ANALYSIS OF MURDER

MEN IN PRIME OF VIGOR COM-MIT THIS CRIME MOSTLY.

Majority of Victims Are Women-Men Are Oftenest Killed by Manslaughter-Drink Has No Special Relation to Homicide-Jealousy Is a Prime Motive-Saturday a Favorite Day For This Crime.

Day For This Crime.

A remarkable analysis of the crime of murder for the last 20 years by Sir John Macdonnell, Master of the Supreme Court, is the principal feature of the criminal statistics of England and Wales for 1905, which was issued recently. The number of people sentenced to death for murder from 1836 to 1905 was 488 males and 64 females. In the last decade the actual number of cases in which execution followed the death sentence is shown in the following table:

ä	shown in the f	following tabl	le:
	Year.	Sentenced.	Executed
Į.	1905	32	17
	1904	28	16
	1903	40	27
100	1902	33	22
	1901	28	15
	1900	20	13
	1899	29	15
	1898	27	11
ğ	1897	14	6
ı	1896	33	20

Sir John writes: "The first fact to be noted is that murder, as might be expected, is a crime of men. Murder means murder by men in a great majority of cases. Out of 532 sentenced to death since 1886, 488 were men. The figures are more remarkable because as regards women they include cases of child murder, to which they are, of course, much more prone than men. The proportion of persons executed to those sentenced is also much higher in men.

Most of Victims Women.

higher in men.

Most of Victime Women.

"The next noticeable point, which is rarely mentioned, is that a great majority of the persons murdered are women. They are as three to one. Murder means to a very great extent the murdering of women by men. It is a curious fact, on the other hand, that the number of men killed by manslaughter exceeds women by two to one.

mansistiques.

to one.

"A great majority of the murders are committed by persons between the ages of 21 and 40, that is, during the period of greatest physical vigor. This fact is illustrated by the following table, showing the ages of persons convicted of murder from 1886 to 1905:

Ag	e.	1000									8								No
12	to	16		ĕ			٠		•	Ų,				S		٥	ĕ	133	
16	to	21	3					Ų.	8		9	N	8		ij		Ü	15	5
21																			18
30	to																		14
40				Š	Ø	S	8	8	9		B	8	8		8	A	Œ	0	9
50																			5
Abo																			3

"A further notable point in regard to murders committed by men is the very large proportion of murders of wives. Out of a total of 488 murders for which men were sentenced to death in the 20 years under consideration, no fewer than 124, or about 1 in 4, were murders of wives by their husbands. Most of the men convicted of murder belonged like the women to the laboring classes.

Motives for Murder.

Motives for Murder,

Motives for Murder.

"The principal causes or motives for murders during this period were: Jealousy and intrigues, 92: drink, 90; quarrels or rage, 68; revenge, 77; robbery, 50; extreme poverty, 39; illegal operations 12, and for insurance money, 3. Saturday is a favored day for murder, 208 cases having been ascertained to have taken place on that day. Between 10 o'clock and midnight is the favorite time for the commission of the crme. The majority of the murders appear to be committed in densely populated urban districts, seaports, manufacturing towns, and mining districts."

ports, manufacturing towns, and min-ing districts."

Sir John Macdonnell makes this re-markable declaration of the relation

"Drunkenness is no doubt the cause of many crimes and is the accompaniment of many others, but the theory of the close correspondence of crime and drunkenness must be viewed with cention."

Frog's Long Imprisonment.

While an old horse-chestnut stump was being cut down at Lathbury, a live frog was discovered between the bark and the timber, about 15 inches from the ground. The bark was thick, and had grown completely round it, and, writes a correspondent, there was not the slightest hole through which the frog could have crept in recent years. The tree has shown no signs of life for at least five years past, and on the lowest computation the bark must have had two years growth. The frog must, therefore, have been cut off in its prison from light and food for at least seven years. It was yellow and small, but in excellent health, and when placed on the grass hopped off.

Ail Early Riser.

Lord Alverstone, the Lord Chief Justice of England, who has a salary of \$40,000 a year, when at the bar used invariably to get up between 5 and 6 in the morning, except when he had been late in Parliament. On one occasion he wanted to talk over a certain point in a brief with one of his jumiors. He asked the young man to call in the morning. "At what time, Sir Richard?" asked the young barrister. "At half-past six, at my house," was the reply. The young man arrived on the stroke of the moment. In order to do it, however, he aat up all night!

man to call in the morning. "At what time, Sir Richard?" asked the young barrister. "At half-past six, at my house," was the reply. The young man arrived on the stroke of the moment. In order to do it, however, he ast up all night!

Great Britain's Foxhounds.

There are &bout 170 packs of foxhounds, consisting of about 6,000 couples, in England and Wales, and as the average number of days the hounds are out is about three per week the cost of the packs alone is at least £500,000 a year. This is taking no account of Ireland's twenty-six packs, with about 1,100 couples, and Scotland's eleven packs of 390 couples.

PERILS OF SEAL HUNTING

PURSUIT ENGAGED IN BY MANY ADVENTUROUS CANADIANS.

Battling With Ice-Floes-Loss of Life Among Sealers-Two Hours' Dead-Iv Work-After the "White Coats" -Profits Are Not Large In Proportion to Risk- Indians Frezen to

Seal hunting in the St. Lawrence is a most adventurous occupation. The Newfoundland sealing steamer Greenland was recently lost, her crew narrowly escaping; and alarm is felt in consequence as to the fate of the Canadian sealers who are known to be at the present time battling with the ice-floes of the gulf. The severity of the past winter, the lateness of the present season and the accumulation of ice in the gulf indicate that the annual life and death struggle of the seal hunters is likely to be more protracted and perilous this year than usual.

tracted and perilous this year than usual.

While the Newfoundlanders go sealing in well equipped steamers, the Canadian sealers from the barren coast of eastern Labrador take their lives in their hands when they set sail from their homes to brave the dangers of the hunt in their little fishing schoopers. A week or two shoulding schoopers. Scrild a quart of milk, mix together one cup of molasses, five tablespoonfuls of Indian meal, one tablespoonful of flour, one teaspoonful of salt, one teaspoonful of cinnamon and stir all from their homes to brave from their homes to brave gers of the hunt in their little fishing schooners. A week or two should see them home again if they have good luck, but often they are caught in the ice and are absent from home several weeks at a time.

Caught in the ice.

Caught in the ice. into the scalded milk. Boil for ten minutes, turn into a baking dish and bake in a slow oven for three hours. When half done, pour in a pint of cold

Caught in the ice.

Not one of the schooners that set out last month from the north shore of the gulf after the seals has yet been heard from but this does not necessarily spell death or disaster, when the character of the ice in the gulf at present is taken into consideration, together with the fact that some years ago a number of these schooners were caught in the ice and took from the month of March until the middle of June to reach open water in the vicinity of the Straits of Belle Iale.

Scarcely a season passes without loss Perhaps the best exercise for strengthening the legs is running, and if it can't be done indoors take a sta-tionary run in the house. Begin by slowly raising one foot after the other, weight on the balls of the feet, and throw the feet backward. Increase the time until you are lifting the feet very rapidly, then decrease the time. In buying basting thread it is al-In buying basting thread it is al-ways well to remember that basting thread of an inferior quality is really a better investment than the more ex-pensive make, as it is usually finer and

When you wish to press a new waist fold a clean sheet so that there will be four thicknesses, pin tightly over ironing board, sprinkle with warm water and press the waist on it.

er in the vicinity of the Straits of Belle Isle.
Scarcely a season passes without loss of life among the sealers. In the vicinity of Anticosti some time ago a sealing schooner came across a herd of seals on an ice-floe, and after killing several one of the crew noticed a black object on another floe about a mile distant.

The captain brought the glass to bear upon it and saw that besides being motionless it was far too large for any animal that frequents that gulf. When the object was reached and examined it proved to consist of the bodies of two Indians and two squaws, huddled together and half covered with snow.

They were trozen fast together, stone dead on the lee side of a small mound of ice which they had collected to shelter them from the bitter wind. No doubt they had been blown of the shore while hunting on the batture icg, and had drifted hither and thigher in the gulf, until all hope was lost and Indianlike, they had huddled together.

Many others have lost their lives in the attempt to leap over the spaces between floes of breaking up ice fields.

Two Hours' Work. I will mail you free, to prove merit, samples of my Dr. Shoop's Restorative, and my Book on either Dyspepsia, The Heart or The Kidneys. Troubles of the Stomach. Heart or Kidneys, are merely symptoms of a deeper aliment. Do not make the common error of treating symptoms only. Symptom treatment is treating the result of your aliment, and not the cause. Weak Stomach nerves—the luside nerves—mean Stomach weakness, always And the Heart, and Kidneys as Well, have their controlling or inside And the Heart, and Kidneys as well, have their controlling or inside cerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy even claims to treat the "inside nerves." Also for bloating, billousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me to-day for sample and free Book. Dr. Shoop, Racine. Wis. The Restorative is sold by all slealers.

Two Hours' Work.

The amount of seal life destroyed by the Labrador hunters does not begin to compare with the result of the. Newfoundland hunt. Nevertheless a crew of eight men have been known to kill five or six hundred seals in a couple of hours.

Much depends upon the opportunity offered of taking the animals by surprise. When a large herd is seen upon an ice field, the men, who usually number from eight to twelve on a schooner, take a small boat and get as near as possible to the part of the ice-floe where the seals are basking, especially if that is the side nearest to the water.

If still unperceived, they crawl upon their hands and knees and spare no efforts to get close up to the herd without being seen. Then the slaughter begins.

Stunned and Disabled. She keeps colored socks and stockings from fading by soaking them overnight in tepid water to which a cup of turpentine has been added.

She uses salt to remove the stain

She uses salt to remove the stain made by eggs on silver.

She takes the trouble to examine all of the canned goods that she buys. If the cans buige outward, it is a sure sign that they have not been properly sealed and that air has got in.

She improves the flavor of her coffee by adding a pinch of salt.

Stunned and Disabled. Stunned and Disabled.

She improves the flavor of her coffee by adding a pinch of sait.

She keeps a box of borax in her kitchen and adds a little to the water when she is boiling out enameled saucepans to cleanse them perfectly. when she is boiling out enameled saucepans to cleanse them perfectly.

She keeps water pipes clear by dissolving one pound of potash in one quart of water. Just before retiring she pours the mixture into the waste pipe of the sink. During the night the lye acts on the grease so that the first current of water turned on in the morning will wash it away and the pipe will be as clear as new. ers hurry on to stun as many more of the herd as possible before they can make their escape into the open

Free for Catarrn, just to prove Shoop's Catarrh Remedy. Let me send it now. It is a snowy-white, oreamy, healing, antiseptic baim. Containing such healing ingredients as Oil Eucaliptus, Thymol, Menthol, etc., it gives instant and lasting relief to Catarrh of the nose and throat. Make the free test and see for yourself what this preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50 cents.

Sold by All Dealers.

of the herd as possible before they can make their escape into the open water.

Then the hunters' knives are produced. The skin with the adhering fat is rapidly detached from the carcass, which is left on the ice. The ice is soon stained with blood and dotted with the skinless carcasses of the slain.

The great aim of the hunters is to get among the "white coats," as the young harp seals are called in their babyhood, when yet ted by their mother's milk and while they are powerless to escape. The oil then extracted from the blubber is of a much finer quality than that obtained from the tull-grown seals.

Perfectly Defenceless.

These ordinary seals of the gulf, commonly known as harp or Greenland seals, are perfectly defenceless. Not so, however, the hood seal, which is frequently met with the others.

The reward of all the perils undergone is very small. The members of a crew divide their profits equally, and these often do not exceed \$200 for the season, though formerly the average was at least \$400. Seal oil, which was formerly worth 80 cents a gallon, now sells at from 30 to 35 cents, and there has also been a falling off in the value of skins, which are chiefly made into leather and are worth about a dollar apiece.

Their gray or pepper and salt colored fur is by no means unsightly, and they may become more valuable soon, as some have recently been made up into winter overcoats, which retail in Quebec for about \$50, or one-tenth the price of Alaska seal.

"Have you anything put aside for

Hadn't Built An Ark.

"Have you anything put aside for a rainy day?"

"No; I'm no Noah."
