, have signed to the Cabinet at Turin their non-recognition of the blockade of Genoa.

Victor Emmanuel would enter Naples on the 17th. He had already entered Neapolitan town of Gaeta, amid enthusiasm.

Mazzini has refused to leave Naples.

Diplomats at Naples have protested against the Decree relative to Melano, which protest all the Ambassadors signed.

General Geyron has occupied Viterbo.

The Neapolitan Princes had ordered a renewed attack against the Garibaldians.

The Annexation vote would be taken in Sicily on 21st.

CHINA.—The Allied Troops reached Peking August 1, and were established there.

At Peking they found Northern forts evacuated.

They attacked Tartar Camp on the 12th—Chinese fled in disorder.

At mail's departure Chinese were preparing to resist. Grand attack would take place opposite Tolo Forts on August 15th.

Rebels attacked Shanghai on the 18th and were repulsed.

Flour market was dull, with slight decline.

Wheat firm.

Editor's Table.
We have often been laid under obligation to our generous and enterprising townsman Mr. E. G. Fuller for a very prompt and ample supply of late publications, and the current literature of the day. We are glad to find that after several changes he has prepared and is ready to open stores in Hollis Street, next door to W. M. Harrington & Co., where he will not only have ample room to carry on the Bookselling and Stationery business on an enlarged scale, but also have ample accommodation for his increasing business in Exchange, and in his Express department, we cannot but wish him success, he has laid upon our table this week, the usual monthlies, viz: Harper for November

Goodey's Ladies' Book for ditto.

We should like to see the October, and the Household of Bourne, a new work in two vols. very highly spoken of, but of which we shall know more when we have had time to peruse it.

Also from the publishers we have received the November number of the Atlantic Monthly. The table of contents will give a fair idea of its claims to public patronage.—Thomas Hood—Fayal and the Portuguese—Midsummer and May—Expression—Italian Engravings in collecting "Old Masters," "Tasty Scram"—Recollections of Irving—Trene Anatomies—The Professor's Story—Reviews and Literary Notices, &c.

The Madness of Trifling with Disease.
TRUTH FOR THOSE WHO REASON.

There are thousands of lunatics at large. Is the man sane who shows more solicitude to keep his house in repair than to preserve his health or prop his failing constitution? Such a man is, as Shakespeare has it, essentially mad, without seeming so. Besides, there is no excuse for the madness of trifling with the means of recovery when placed within the reach of every valuer of life, and in all countries, have reason to congratulate themselves that Professor Holloway's remedies have been given to the world. His celebrated remedies are achieving in all regions and climates, and over the most fruitful sources of disease, the most signal triumphs. The success of Holloway's remedies appear in every public journal that issues from the press, and more than ten thousand certificates of cures accomplished by his Pills and Ointment, are published annually in Europe and this country. Holloway's remedies are mineral poisons and paralyzing narcotics considered necessary in the practice of physic. The two medicinal wonders of the nineteenth century have superseded them. The dyspeptic, the acrofula-stricken, the victims of liver complaint, or eruptive disease, grow worse than all of mineral medicines, reject the salutary revolution. They suffer under the remedial themselves that Professor Holloway's remedies have been given to the world. Holloway's remedies are mineral poisons and paralyzing narcotics considered necessary in the practice of physic. The two medicinal wonders of the nineteenth century have superseded them. The dyspeptic, the acrofula-stricken, the victims of liver complaint, or eruptive disease, grow worse than all of mineral medicines, reject the salutary revolution. They suffer under the remedial themselves that Professor Holloway's remedies have been given to the world. His celebrated remedies are achieving in all regions and climates, and over the most fruitful sources of disease, the most signal triumphs. The success of Holloway's remedies appear in every public journal that issues from the press, and more than ten thousand certificates of cures accomplished by his Pills and Ointment, are published annually in Europe and this country.
