(From our own Correspondent) Simcoe, Sep. 21.—The event of yesterday was the address delivered in the parish hall by Miss Templeton-Armstrong, of Port Rowan, Norfolk's most gifted public speaker.

"I see the Conservation of Resources Committee are together at last," said Mayor Williamson, to Chairman H. H. Groff, as they with Frank Reid took seats at the rear of the auditorium. And before they got time to discuss plans for the future, all three were escorted to the platform.

Has No Appetite for Bacon Mayor Williamson observed that his hearers should be thankful that the speaker is not food controller. He would prohibit bacon entirely, and beef too, except from men doing manual labor.

Our 150 dogs consume each six to seven dollars worth of food annually. The waste of the last five years would purchase a good hospital site, and that of ten years more would put up a small hospital to start with.

tary motives, and hope you are aware that many cities and towns no larger than ours, prohibit dogs running at large on the public streets.

I intend next year to raise a petition to have the curs and dogs banished from our streets as well. The time is ripe.

Mrs. Sharp observed that farm dogs earned their living and they followed a little clamour during which a score or more expressed their views re cats, and dogs and then

Mr. H. H. Groff Spoke Briefly. He rejoiced that there was in Simcoe an urban hysteria regarding food shortage. We were, he thought, too close to the source of supply.

Miss Templeton Armstrong, on rising thought such a meeting should be unnecessary; there is little to do but get together arrange about the work and circulate the cards.

The Reformer yesterday makes a sane appeal for patronage of the home ovens in lieu of paying bread money to the express companies. One of the local bakers claims that the home oven can bake sufficient for the local demand.

must merge to the ending of this war.

You may not like the order but you have to like the object.

In great historic times of stress as at the siege of Derry, men held on and fought through starving.

Let us too, have nothing on our consciences when the war is over. "Not Enough to Go Round."

Mrs. Sharp thought it best to look upon the matter as a simple case of "not enough to go around," and that the men under arms should be first served, and expressed her unbounded confidence in the women of Norfolk, that they would carry on during their bit.

Wheat a Small Item Frank Reid gave figures to show that the amount of wheat used to make spirits during the last fiscal year, was a mere nothing—about 4,000 bushels, but the figures for barley, rye, corn, sugar and black strap were astounding.
